innaXYS

Strengthen digital evidence management processes and foster collaboration between teams through a single platform for all assets, purpose-built for UK police forces and investigative bodies.

A force's need for a robust digital evidence management solution has never been greater. Innaxys DEMS plays the critical role of consolidating digital evidential material within a fully auditable centralised cloud solution, following industry standards for access control and compliant with GDPR and MoPI regulations.

100% designed and developed in England with configuration options and tailorable workflows to match your exact requirements - there has never been a better time to level up your DEMS.

REVIEW, ANALYSE, INVESTIGATE, PREPARE AND SHARE

- Mandatory grouping of assets by case
- Review and assess to categorise evidence efficiently
- Multiple viewing options (mapping, timeline, network, multiplex)
- Public upload portal for crowdsourcing campaigns
- Send targeted requests for evidence from colleagues or members of the public
- Video analytics tools including CCTV object detection
- Editing suites (redact, annotate, bookmark, transcribe)
- Secure sharing of assets to third parties, including CPS

SECURE ASSET STORAGE AND MANAGEMENT

- Upload from anywhere (manual, automated, remotely)
- Ingest a full range of file types
- Mandatory metadata function
- Evidential retention - master assets held as original

ENDLESS FUNCTIONALITIES

- Comprehensive reporting suite
- Role-Based Access Control
- Open APIs for seamless integration with RMS and other policing asset repositories
