New Product
Launches 25/26

MAKING LIGHTING SIMPLE™

Forever innovating
beautifully simple lighting
solutions for kitchens
and bedrooms

Illlumination

We're excited to introduce you to our next generation of product developments.

Our in-house design team have been hiding away in the lab, analysing and evaluating to bring new solutions to the table, which we believe to be truly innovative.

Over the course of this booklet, we'll reveal next gen thinking on flexible strips and beautifully designed accessories which integrates into kitchen furniture so well, you'll hardly notice it...

...until you switch on the lights!

WHERE REAL-WORLD INSIGHT SHAPES **INNOVATION**

At the heart of our process is a simple principle, **we listen first.**

Every product we create begins with a conversation. By spending real time with our customers, on site and in their working environments, we gain first hand insight into how our products are used in the field. These collaborative reviews allow us to see challenges, opportunities, and creative adaptations that can only be understood through genuine interaction.

From these sessions, our design and engineering teams return not just with feedback, but with purpose. Each improvement we make is intentional, driven by real-world application and the desire to craft lighting solutions that feel considered, functional, and truly built for the people who rely on them every day.

“

Innovation doesn't start in the studio, it starts on site with the installer.”

Charles Offord, Product Designer

“At the heart of our process is a simple principle, we listen first. The most valuable part of what we do isn’t the prototype, it’s the conversation that shapes it.”

Fariz Khellaf, Ph.D

Global Chief Technology Officer

Polar X

Polar X Pro

Primo X

FREE-CUT

Evolving our X-SERIES flexible LED strip systems

Back by popular demand, we have enhanced our x freecut series to include a wider variety of our LED range.

The X-series is cuttable at any length delivering precision for installation leaving no dark spots. Combined with additional connector and cable kits the x-series allows for any lengths to be used eliminating potential waste which is more cost effective.

RAZOR X 2MM

Free-Cut Recessed LED Strip

A super-slim evolution of our fully diffused Polar COB strip. The Razor X 2mm has a thin 2mm width providing a discrete appearance, while still offering a fully diffused light output.

The edge lit design allows the Razor X 2mm to be recessed into a narrow channel, creating a sleek lighting effect. Bending around corners beautifully for unique design installations.

- Single Colour: Choose Natural white light (4000K) or Warm light (3000K).
- Free cut: Can be cut to any desired length.
- Chip on Board (COB): Technology provides seamless light output and efficiency.
- Recessed Installation: Easily recessed with a saw cut or router.
- Bendable: Easily flow around corner recesses
- Push fit install: No VHB adhesive backing for easy push fit installation.
- Compatibility: Adjust brightness when paired with Sensio controls and drivers.
- Connection: Pre-soldered 2.5m driver connection cables at each end.
- Accessories: Additional driver connection cable (sold separately) to utilise all cut lengths.
- Profiles: Pair with the Edge profile, designed specifically for the Razor X strip.
- Registered design right: 6371779.

Push-fit in a routed channel

Cut the Razor X at any point to achieve the perfect fit.

**Ideal for bespoke
routed 2mm channels
produced with a
circular saw.**

RAZOR X 4MM

Free-Cut Recessed LED Strip

Razor X 4mm is a chip-on-board (COB) lighting solution, designed with manufacturers in mind. Available with or without wings. Its 4mm width fits perfectly into grooves made with standard saw blades, whether cut on-site or in the factory. The flexible, edge-lit design allows the strip to bend around curves and corners with ease.

- Single Colour: Choose Natural white light (4000K) or Warm light (3000K).
- Free cut: Can be cut to any desired length.
- Chip on Board (COB): Technology provides seamless light output and efficiency.
- Recessed Installation: For anyone with routing capabilities, either CNC machine or hand routing.
- Bendable: Easily flow around corner recesses.
- Push fit install: No VHB adhesive backing for easy push fit installation.
- Winged version available: For a clean finish to cover routing imperfections.
- Flexible driver connection cable: For either side or back cable placement.
- Compatibility: Adjust brightness when paired with Sensio controls and drivers.
- Connection: Pre-soldered 2.5m driver connection cables at each end.
- Accessories: Additional driver connection cable (sold separately) to utilise all cut lengths.
- Registered design right: 6371779 (winged): 6443845.

