Hardcat
Asset and Evidence Management

Track all police areas of responsibility

Tracking assets, equipment, evidence and property to provide modern police forces with intelligent, information management and reporting capabilities. So that you can maximise efficiencies, effectively fight crime and provide a greater level of service and safety to the community.

Exhibit, Evidence and Property Tracking and Management

- Easy Capture and audit of evidence and central storage of information.
- Improve the effectiveness of evidence and forensic process "touch points".
- Average time for check in/out process in log books is shortened to seconds.
- Generation of chain of custody reports shortened to 30 seconds.
- Full Audit trail from capture through to disposal
- Information in relation to analysis and results is immediately available to the appropriate officers.
- Laboratory forensic analysis request backlogs are more effectively monitored and action taken.
- Automated workflow and routing of jobs to the appropriate service provider

Armoury and Ballistics Control

- Manage Issue and return requirements for weapons and equipment.
- Any type of equipment such as batons, radios, tasers, cameras, mace sprays and firearms.
- Issue and return in a fraction of the time it takes to do manually.
- Save valuable time and increase accuracy.
- Audit and tracking of weapons and equipment using either barcodes or RFID tags.

Police Clients

- Victoria Police
- New South Wales Police
- South Australian Police
- Queensland Police
- Western Australian Police
- Middlesex Police
- Dallas Police
- Las Vegas Police
- Wiltshire Constabulary

Integration to Existing Systems

- Command Systems
- Human Resources
- Computer Aided Dispatch
- LIMS Systems
- ERP and Warehouse systems

Benefits

- Increased operational efficiency
- Complete visibility and transparency of assets/equipment
- Mobile audit tools and audit trail for compliance
- Increased productivity by reducing administrative overheads, allowing officers to spend more time in the field
- Complete life cycle management
- Better and more controlled chain of custody
- Automated reporting and brief construction
- Increased compliance
- Reduced time to trial and a higher yield of conviction.
