

# LIQUIFLEX

## ULTRA PUMA

Liquiflex-PUMA is a high-performance waterproofing solution designed for durability, flexibility, and ease of application. Utilizing advanced polyurethane-methacrylate (PUMA) technology, it provides seamless, long-lasting protection for roofs, balconies, and other surfaces exposed to extreme conditions.

Liquiflex-Ultra is a PUMA (polyurethane-methyl-methacrylate) based system . Every component from primer to membrane to topcoat is accelerated and very fast curing. This system is also very strong once cured and suitable for high trafficked areas like car park top decks and roof terraces etc.

Taking just 30-45 minutes to fully cure, say hello to minimised disruption and closure times and significant savings to labour costs.

## BENEFITS

- Ideal for heavy-duty applications including roofs, car parks, bridges etc
- Tenacious adhesion to most substrates
- Ultra fast cure times
- Available in any RAL code
- 10 & 20 year warranties
- Ultra Strong
- Cold applied
- Elastic waterproofing system
- Crack Bridging
- High weather resistance

**Top Coat  
Available  
in any RAL  
colour**

## ULTRA PUMA

### COMPONENTS

#### LIQUIPRIME- ULTRA PUMA

This is a primer for porous substrates ie concrete and any surface rust metals. Used to prepare these substrates (when required) for Liquiflex ULTRA PUMA

#### LIQUIFLEX MEMBRANE

This is our liquid waterproofing system, which is the part that actually makes the roof watertight

#### LIQUIFLEX ULTRA DETAIL FLEECE

This is a woven fleece used in conjunction with Liquiflex ULTRA PUMA to reinforce the membrane. This is encapsulated inside the membrane. This specific size roll is designed for upstands and other detailing work.

#### LIQUIFLEX ULTRA FLEECE

This is a woven fleece used in conjunction with Liquiflex ULTRA PUMA to reinforce the membrane. This is encapsulated inside the membrane.

#### MMA INITIATOR

The MMA Initiator activates the full Liquiflex ULTRA PUMA system.

#### LIQUIFLEX ANTI-SLIP GRANULES

These are non-slip granules which are scattered onto a wet topcoat and then encapsulated with more topcoat. This leaves a textured non-slip surface suitable for foot traffic. Ideal for balconies or for a non-slip walkway for maintenance etc.

# Non Slip Granules AVAILABLE

in standard & extra fine grain