“Designed with manufacturers in mind.”

Product Design Team,
Sensio.

Flexible connection creates clean cable management by carrying the wire straight back through a drilled hole, in the routed channel.

**Ideal for bespoke
routed 4mm channels
widely used in
manufacturing**

RAZOR X PRO 2MM

Free-Cut Recessed CCT LED Strip

Providing the benefits of the super slim Razor X 2mm but with colour changing technology (CCT). The Razor X Pro 2mm seamlessly transitions from Warm White (2700K) to Cool White (6500K) with colour changing technology.

- CCT: Correlated Colour Temperature.
- Free cut: Can be cut to any desired length.
- Chip on Board (COB): Technology provides seamless light output and efficiency.
- Recessed Installation: Easily recessed with a saw cut or router.
- Bendable: Easily flow around corner recesses.
- Push fit install: No VHB adhesive backing for easy push fit installation.
- Compatibility: Adjust brightness when paired with Sensio controls and drivers.
- Connection: Pre-soldered 2.5m driver connection cables at each end.
- Accessories: Additional driver connection cable (sold separately) to utilise all cut lengths.
- Profiles: Pair with the Edge profile, designed specifically for the Razor X strip.
- Registered design right: 6371778.

Both the Razor X 2mm and Razor X Pro 2mm install harmoniously with the Edge profile.

Cut the Razor X Pro at any point to achieve the perfect fit.

Ideal for bespoke routed 2mm channels produced with a circular saw.

POLAR X

Free-Cut Flexible LED Strip

Natural white

Warm white

Polar X, the next gen of our ever popular Polar COB LED strips. The Polar X is cuttable at any length, delivering precision for installation leaving no spots in the dark. Providing a completely diffused line of light with no visible LED dots, eliminating the need for a profile or cover.

- Single Colour: Choose Natural white light (4000K) or Warm light (3000K).
- Free cut: Can be cut to any desired length.
- Chip on Board (COB): Technology provides seamless light output and efficiency.
- No Voltage Drop: 24V allows long runs of light without any fade, even across longer runs of 25m.
- VHB (Very High Bond): adhesive tape backing for secure installation.
- Compatibility: Adjust brightness when paired with Sensio controls and drivers.
- Connection: Pre-soldered 2.5m driver connection cables at each end.
- Accessories: Additional driver connection cable (sold separately) to utilise all cut lengths.
- Registered design right: 6366472.

***“Your favourite COB strip now available in increased lengths to bring any lighting design to life.*”**

Product Design Team,
Sensio.

Cut the Polar X anywhere to get the perfect trim for your installation.

FLEXIBLE LED PANELS

Sheets of light

Flexible panels of uniform illumination. Our new range of sheet lights, Pixel & Pixel Pro have been developed to deliver even illumination over any surface. Pair with natural stone to create a statement installation.

PIXEL

The Pixel Panel is a flexible LED sheet designed for bespoke installation and large-scale applications. Ideal for luxury interiors, including under marble worktops, architectural features, backlit signage and displays, and commercial environments where uniform lighting is essential.

- Single Colour: Natural white light (4000K).
- Bendable: Flexible material for curved or corners for bespoke installations.
- Free cut: This can be cut in all directions.
- Connection: Supplied with 2.5m driver connection cables for easy set up.
- Compatibility: Adjust brightness when paired with Sensio controls and drivers.
- Slim Connectors: 5.75mm connector blocks, positioned around the sheet for versatile connection.
- Accessories: Connect multiple panels together using interconnecting leads (sold separately) to achieve larger illuminated areas.

Pixel in-situ

Used to link two Pixel Panels together for continuous illumination across larger surfaces, ensuring a seamless lighting connection between panels.

A 2500mm driver connection cable designed for use with the Pixel Panel.

“

“Designed for architects & designers to enhance luxury interiors.”

Product Design Team, Sensio.

AFFINITY

GAME CHANGING LIGHTING

Designed with installers in mind.

First to market innovation, changing the game on how installers use lighting. Introducing the Affinity track system, designed to simplify and future proof installations with its magnetic technology and interchangeable accessories.

