

# ROPE RESCUE DUMMY

## Part of the rescue equipment range from Lyon Equipment

The Lyon ROPE RESCUE DUMMY is designed for rope rescue training manoeuvres. It has the mass, volume, and balance for realistic training in a variety of scenarios.

Fitted with aluminium alloy dorsal, sternal, and ventral attachment points and dedicated webbing loops for mounting a chest ascender, this cost-competitive dummy replaces live 'casualties' or expensive mannequins in training centres.

The Lyon ROPE RESCUE DUMMY is made in high-viz orange PVC material.

LRRD-E	LYON ROPE RESCUE DUMMY EMPTY*	1.8 kg	N/A

\* for export only

At Lyon Equipment, we design, manufacture and supply high quality and innovative, adventure, work at height and specialist rescue equipment - delivering expert advice on all our products and their applications

The Lyon ROPE RESCUE DUMMY has been designed with input from professional trainers and rescue specialists.

The dummy is shaped to represent a human torso and is weighted and balanced to react like a full human form. This sleek shape is easy to move around the training space and avoids the snag hazards and pinch points that limbed dummies can have.

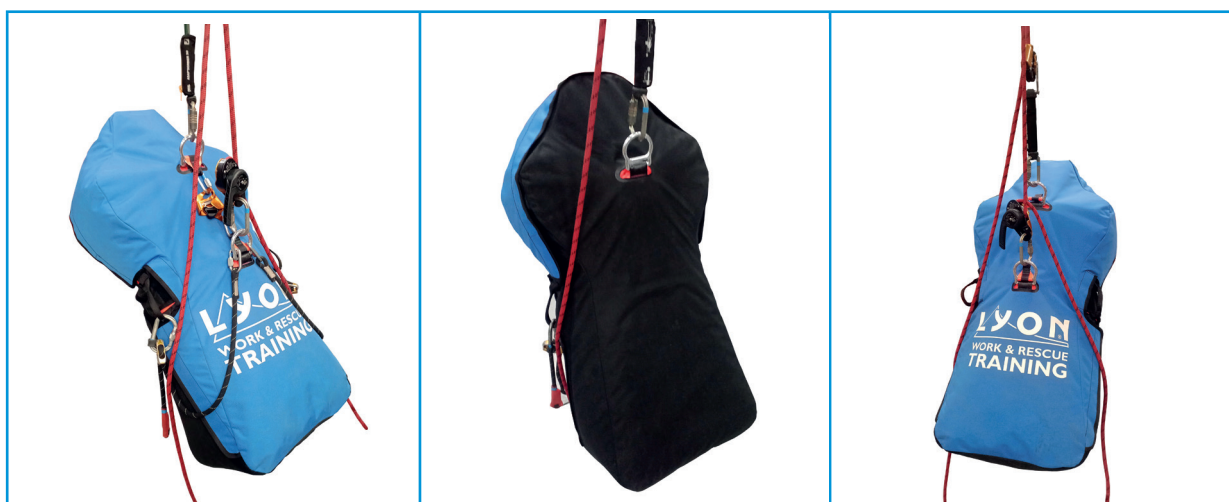

The smooth, simple form allows for easier observation of connections made by trainees during manoeuvres and reduces the risk of inappropriate connections being made.

For those training scenarios requiring a chest ascender, the Lyon ROPE RESCUE DUMMY has two webbing connection loops built in. These allow for connection of a wide range of ascenders using suitably sized quick links.

An optional hardwearing cover for added protection is available. The cover comes as standard in red, with options of different colours and cooperate logo.

### Product features:

- Robust PVC fabric body
- Sternal, Dorsal and Ventral attachment points
- Two combined side handles / gear loops
- Chest ascender mounting loops
- Easy wipe clean finish
- Realistic 70 kg mass
- High visibility orange colour
- Protected critical load bearing areas
- Hardwearing textile cover available
