

MobiMed Life

SAVING VITAL SECONDS

With over 30 years' experience in cardiology and in close collaboration with our users, Ortivus has developed MobiMed, the leading solution for patient monitoring and record keeping in prehospital care. MobiMed Life - a part of MobiMed, is a stand-alone defibrillation solution that can be tailored to the organisation's needs. With MobiMed, ambulance personnel can monitor and treat the patient out in the field, while patient data and vital parameters are shared in real time throughout the care chain.

A defibrillator is not always needed, but in some situations, it makes the difference between life and death. Ortivus offers different models of defibrillators as stand-alone units. Data from MobiMed Life are automatically transferred to MobiMed Monitor, ePR and Cloud.

Compact, robust and intuitive defibrillator

CPR assistance

360 Joule

MobiMed Connect, communication throughout the care chain

MOBIMED LIFE - HEART SAFE SOLUTIONS

Ortivus delivers modular, user-friendly and ergonomic solutions focused on quality and patient safety. MobiMed Life is designed for advanced monitoring and resuscitation. It is a modular solution that can be adapted to the organisation's needs. Together with MobiMed Monitor and MobiMed ePR, it constitutes a unique total solution for prehospital healthcare.

MobiMed Life - Supplemented when needed

MobiMed Life

A defibrillator is not always needed, but in some situations it makes the difference between life and death. Ortivus offers different models of defibrillators as stand-alone units. Data from MobiMed Life are automatically transferred to MobiMed Monitor, ePR and Cloud.

MobiMed ePR

The MobiMed ePR provides paramedics with a structured workflow and support that improves the clinical decision-making process. Data from MobiMed Monitor and other common monitoring solutions can be transferred automatically to the patient record, which reduces the administrative burden and focus can instead be placed on the patient.

MobiMed Monitor

With a total weight of 3 kg, the MobiMed Monitor can easily be carried out into the field. MobiMed Monitors and measures the patient's vital parameters such as ECG, blood pressure and SpO2.

MobiMed Cloud

For information sharing throughout the care chain, MobiMed Cloud supports on-prem or cloud hosting depending on the customers IT strategy.

MobiMed Go

For optimal ergonomics and safety, we have created MobiMed Go, a lightweight bag with smart functions and space for everything you need. With MobiMed Go your system is charged directly in the vehicle bracket.

CPR Assistance

Real-time CPR assistance using metronome, compression velocity rendering and compression depth.

Intuitive

Clear voice instructions and guiding icons via display.

Customisable

Voice messages, CPR settings, languages, defibrillation protocols, etc. can be customised via configuration tools.

Patient History

The defibrillator has a memory function for storing patient cases.

MobiMed Connect

Data transfer from the defibrillator to MobiMed Monitor and ePR.

360 - Joule

Energy levels up to 360 joules.

Self-tests

The defibrillator performs regular and automatic self-tests to ensure functionality and facilitate maintenance.

Dust / Water Resistance

IP55 - Created for tough conditions