Magnetic Track

A magnetic track lighting system designed to make custom lighting effortless. Simply stick the track to your desired surface and customise your setup, from spotlights to LED strips using interchangeable accessories and controls. The system requires only one power cable (sold separately) and any Titan+ Driver (depending on wattage), to run multiple lights, reducing the need to chase each light.

- Free cut: Can be cut to any desired length.
- VHB (Very High Bond): adhesive tape backing for secure installation.
- Patent protected: P46352W01.

Under Cabinet Lighting (Compatible with Affinity Magnetic Track)

A TrioTone® spot light designed to secure to the Affinity track with magnetic backing for complete customisation.

- TrioTone®: Select between Warm (3000K), Natural (4000K), or Cool White (5000K).
- Patent protected.

“

“Flexible lighting at your fingertips. Simply click the magnetic lights into place and move them whenever you like, no need to adjust each one.”

Product Design Team, Sensio.

'CLICK!'

Attached anywhere on the track to best illuminate your space.

USB / USB-C Charging Port

- Secures to the Affinity Track with the magnet on the back for complete customisation.
- Patent protected.

IR Sensor

Secures to the Affinity Track with the magnet on the back for complete customisation. Activate lighting by swiping hand in front of sensor or dim lighting by holding hand in front of sensor.

- Will only work when using the Titan+ driver with the Affinity system. (IR sensor can't be used in conjunction with Smart App, Voice or Kinetic control).
- Patent protected.

2 cut tracks required for the IR Sensor to function.

Faraday X

A single colour flexible strip designed to secure to the Affinity track with magnetic backing for complete customisation.

- Single Colour: Choose natural white light (4000K) or warm white light (3000K).
- Free cut: Can be cut to any desired length.
- Chip on Board (COB): Technology provides seamless light output and efficiency.
- Connection: Illuminate the strip with the strip connector (sold separately).
- Reel comes with 1 x flexible strip connector.
- Patent protected.

INTEGRATED PROFILES

Not just a simple plastic cover

Each profile has been enhanced with the latest technological advances to not only keep up with trends but to make installation quicker, easier and more seamless.

VERSA SURFACE MOUNTED PROFILE

Premium aluminium profile, designed for surface-mounted installations, offering a high-end finish for any space. Engineered to work seamlessly with Sensio's plug-in sensor modules, available in IR, PIR, or Touch dimmer options (sold separately).

- Push-fit diffuser: Plastic diffuser ensures uninterrupted, even illumination across long runs.
- Universal Strip Compatibility: Suitable for all Sensio flexible LED strips.
- Accessories: Supplied with 4 x mounting brackets and 4 x end caps.
- Full length diffuser: which can be easily trimmed to accommodate a Versa Sensor when required.

“Reducing complexity with plug in sensor modules to save time on site.”

Product Design Team,
Sensio.

Versa - Surface mounted profile

SKU	Details	Dimensions	RRP
SE00299	Versa - Surface	2500mm x 17mm x 9mm	£22.56
SE00312	Versa - IR Sensor	14.5mm x 9mm x 50mm	£8.60
SE00311	Versa - PIR Sensor	14.5mm x 12mm x 50mm	£9.66
SE00313	Versa - Touch Sensor	14.5mm x 9mm x 50mm	£8.08

Available to order from 5th March 2026

VERSA RECESSED PROFILE

Premium aluminium profile, designed to be recessed for a flush finish within furniture or interiors. Engineered to work seamlessly with Sensio's plug-in sensor modules, available in IR, PIR, or Touch dimmer options.

- Push-fit diffuser: Plastic diffuser ensures uninterrupted, even illumination across long runs.
- Universal Strip
Compatibility: Suitable for all Sensio flexible LED strips.
- Accessories: Supplied with 4 x end caps.
- Full length diffuser: which can be easily trimmed to accommodate a Versa Sensor when required.

Versa - Recessed profile

SKU	Details	Dimensions	RRP
SE00295	Versa - Recessed	2500mm x 22mm x 9mm	£22.92
SE00312	Versa - IR Sensor	14.5mm x 9mm x 50mm	£8.60
SE00311	Versa - PIR Sensor	14.5mm x 12mm x 50mm	£9.66
SE00313	Versa - Touch Sensor	14.5mm x 9mm x 50mm	£8.08

Available to order from 5th March 2026

VERTEX

The Vertex LED shelf light is a slim fitting, up and down directional shelf light and profile designed to sit on the back of shelf boards. No need to trim the shelf for installation. The power cable exits backwards, this can span perfectly all the way across the shelf with no exposed wires. This is a fully integrated solution, with pre-installed strips.

