

The perfect pour. Every time

A two-part floor smoothing compound designed to provide a flawless, smooth finish while reducing walk-on times.

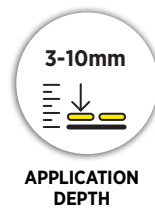

weberfloor bag & bottle 4000

A two-part floor smoothing compound,
ideal for use in environments where
access to water is limited.

FEATURES AND BENEFITS

- Can be covered in 8+ hours, with foot traffic in as little as 2 hours
- Provides a smooth and strong finish ideal for receiving a range of final floor coverings
- Designed for use in residential and commercial areas allowing a much earlier overlay
- Hand application for depths between 3-10mm
- Can pre-smooth substrates up to 98% RH before applying a moisture control system
- Compatible with all cementitious and anhydrite-based substrates
- Casein-free formulation allowing for use in biologically sensitive areas
