

K&B UT2000 STRETCHER

Part of the stretcher range from Lyon Equipment

A lightweight 'Alpine Rescue' style aluminium alloy framed basket stretcher designed for technical rope rescue and helicopter extractions. The UT2000 is suitable in a range of environments including mountain, canyon, military and industrial settings.

The removable frame section can be used to aid carrying medical and rescue supplies through difficult terrain, combined with the comfortable backpack style harness enabling loads to be carried further.

Two halves can be quickly and securely coupled together to make the stretcher.