- Single Colour: Natural white light (4000K).
- Easy Fit: No need to trim the shelf for installation.
- Rear cable placement: For concealing power cables.
- Free cut: Can be cut to any desired length.
- VHB (Very High Bond): adhesive tape backing for secure installation.
- Shelf Compatible: Designed to work with standard shelf sizes 50cm, 60cm and 1m.
- Registered design right: 6443843.

“

“Working with installers to design rear cable entry for seamless wire management.”

Product Design Team, Sensio.

Universal Joining Clip registered

UNIVERSAL CONNECTOR

Designed for seamless integration with Sensio (8mm - 10mm wide), the Universal Accessories range ensures easy installation and consistent light output across your lighting plan.

The translucent connectors provide a continuous, diffused glow with no visible dark spots, helping you create clean, professional results without the need to source individual connectors.

- Join two LED strips at a 90° angle, perfect for perimeter or corner lighting installations. Universal Corner Connector registered Design Right: 6428459.
- Easily link two LED strips together for longer continuous runs. Universal Joining Clip registered Design Right: 6428458.
- Join two LED strips at a 90° angle, perfect for perimeter or corner lighting installations. Universal T-Junction Connector registered Design Right: 6428460.

Universal Driver Lead

Designed for seamless integration with Sensio (8mm - 10mm wide) LED strips, the Universal Accessories range ensures easy installation.

2500mm cable length to extend the distance between two LED strips.

- Registered Design Right: 6428456 (Single colour).
- Registered Design Right: 6428457 (CCT).

TRIOTONE® CONTROL

Simplifies Colour Selection

The controller plugs directly into any standard LED driver, making any CCT product TrioTone® compatible. This enables the light source to be matched to any interior design style, as well as providing the flexibility to be changed in the future.

TrioTone® Control

SKU	RRP
SE090009A0	£11.93

JB4 DETACHABLE DRIVER CONNECTORS

No need for large cable holes with the detachable JB4 connector. Simply cut the lead to the required length and attach the JB4 clip, you don't even need to strip the cable!

- Compatibility: Use any Sensio lighting products that require a driver lead.
- Availability: 2-pin (Single colour or TrioTone®) and 4-pin (CCT).
- Patent protected: P47523GB1.

2-pin (Single colour or TrioTone®)

4-pin (CCT)

JB4 DETACHABLE DRIVER CONNECTORS

SKU	Details	Qty	RRP
SE00251	2-pin (Single colour)	10	£16.50
SE00252	4-pin (CCT)	10	£18.98

Step 1.

Cut the wire.

Step 2.

Feed the wire through your pre drilled hole.

Step 3.

Insert the copper with into the two holes and press the connector lid down.

Step 4.

Insert the JB4 connector into your driver.

Delivering full dimmable options, we've developed two ranges of drivers which offer dimmability.

Titan Dimmable is designed to handle dimming voltage from mains, input max 230V, typically controlled by a wall mounted dimmer switch.

Our Titan + range of drivers are designed to handle dimmable output at max 24V, controlled with a sensor or receiver placed after the driver.

TITAN DIMMABLE

Designed to Handle Lower Load

We've made our lighting too efficient! For a power supply to be able to dim lighting efficiently, they need a minimum load. So, we're adding a smaller, 15W driver to our dimmable range. Ideal for use with shorter lighting runs and our low wattage fittings.

Control with a standard mains dimmer.

TIP

Consider the wattage. Dimmable drivers require a **minimum 25% load** to function efficiently.

- For **15W**, connect a minimum **3.75W** of lighting
- For **30W**, connect a minimum **7.5W** of lighting
- For **60W**, connect a minimum **15W** of lighting

Titan Dimmable - Compatible with a wall dimming switch

SKU	Driver	No. Ports	RRP
SE40699	Titan 60W Dimmable Driver	10	£52.39
SE40899	Titan 30W Dimmable Driver	6	£44.86
SE40799	Titan 15W Dimmable Driver	6	£26.58

TITAN+ DRIVER

High capacity for longer light runs

We're introducing a 150W driver to our Titan+ range to create longer runs of flexible strip lighting or simplify installation, allowing many lights to be illuminated from one power source.

