

Pixel

Where Nature Becomes Art

sensio[®]

Craft Luxury

**Flexible LED
panels for
worktops and
arcitectural
features.**

The Pixel Panel is a flexible LED sheet designed for bespoke installation and large-scale applications. Ideal for luxury interiors, including under marble worktops, arcitectural features, backlit signage and displays, and commercial environments where uniform lighting is essential.

Illuminating Freedom

Free-Cut

Craft the perfect fit. Both the Pixel and Pixel Pro can be cut between any diode.

Tilable

Bridge any two power ports to tile Pixel sheets into a bed of seamless LED light.

24V Power

Multiple ports around every sheet allow the power to be fed in at any point.

Pixel & Pixel Pro

Flexible LED panels

- Pixel: Single Colour - Natural white light (4000K).
- Pixel Pro: CCT - Correlated Colour Temperature (2700K-6500K).
- Bendable: Flexible material for curved or corners for bespoke installations.
- Free cut: This can be cut in all directions.
- Connection: Supplied with 2.5m driver connection cables for easy set up.
- Compatibility: Adjust brightness when paired with Sensio controls and drivers.
- Slim Connectors: 5.75mm (Pixel) and 5.85mm (Pixel Pro) connector blocks, positioned around the sheet for versatile connection.
- Accessories: Connect multiple panels together using interconnecting leads (sold separately) to achieve larger illuminated areas.

Pixel - **Natural White (4000K)**
