

MobiMed FleetCtrl

SIMPLIFIES EVERYDAY LIFE FOR MEDICAL PROFESSIONALS

MobiMed FleetCtrl is a user-friendly software application specifically designed for personnel working in blue light services. This powerful tool greatly simplifies the daily workflows of employees, while also establishing standardised control points that contribute to heightened patient safety. Developed by our team of dedicated professionals with extensive experience in pre-hospital care, MobiMed FleetCtrl has been successfully utilized by ambulance staff for several years, solidifying its effectiveness and reliability in real-world scenarios.

MOBIMED FLEETCTRL

IMPORTANT INFORMATION - DIRECTLY IN THE APP

Gain control over unread vehicle notes and receive alerts for medicine log shortages. The system will also trigger alarms if the vehicle is nearing the inspection date, has been prohibited from operation, or if the vehicle coordinator has deemed it unfit for use.

FRONT END

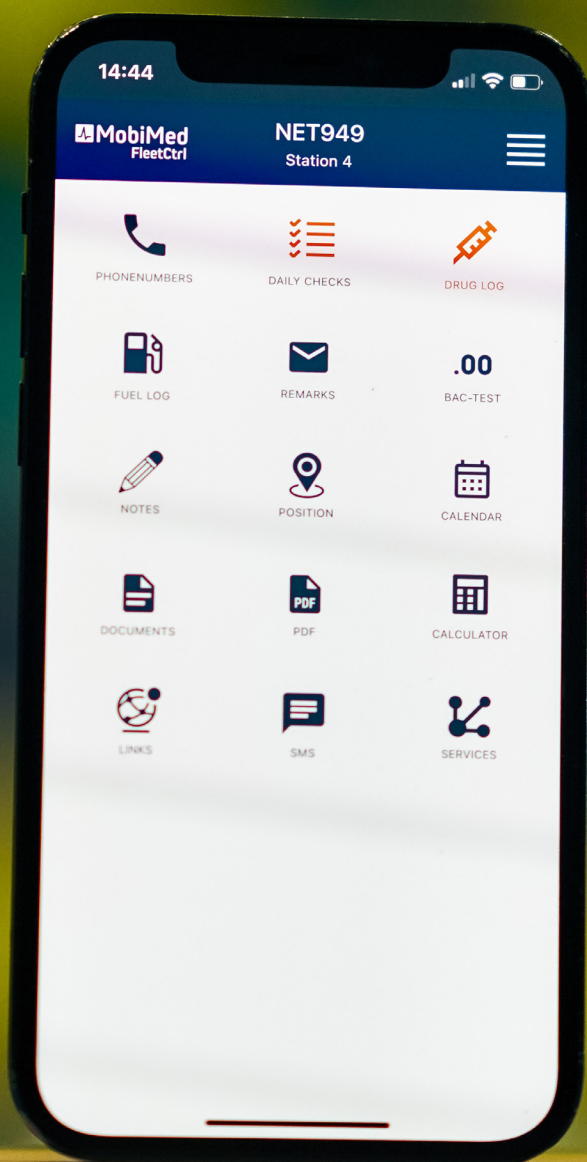

The app is compatible with all mobile phones, regardless of the operating system, ensuring seamless functionality. Updates occur continuously and instantaneously, keeping the app up-to-date at all times.

BACK END

The backend serves as the central control panel for managing the entire MobiMed FleetCtrl system. Any modifications or adjustments made in the app can be seamlessly implemented in the backend system, ensuring instant updates for users.