Control with our wireless sensors, see page 54

Titan+ - Plug & play sensor drivers

SKU	Driver	No. Ports	RRP
SE150014A0	Titan+ 150W Driver NEW	6	£85.50
SE150004A0	Titan+ 60W Driver	6	£50.90
SE497950	Titan+ 30W Driver	6	£49.69
SE496950	Titan+ 15W Driver	6	£30.49
SE495950	Titan+ 6W Driver	4	£25.01

TITAN SMART KINETIC DRIVER

High Capacity for Longer Light Runs

We've re-engineered our smart drivers for increased kinetic wireless range and reliability.

Control with the Link Sensio app or other smart devices

Titan Smart Kinetic Driver - Single Colour (2-pin)

SKU	Driver	Channel	No. Ports	RRP
SE00056	Titan Smart Kinetic Driver 60W NEW	5	5	£75.36
SE406591	Titan Smart Kinetic Driver 30W	5	5	£72.16
SE406581	Titan Smart Kinetic Driver 15W	5	5	£62.12

Titan Smart Kinetic Driver - CCT (4-pin)

SKU	Driver	Channel	No. Ports	RRP
SE00057	Titan Smart Kinetic CCT Driver 60W NEW	3	6	£76.56
SE406592	Titan Smart Kinetic CCT Driver 30W	3	6	£73.93
SE406582	Titan Smart Kinetic CCT Driver 15W	3	3	£62.70

New drivers available to order from 13th January 2026

TITAN+ WIRELESS SENSOR RANGE

Eliminate the hassle of wires and cables with the Titan + Wireless range. Available in 4 different sensor options, giving a choice of control and allowing bespoke product creation. As well as ease of use, the Titan+ Wireless range reduces energy consumption, as they don't require a constant power supply or connection.

- No messy wires to hide.
- Perfect for surface mounting with the included bracket.
- Available in 4 types - Touch, IR, Door and PIR sensor.
- Compatible with the Titan+ Driver.
- Easily pair up to 10 sensors to one receiver for wireless connection.
- Detection range from sensor to receiver: up to 5m.

Discreet control anywhere.

One switch - controls all driver channels

Effortless - one touch pairing

Quick connect
- receiver plugs directly
into the Titan+ port

Low profile
- sensor and
bracket design

Intuitive hand-gesture control without the need to route extra cables

Titan+ Wireless IR Sensor

- Activate by swiping hand in front of sensor or dim the lights by holding hand in front of sensor.

Titan+ Wireless PIR Sensor

- Lighting will activate with movement from up to 2.5m.

Titan+ Wireless Door Sensor

- Activate lighting by opening the cabinet door. Works for both single and double doors.

Titan+ Wireless Touch Sensor

- Tap sensor to turn lighting on/off. Tap and hold sensor for 5 seconds to dim lighting.

Sensors & Receivers

SKU	Sensor Type	RRP
SE900530	Titan+ Wireless IR Sensor and Receiver	£22.39
SE900730	Titan+ Wireless Touch Sensor and Receiver	£25.25
SE900830	Titan+ Wireless Door Sensor and Receiver	£25.60
SE900630	Titan+ Wireless PIR Sensor and Receiver	£31.80

Individual Components

SKU	Sensor Type	RRP
SE900030	Titan+ Wireless IR Sensor	£13.92
SE900230	Titan+ Wireless Touch Sensor	£13.56
SE900330	Titan+ Wireless Door Sensor	£14.29
SE900130	Titan+ Wireless PIR Sensor	£15.82
SE900430	Titan+ Wireless Receiver	£8.68

Additional Sensors - pair up to 10 sensors with one receiver

“We don’t just develop products, we help you understand them.

Our training team have trained over 10,000 designers and installers annually, from helping with lighting plans to large scale training seminars. We believe in being your lighting partner for life.”

Andrew Sheppard
Training Manager
