

## Universal transition fitting

### Cut down on SKU proliferation with just one single fitting!

SANHA® is once more introducing a helpful addition to its range. With our new universal transition fitting, connections between thick-walled steel pipes and various other pipes like stainless steel, carbon steel and copper are an easy feat for the experienced installer.

### Why choose SANHA® transition fittings?

The new fittings are made from lead free silicon bronze (CuSi). This material is highly corrosion-resistant and durable and optimally suited to connect various metals. The fittings are available in a wide range of common dimensions, offering maximum flexibility for installers and wholesalers alike. At the same time, the premium material allows for a wide range of applications such as heating, cooling, drinking water, compressed air and many more.

With two press ends – one for thick-walled steel pipes, the other for stainless steel, carbon steel and copper pipes –, new installations as well as repairs in existing buildings can be carried out in a convenient and timely manner.

70245 Transition Press connection		
Art.-Nr.	Dimension [Dxd]	Qty
670245TF1215	1/2" x 15 mm	10
670245TF1218	1/2" x 18 mm	10
670245TF3422	3/4" x 22 mm	10
670245TF128	1" x 28 mm	5
670245TF11435	1 1/4" x 35 mm	1
670245TF11242	1 1/2" x 42 mm	1
670245TF254	2" x 54 mm	1

The connection with thick-walled steel pipes is especially durable due to two rows of bi-directional "teeth" acting as a further stabilising factor while holding the fitting in place when it is pushed onto the pipe. A 200 % larger surface area of the sealing ring ensures a permanently tight connection.

### Compatible pipes

- | **Copper pipe** according to EN1057
- | **Stainless steel pipes** according to EN 10312 (option 1, 2 and 3)
- | **Carbon steel pipes** according to EN 10305-3
- | **Thick-walled steel pipes** according to EN 10220 and 10255

The press connection on the other side sports all the advantages of combipress:

- Can be pressed with SA, V and M original contours
- Push & Stay for easy handling
- Leak path feature to help ensure that all connections have been perfectly pressed

**Tube compatibility combined with the tool compatibility makes it a full universal fitting!**
