

Your Operation is our mission. As a spider in the web the Operation app sits at the center and handles your call-out. Integrated with the dispatch central it gives you the information that you need. In the way you want it.

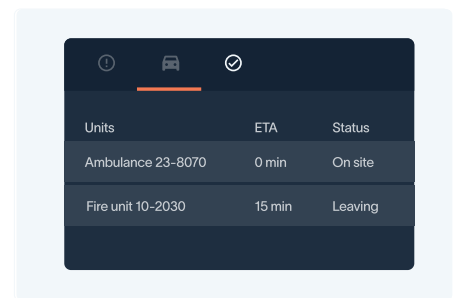

Integrates with dispatch

Simply retrieves up to date information from the dispatch central. Presented as a timeline. Gives you a clear picture of the call-out.

Smartly update your status

The next status is automatically suggested. Or manually send one of your predefined statuses to the dispatch central.

See other units on the call

See other vehicles on the same call-out as you. Their status, role and estimated time of arrival is simply accessible.

Features

Designed for emergency driving. Optimized user interface tailored for safe emergency driving.

Handle multiple callouts simultaneously and choose the active one. Gives you an overview of your assigned callouts.

Updates your radio channel automatically. Automatically controls your communication radio, turning it to the chosen channel for the call-out.

Presents information in a usable way. A timeline gives you a clear picture of the call-out. Information is prioritized and presented for maximum usability.

History. See the history of previous callouts during a selected time. Timestamps for all your actions helps you with documentation.

Linked to other apps. Start a new navigation directly from the operations app.
