

RiVR

The Classroom in a Box

RiVR Link is a comprehensive Virtual Reality training solution that provides a ground-breaking approach to immersive learning for instructors and their students. RiVR Link enables instructors to conduct and control a lesson in VR to 5, 10 or 15 synchronised headsets both locally or remotely.

Access to multiple training tools to aid immersive learning such as VR chalk, which allows you to annotate key learning points in your content, visible to all headsets.

Our Shooting Kit provides you with all the equipment you'll need to film your own 360° content and load it directly onto your RiVR Link kit.

Film It. Load It. Teach It.

Personalise your kit with a bespoke case, tailored to your organisation.

RiVR

investigate

RiVR Investigate offers a fresh, unparalleled approach to fire investigation training using state of the art technology and visual effects in Virtual Reality. Our unique photo-realistic scenarios immerses your trainees in a near-to-life fire and crime scene environment, which they are able to freely manipulate and investigate using realistic, interactive tools and equipment that would be used in the real world.

RiVR CSI

Crime Scene Investigation is a new Sandbox Solution available soon on stand alone VR. Students will have the ability to investigate a full photo-realistic crime scene environment, built exclusively for them by their trainer using a full set of investigative tools.
