

Mix and match any  
SMART capability to  
create your perfect  
all-in-one locker

## THE D-TECH SMART RANGE

# Create your own perfect SMART locker

Are you looking for IT device charging and management, asset tracking, personal storage or pick up lockers? D-Tech's all-in-one SMART range delivers secure, multi-functional and, most of all, smart locker solutions for every requirement.

## PACKED WITH MARKET-LEADING FEATURES

No matter your requirements, the SMART range will meet them.

- Superior touchscreen interface, including 1000+ nit option for use in direct sunlight
- Steel chassis, intelligent access and real-time audit trail create a secure storage environment
- Weather-resistant, anti-corrosive steel lockers enable external installation of applicable SMART locker configurations for a true 24/7 solution
- Simple to operate for authorised personnel and service users
- Fully cloud-based backend enables simple, real-time remote management including event processing for auditing purposes

?

**I need more than one capability – can I combine them in a single smart locker?**

Yes! We design, develop and build all of our SMART range solutions in-house so you can combine exactly the capabilities you require into a bespoke smart locker solution.

## HOW SMART LOCKERS BENEFIT YOUR ORGANISATION

- Generates significant time, administration and long-term cost savings
- Flexible usage across all sectors
- Secure storage and audit trail increases accountability and reduces lost and stolen assets
- D-Tech's SMART range is designed in line with DDA specifications to ensure an accessible interaction for all
- Seamlessly integrates with your existing Database Management Software via Active Directory
- Includes a lifetime warranty on all D-Tech parts and D-Tech's trademark exceptional aftercare – in the last year, 98% of our customers said we were Awesome!

?

**How do D-Tech SMART lockers work?**

Thanks to a network of connected, secure SMART lockers, controlled remotely via locker management software, you can give patrons secure yet simple access to any locker within your estate.

Each block in the SMART range has unique capabilities to help you build your perfect SMART locker.

3

### smarthold

**Enable intelligent, self-service capability for smart locker solutions**

A fully integrated smart storage, collection and drop-off locker, SMART Hold can be positioned in either internal or external conditions for a secure, 24/7 self-service pick up point and asset tracking solution.

5

### smartcharge

**Create a secure, centralised IT asset management environment**

SMART Charge lockers enable safe storage, charging and dispensing plus asset management, usage tracking and inventory monitoring of valuable IT equipment.

smarthold

# Intelligent & secure self-service locker solutions

SMART Hold combines steel with advanced software to deliver an intelligent, stylish and, above all, secure smart locker solution.

A fully integrated smart storage, collection and drop-off solution, SMART Hold can be positioned in either internal or external conditions – thanks to its weather-resistant and robust heavy gauge steel chassis – to deliver a secure, 24/7 self-service collection point. Plus, thanks to the very latest in access technology, you can be confident that only authorised users will be able to gain access to drop-off or collect from their desired locker.

Enabling the flexibility of dynamic locker storage can dramatically reduce storage requirements, optimising space within your organisation. A future-proof asset management solution, SMART lockers deliver a secure, hassle-free solution to the storage and access requirements of every sector.

## PACKED WITH MARKET-LEADING FEATURES

No matter your requirements, SMART Hold lockers will meet them.

- Intuitive user operation via a superior touchscreen interface, including 1000+ nit option for external installations – enabling use in any lighting conditions including direct sunlight
- Available as an external solution - including weather-resistant, anti-corrosive steel lockers - to enable a true 24/7 secure kiosk
- Variable locker sizes available to facilitate the secure and simple storage and collection of a wide range of valuable items
- Robust chassis, intelligent access and real-time audit trail create a secure storage environment
  - Heavy gauge steel chassis is seam welded for maximum strength and durability
  - Locker doors are designed with minimal gap for additional security and are secured by extremely heavy duty locks boasting a tensile strength exceeding 300kg
  - Intelligent access options limits access to only authorised users
- Fully cloud-based backend enables simple, real-time remote management including event processing for auditing purposes
- Integrates with your existing Database Management Software via Active Directory
- Intuitive operation makes SMART Hold easy-to-use for staff and service users
- Configurable user journey

## ACCESSIBILITY

At D-Tech, we believe that accessibility and inclusivity should be placed at the centre of all present and future technology solutions. With this in mind, the SMART range includes many accessibility features to ensure that it is always an inclusive solution.

- Adjustable font size
- High contrast mode
- Dyslexia-friendly font mode
- Audio guide speech
- Users can request an accessible locker at DDA specified height
- Any accessibility settings enabled by individual users are remembered (locally) for future interactions

## CUSTOMISE YOUR SMART HOLD LOCKER:

- Available in a wide range of colours and finishes including our fully customisable wrapping service and LED backlighting
- Wide range of intelligent access options includes ID card (inc. RFID and Smart Card), Barcode scan, Mifare and more
- Available from 9 SMART locker bays up to 100+ depending on your requirements – our biggest installation to date boasts 255 lockers!
- Modular, multi-bay locker solution allows for the simple addition of new lockers of any SMART capability at a later date

Mix and match any SMART capability to create your perfect all-in-one SMART locker

## DIMENSIONS

**Main terminal unit**  
inc. up to 9 SMART lockers + superior touchscreen user interface:

H 1900mm x W 520mm x D 450mm

**Non-terminal tower unit**  
inc. up to 15 SMART lockers:

H 1900mm x W 520mm x D 450mm

**Internal size of individual SMART lockers** (available in a wide range of configurations to suit your requirements):

**Single locker:**  
H 120mm x W 440mm x D 420mm

**Double locker:**  
H 240mm x W 440mm x D 420mm

**Triple locker:**  
H 360mm x W 440mm x D 420mm

**Weight:** approximately 120kg per tower

## OPERATING SOFTWARE

Available with Windows 10 or Windows 11

## INSTALLATION REQUIREMENTS

**POWER:** Dedicated socket outlet required

## DATA

**Data transfer solution:**  
One data point per bay

**Non-data transfer solution:**  
One network point per solution

# Intelligent, secure storage, charging and inventory management for IT hardware

Compatible with all major models of laptops, tablets, notebooks and other devices.

SMART Charge delivers an intelligent and secure device loaning solution – assuming the responsibility for not only the safe storage, charging and dispensing, but also the management, usage tracking and inventory monitoring of valuable IT equipment.

Thanks to its robust, heavy gauge steel chassis and wide range of intelligent access options, SMART Charge lockers provide a secure, centralised location to entrust with valuable IT hardware – ensuring only authorised users can gain access to high-value IT equipment.

## PACKED WITH MARKET-LEADING FEATURES

No matter your requirements, SMART Charge will meet them.

- Intuitive user operation via a superior touchscreen interface
