

# Advanced multimedia redaction to transform video evidence processes in UK Policing

Secure Redact is the optimum solution for advanced automated redaction. Easily integrated into your DEMS platform or deployed as a stand alone solution, it brings world-class automation together with specialist and intuitive user tools for review and editing of video for redaction. Secure Redact is proven to reduce video processing time, speed up operational efficiency and free up valuable time to focus on other critical projects.

## Key features:

- ✓ **Automatic** detection for redaction of faces, heads and/or license plates.
- ✓ **Intelligent tracking** for redaction of user-identified objects.
- ✓ Blur specific areas of the video.
- ✓ Selective **audio** redaction.
- ✓ Single sign-on support and connect to private cloud storage.

## Enterprise capabilities

- ✓ Large volume video processing.
- ✓ Multiple users across sites and teams for collaborative projects.
- ✓ Automated and secure bulk upload, redaction and download from/to your private cloud.
- ✓ Custom feature options, SSO and API integration, data deletion and additional file formats.
- ✓ Admin management capabilities, reporting, invoicing and support.

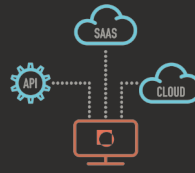

## Flexible deployment for each force's small-scale, tailored or enterprise needs

World-leading accuracy  
Over 99% of PII automatically identified for redaction.

Licensing is based on an annual fee of usage  
An annual fee secures a volume of video redaction hours, shareable across all teams.

Integrated into various DEMS and VMS platforms  
Accessible via SaaS, APIs or customer cloud (including your private Microsoft Azure tenant).

Significantly reduces manual work, costs and resources  
Information Access and Response Investigation Teams can fulfil all redaction needs within their constricted time-frames.

To redact 10 minutes of CCTV for a Right of Access request, it would take:

**8 HOURS**  
With video editing software

VS

**10 MINUTES**  
with Secure Redact

\*The scenario assumes a medium-busy CCTV scene + video editing carried out by a Security Manager for 8 hours a day using traditional video editing software

### Video Right of Access Requests

Equip Information Access teams with a reliable video redaction tool that easily blurs video within the allotted deadlines.

### Digital evidence presentation

Quickly redact all video evidence before sharing with the Crown Prosecution Service. Once approved, edit to unredact certain individuals, ready for court.

### Deliver trust and confidence

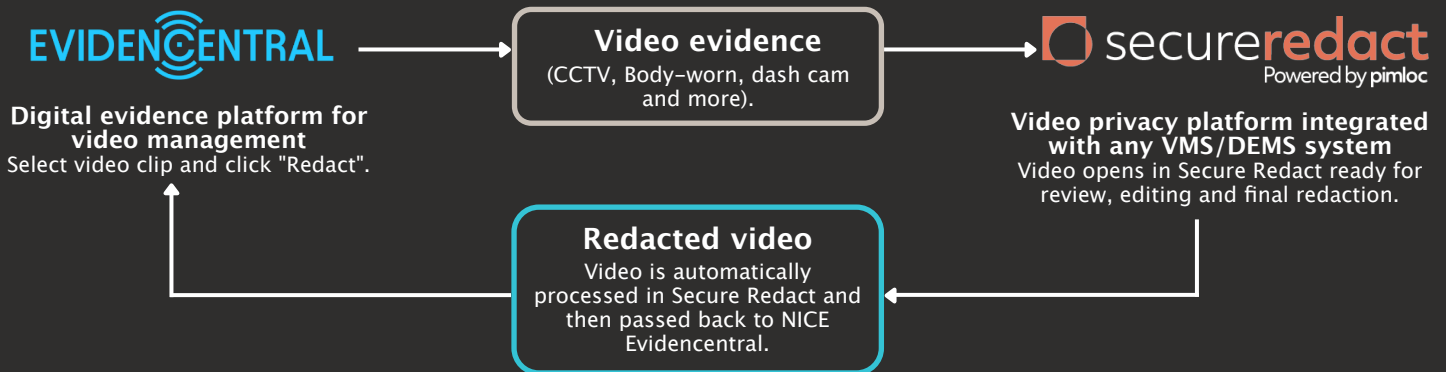

Be even more proactive around community engagement by responsibly showing redacted stop-and-search videos to the public.

## Integrate Secure Redact to advance your DEMS capabilities

Key DEMS and VMS platforms such as NICE Systems, Milestone Systems, Eagle Eye Networks and others have chosen to integrate Secure Redact into their platform to provide new capabilities or to augment any existing basic redaction capabilities.

Pimloc's Secure Redact can be deployed into any private Microsoft Azure tenant, with partnership support from Microsoft – to facilitate secure video data processing and speed up operational efficiency.

### Example integration: Secure Redact into NICE Evidencentral

Secure Redact is procured and purchased separately to your chosen DEMS platform. Contact us at [partner@pimloc.com](mailto:partner@pimloc.com) to discuss your requirements further.

## About Pimloc

Pimloc is providing the privacy layer for mass-scale video usage – for better security and transparency for all.

Pimloc's artificial intelligence technology enables private and public organisations to responsibly manage security video from CCTV, body worn and dash cameras by protecting and redacting any personal data, such as faces or identifying information. This allows companies to efficiently manage personal data in video at scale, enabling them to comply with legislation and helping maintain trust with customers and the public.
