

RAPID  **GB**

CONVEYOR

RAPID^{GB} **CONVEYOR**

Overview

The Rapid patient conveyor for decon procedures and patient handling requires minimal personnel to establish quite literally in seconds. The patient transfer board is designed to work with the conveyor to allow efficient and effective treatment of nonambulatory patients. The new transfer board design folds for storage and transportation and locks into a sturdy platform when in use. Focusing on rapid deployment, build quality, portability and usability, RapidGB is confident its range of products will work smoothly with your service's existing resilience infrastructure.

- Designed specifically to enable rapid responders to effect NBC decontamination processes within minutes.
