Our clients include

The sectors we work for

iC2 provide you with innovative solutions tailored to you and your sector. We are London-based with a national team of surveyors and engineers that work closely with our clients throughout the UK and internationally.

Our unique consultative approach allows us to tailor bespoke systems to your individual requirements, ensuring that your operational requirements are met.

We appreciate the need to demonstrate the best value to you every time and as a technology-led company, you can expect our cutting-edge and ground-breaking approach to serve your needs for many years to come.

Education

iC2 is a specialist in school security and CCTV. We have experience in the sector, meaning we understand that the safety of your staff and students is your main priority and that installation needs to be as hassle-free and non disruptive as possible.

Commercial

iC2's team are experts in working on large sites and understand the precautions that must be taken when dealing with the commercial sector. Our highly trained experts carry out seamless and efficient installations that won't affect your business. iC2 also work with facilities management companies to provide our cutting-edge security systems to various clients under the umbrella of a facilities management agency.

Retail

iC2 understands that issues such as loss prevention and the monitoring and protection of your staff are important factors that need to be addressed when planning your security installation. On top of security it is important that you are able to monitor operations and health and safety too, and our advanced systems make tracking what is and isn't going on in your store straightforward and simple.

Transport

iC2 understands the unique requirements needed to safely monitor your sector, the combination of vehicles and personnel can be a deadly mix and cameras help you ensure health and safety requirements are adhered to. Whereas other industries require mostly stationary monitoring, the transport sector can often be more complex and our services are fully equipped to cater to your specific needs.

Leisure & Hospitality

iC2 understands that the security and safety of your staff and guests is your number one priority at all times. We also understand that within your industry it's essential that your security follows all data guidelines and monitors at a high standard to guarantee the safety of your staff and guests, as well as protect you if the worst should happen and you need to make an insurance claim. This means setting up systems that help you monitor operations as well as improve your security.

Construction

iC2 can offer you unparalleled new build and refurbishment security installations and solutions that cover you from the ground up. We are your perfect partner for the design and installation of your integrated security systems, having gained experience from many projects of all sizes from primary schools to Europe's tallest building, The Shard.

Domestic CCTV

Your property is your most valued possession and you have the right to feel safe when you're in and when you're out of your own home. iC2 can help build the perfect security system for your property allowing you to control your own home when you're in it and have it monitored for you when you're away from the premises.

If you would like further information on our work in these sectors, please take a look on our website: www.ic2cctv.com

Healthcare

iC2 understands that for the healthcare sector protection of patients and staff is a top priority and the safety of all persons within the building is paramount. Your security needs to be discreet while providing the best coverage of your grounds to ensure all people within and around the building are protected and monitored where necessary.

Sports Stadia

iC2 are the perfect choice for your stadium's electronic security requirements, having installed the most sophisticated surveillance installation in any sports stadium in the world at Stamford Bridge, home of Chelsea FC.

Save time & money

- Utilise existing cameras
- Playback with clarity

Services available to you from iC2

iC2 can take care of all of your electronic security requirements ensuring that you have a fully integrated security system in place, protecting your most valuable assets at all times.

Mega Pixel CCTV

Mega Pixel cameras allow incredibly detailed, high-definition footage to be viewed, stored and instantly recalled

- **Allows you to actively identify suspects**
- **Lossless compression ensures a level of quality suitable for use as evidence in order to gain successful convictions**
- **Cost-effective recording**

Wireless CCTV

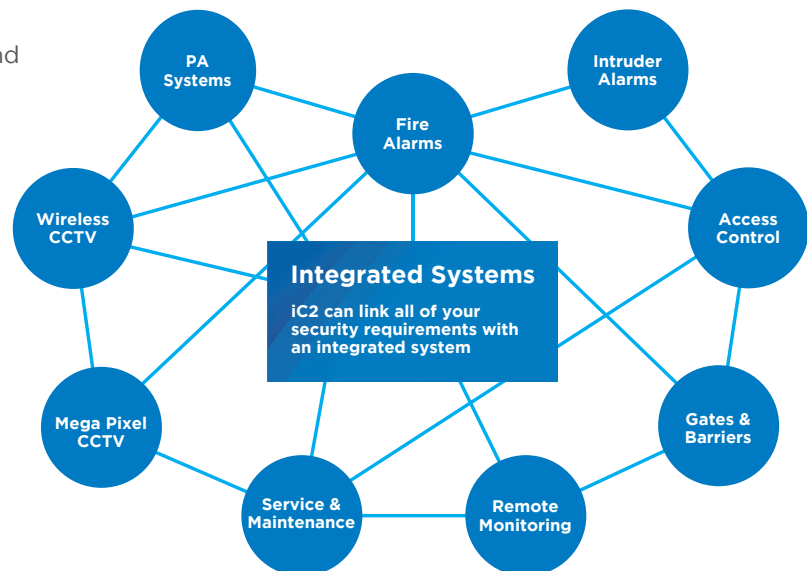

Wireless CCTV doesn't require underground ducts to carry cables which saves on time, costs and disruptions associated with cable installations

