Hybrid Cloud Navigator.

ANS Think Bigger.

What are ANS navigators?

Navigators are engagements that provide you with the resources and information to be able to realise your long-term strategic vision and steer your digital transformation journey.

What is the
Hybrid Cloud Navigator?

Our Hybrid Cloud Navigator will help you overcome the complexities of migrating datacentre workloads to public cloud infrastructure, helping you to simplify your journey to public cloud. By understanding your current application landscape, we can help you define not only your future state architecture in cloud, but also your optimal transition roadmap.

Who is this suitable for?

This Navigator is ideal for organisations that have an appetite to move to the cloud with a limited budget or a desire for digital transformation of applications that are not appropriate for cloud. It's also suitable for organisations with existing on-premises estate with a mixture of old and new applications.

What outcomes can I expect?

01
Application landscape

You'll get an understanding of your datacentre workloads, including suitable 'cloud candidate' apps and an objective view of the 'migratable estate'.

02
Transition strategy

We'll review the output of the application assessment and provide a recommended transition approach for each application.
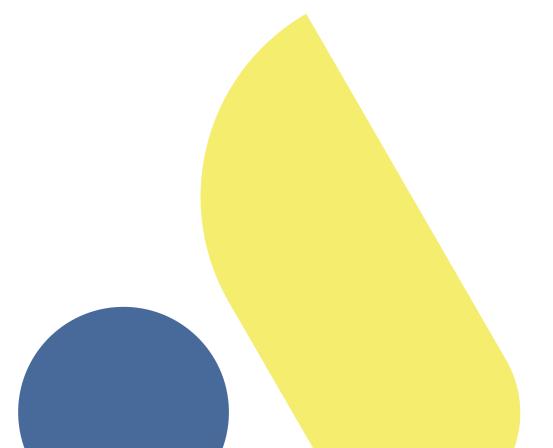

03
Target state architecture

You'll receive a 'future state' architecture design capable of hosting your production workloads.

04
Target operating model

We'll help define and recommend the most appropriate cloud operating model for you based on your organisations individual requirements.

05
Business case / TCO

You'll also get a full, board ready business case covering TCO, ROI and full benefits breakdown for your organisation.

What are the benefits of using an ANS navigator?

✓ **Rapid time to value**

It typically takes 4-6 weeks to complete this Navigator, and usually doesn't require more than 10 hours of your time spread over those weeks.

✓ **Board ready outputs**

We will provide you with board ready outputs, a strategy document, business base and presentation.

✓ **Insights and recommendations**

We will provide insights and recommendations on the health of your current IT environment.

✓ **Defined operating model**

Moving your data to the cloud is just the beginning. We'll work with you to establish your needs moving forwards, be that training, support or building out capability.
