THE D-TECH SMART RANGE

Create your own perfect SMART locker

Are you looking for device charging lockers, media lending, or self-service capabilities? D-tech's all-in-one SMART range delivers secure, multi-functional and, most of all, smart locker solutions for every requirement.

PACKED WITH MARKET-LEADING FEATURES

No matter your requirements, the SMART range will meet them.

- Superior touchscreen interface, including 1000+ nit option for use in direct sunlight
- Steel chassis, intelligent access and real-time audit trail create a secure storage environment
- Weather-resistant, anti-corrosive steel lockers enable external installation of applicable SMART locker configurations for a true 24/7 solution
- Simple to operate for authorised personnel and service users
- Fully cloud-based backend enables simple, real-time remote management including event processing for auditing purposes

?

I need more than one capability – can I combine them in a single smart locker?

Yes! We design, develop and build each of our SMART blocks in-house so you can combine exactly the capabilities you need for a single, bespoke – and cost-effective – smart locker solution.

HOW SMART LOCKERS BENEFIT YOUR ORGANISATION

- Generates huge time savings on locker administration
- Flexible usage across all sectors
- FOC lending as standard. Plus multiple payment functionalities available
- Integrates with your existing Database Management Software via Active Directory
Libraries only: Integrates with your existing LMS/ILS
- Includes a lifetime warranty on all D-tech parts and D-Tech's trademark exceptional aftercare – in 2022, 98% of our customers said we were Awesome!

?

How do D-Tech SMART lockers work?

Thanks to a network of connected, secure SMART lockers, controlled remotely via locker management software, you can give authorised users secure yet simple access to any locker within your estate.

Each block in the SMART range has unique capabilities to help you build your perfect SMART locker.

Pick Up and Drop Off Lockers with SMART Holding

Enable intelligent, self-service locker solutions

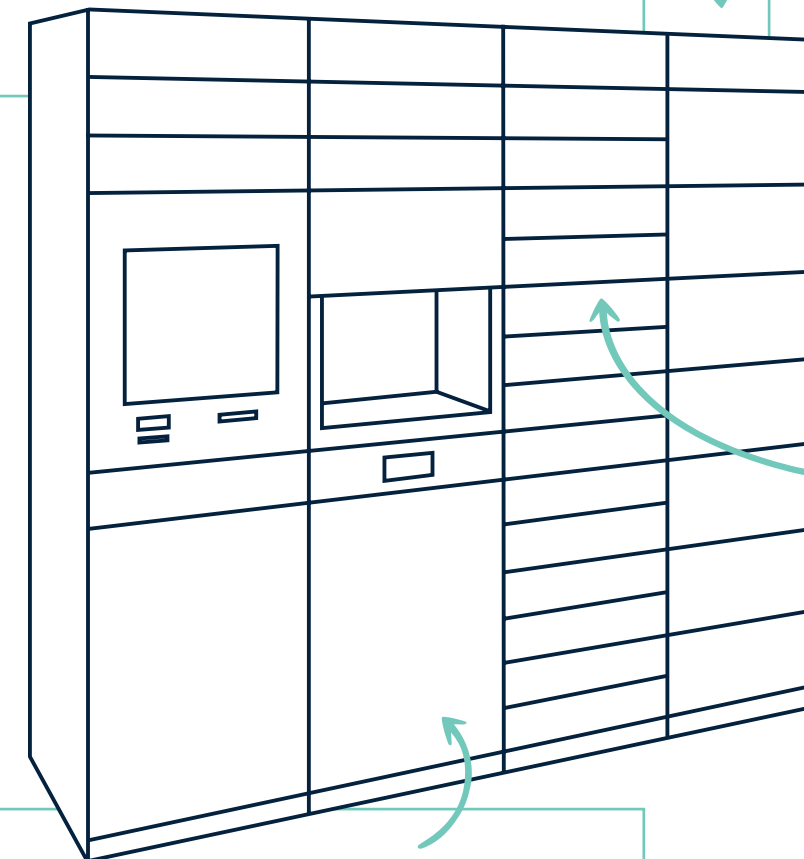

A fully integrated smart storage, collection and drop-off solution, SMART lockers can be positioned in either internal or external conditions for a secure, 24/7 self-service drop off or collection point.

IT Asset Management with SMART Charging

Create a secure IT asset management environment

SMART lockers enable safe storage, charging and dispensing plus management, usage tracking and inventory monitoring of valuable IT equipment.

- Compatible with all major models of laptops, tablets, notebooks and other devices
- SMART USB-C connections are configured to charge 5, 9, 15 or 20V without reconfiguration or new power units
- A range of safe charging options, including BYOD charging capability, with LED light to indicate status

Lend anything, anywhere with SMART Lending

Lend any item to authorised users, any time or anywhere!

The ideal solution to facilitate your intelligent, secure and smart library of things

CUSTOMISE YOUR SMART LOCKER

- Range of finishes includes our fully customisable wrapping service and LED backlighting
- Multiple locker sizes
- 9 to 100+ bays
- Multiple user ID access options inc. Barcode, Mifare & Magstripe reader
- Modular, multi-bay locker solution allows for the simple addition of new lockers of any SMART capability at a later date