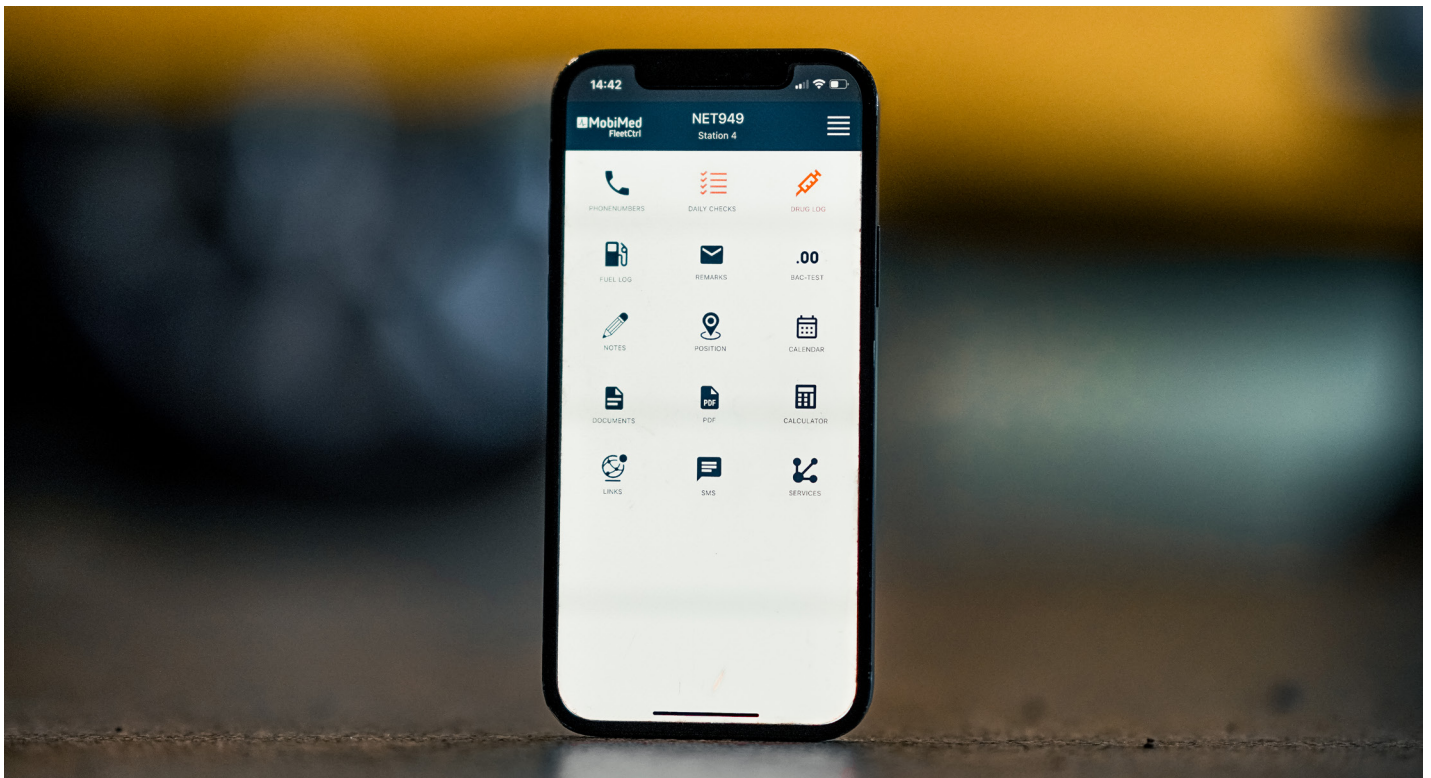

“When I was new as an ambulance paramedic, it was a great reassurance to know that everything I needed was available in the app.”