- **Quicker installs**
- **Less planning**
- **No civil works**

Remote Monitoring

Remote monitoring offers you peace of mind when your premises are unoccupied

- **Fewer manned guards resulting in cost savings**
- **Integration with a PA system allows warnings to be given before a crime has even been committed**
- **Suitable for off-site access control and building management**

Access Control

Keep your property safe by controlling who has access

- **Increased security**
- **Lower running costs**
- **Ease of administration**

Gates & Barriers

iC2 offers you reductions in cost, time-frame and disruption as your entire project is taken care of by a single supplier

- **Automate existing gates**
- **Rising curbs/security bollards**
- **Height restrictors/speed ramps**

PA Systems

PA systems are essential for your location if it requires announcements (both live and pre-recorded)

- **Broadcast speeches, messages or announcements**
- **Playback of pre-recorded music**
- **To interrupt suspicious behaviour**

Fire Alarms

A fire alarm will alert anyone in your premises that a fire has been detected

- **Fire alarms save lives**
- **Reduced rates on buildings insurance**
- **Save significant amounts of disruption and cost if the fire is promptly managed**

Intruder Alarms

Protect your property from unwanted visitors

- **An alarm will deter intruders**
- **Provides you with peace of mind**
- **Potential reduction in your insurance premium**

Service & Maintenance

Your security system is no use if it is not functioning

- **Preventative maintenance is crucial in keeping your security system compliant and effective. iC2 offer quarterly maintenance visits, carried out by highly skilled engineers, to ensure the effectiveness and prolonged durability of your system.**

CASE STUDY 1:

CHELSEA FC (STAMFORD BRIDGE)

iC2 have installed an Avigilon high-definition surveillance system at Stamford Bridge Stadium, home of Chelsea Football Club.

HD cameras easily met the stadium's image requirements, and were installed so as not to obscure spectators' views, enabling Chelsea's security team to monitor and play back images in close detail without any loss of quality or compression.

150 terabytes of storage and eight 4MP 30-inch monitors were installed in the new security control room. In total, the system now has 280 terabytes of storage and 12 HD megapixel monitors. The advanced management features and easy-to-use interface of Avigilon Control Center software ensured a seamless transition for the operators.

The Avigilon high-definition surveillance system installation consisted of sixteen Avigilon HD 16 MP cameras with Canon 75 – 200mm lenses, installed pitch-side. Capable of delivering 40 pixels per foot. The installation now consists of over 300 cameras estate wide that are all remotely viewed.

CASE STUDY 2:

DE BEERS

iC2 was appointed by De Beers' flagship store in Old Bond Street to encode the store's existing static and PTX cameras and upgrade the system onto Avigilon's lossless compression platform.

iC2 delivered a cutting edge CCTV system to De Beers, allowing the store to feel confident of its security and to easily monitor all activity on the premises.

“Obviously the quality of the cameras both live and playback provides incredible detail to us. We were also particularly impressed with the speed of the installation and the particular attention to detail regarding the aesthetics of the building.

iC2 continue to provide excellent after sales services and perfectly fulfil all our security requirements. We would not hesitate to recommend iC2 to any organisation looking for a first class CCTV system, with a first class after sales service.”

Scott Richardson, Security Manager, De Beers

CASE STUDY 3:

WARWICK CASTLE

Warwick castle appointed iC2 to install new security cameras across the grounds and within the castle to ensure estate wide monitoring.

The project was broken down into two phases, the first comprising 5 Avigilon Megapixel cameras within the 'heart' of the castle including, The Great Hall, Queen Anne's Bedroom, The Blue Boudoir, The Red Drawing Room and The Cedar Drawing Room.

The second phase saw iC2 install state of the art Avigilon Megapixel Cameras to monitor the perimeter of the castle covering distances of up to 1 kilometre and acting as a digital moat for the modern day.

iC2 delivered Warwick castle a CCTV system which utilises 20 terabytes of storage on an Avigilon Software Platform.

“To deliver the installation in such a timely and professional manner, in a very challenging environment was a credit to the iC2 team.”

Geoff Horwood, Operations Manager, Warwick Castle

CASE STUDY 4:

ACTON HIGH SCHOOL

Acton High School appointed iC2 to design and replace its security network and upgrade the existing IP software that the system was using to more efficient Avigilon products.

iC2 encoded over 100 cameras at Acton High School, providing the school with a sophisticated network that ensured playback replicated the live cameras, making identification and monitoring accurate and easy. We installed an additional 45 cameras to coincide with the new build, creating a safer and more secure site for the staff and pupils.

In addition, iC2 also installed Salto access control to the school's turnstiles and integrated them with the camera network, providing an easy to manage integrated security system for the school, which allowed even better monitoring of the premises.

“Their installation engineers were both professional, courteous, and cleaned up after themselves.

One of the best judges of a company is their after sales service, again they have been more than helpful, and we have stayed in contact ever since to the point I even feel part of their family.

I have no hesitation in endorsing iC2 CCTV & Security Specialists (UK) Ltd.”

Abd Al-Latif Whiting, Network Manager, Acton High School