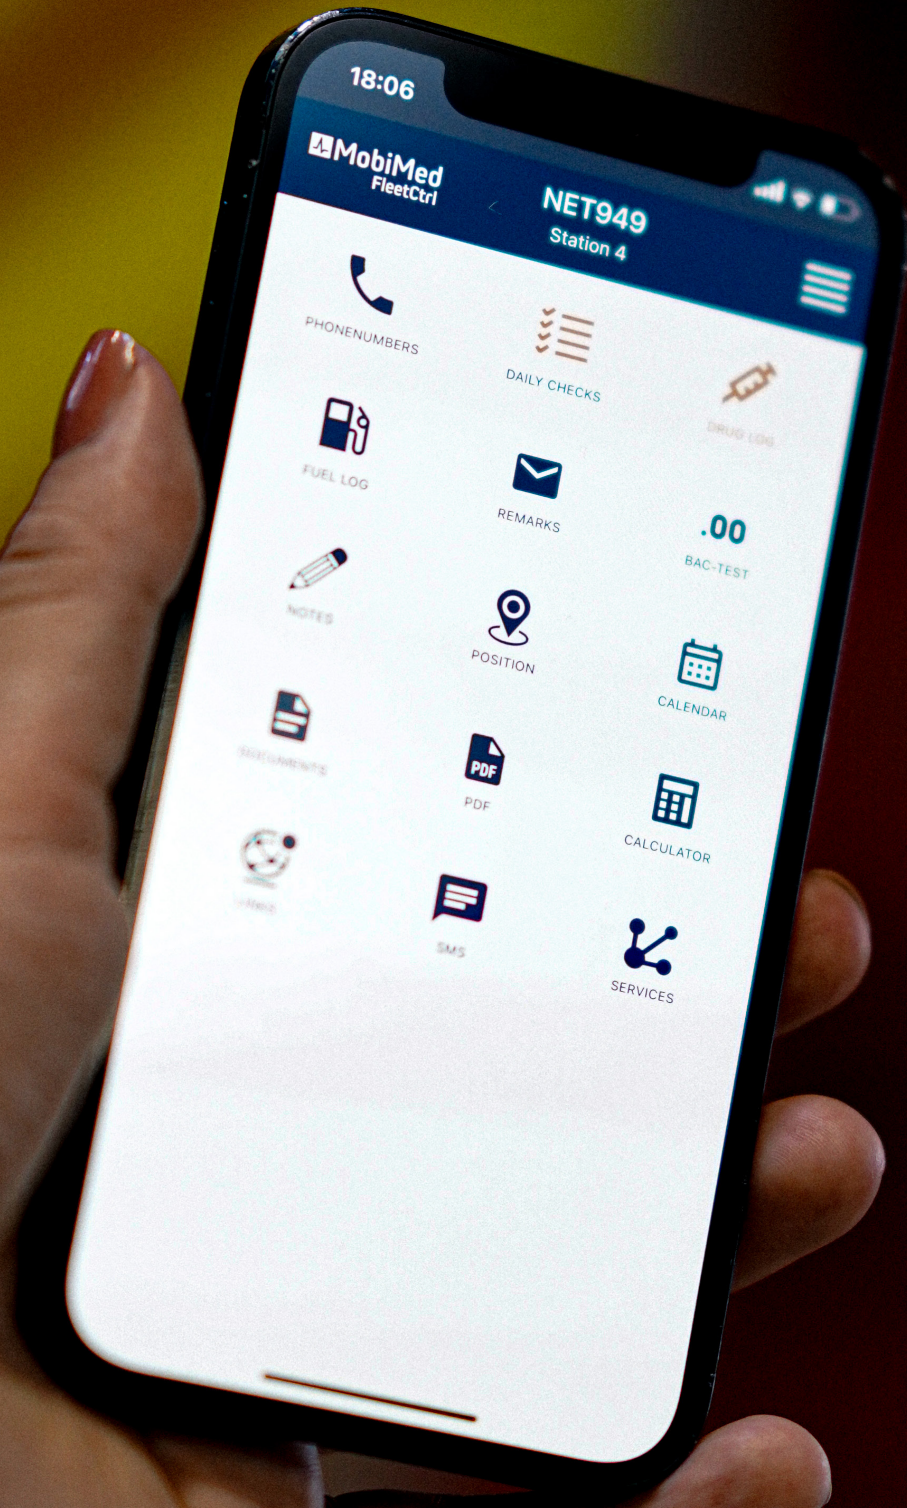

Helena Olsson
Paramedic, Region Jämtland Härjedalen

FULL CONTROL OVER YOUR VEHICLE FLEET

MobiMed FleetCtrl streamlines the daily operations for professionals in ambulance services, primary care, and emergency services. Through intelligent features, automated regular checks, and enhanced communication, work becomes more efficient, resulting in improved patient safety. With MobiMed FleetCtrl, you gain a comprehensive overview and full control of your vehicle fleet. The application promptly highlights unresolved issues, sends alerts for medication log shortages, and provides timely notifications as vehicles approach inspection dates, among other valuable information.

Telephone Number

Centralise the management of telephone numbers that are vital for seamless operational efficiency.

Checks

Document regular equipment and vehicle inspections accurately, recording fuel consumption, controlled substances, and breathalyzer tests.

Document

Ensure your employees have constant access to the most up-to-date versions of necessary documents and guidelines. New documents can be easily uploaded or created directly within the application.

Daily Management

Stay updated on traffic disruptions and weather warnings. The information can automatically be fetched from transport and weather agencies.

Communication

Effortlessly send comments to the relevant individuals and receive prompt responses within the application. Create SMS groups effortlessly to send text messages to employees or vehicles.

Offline

All crucial features, including documents, PDFs, and phone numbers, remain readily available, even in the absence of internet connectivity on your phone.

The Transport Agency

Receive notifications for vehicles nearing inspection dates. Responsible individuals will be promptly alerted via SMS in case of any vehicle having driving restrictions.

Calendar

Streamline the vehicle booking process for various events with ease. The vehicles will promptly receive notifications within the app, empowering the staff to efficiently carry out the event, such as conveniently dropping off the car at the workshop.

SAVING VITAL SECONDS

With over 30 years of expertise in cardiology and in close collaboration with users, Ortivus has developed MobiMed, the foremost solution for patient monitoring and medical records in prehospital care. MobiMed enables healthcare professionals to monitor, analyze, and share vital patient parameters in real-time during field operations. By streamlining diagnosis, enhancing patient safety, and saving time in critical situations, MobiMed provides a reliable and time-efficient solution. The system's modular design and flexibility are pivotal in supporting the diverse responsibilities of ambulance personnel.

Ortivus provides MobiMed FleetCtrl, specifically designed for personnel in emergency services. The application offers comprehensive control over the entire vehicle fleet. Developed by experienced ambulance healthcare professionals, it enhances patient safety and simplifies the daily tasks for employees.
