

Realtime Travel Risk Alerts

Empower travellers with critical risk intelligence 24/7/365. Behind every travel risk alert is expertly vetted intelligence. Our analysts monitor global data to track new and anticipated incidents, ongoing emergencies, and travel disruptions. We give travellers the information they need during their trip to adapt to evolving world events.

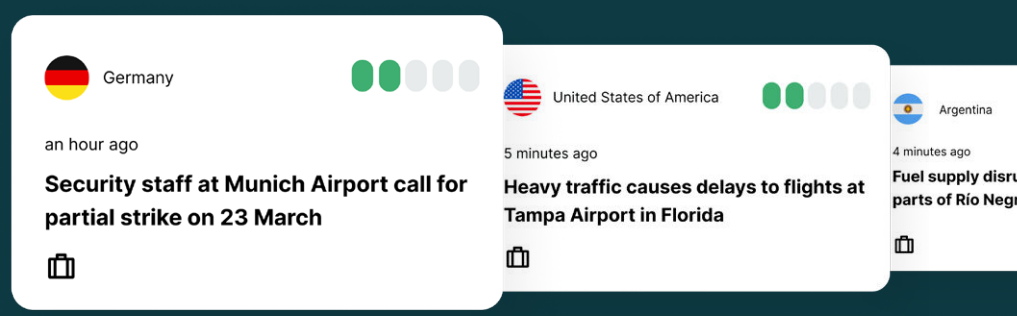

WorldInsights™ – Travel risk data for every step of the journey

Incorporate travel data into your website, platform or app via seamless API integration or the Riskline portal.

Each alert includes risk level, incident description and human-verified specific advice. Categories covered:

- Travel safety and disruptions
- Demonstrations and unrest
- Natural and environmental
- Conflict and terrorism
- Crime and corruption
- Health and medical

Keep travellers informed on their trip

Precise location information
Learn how many locations are affected by a breaking event, locations coordinates, and the radius of the affected areas.

Route disruption details
Know how journeys will be impacted with realtime information on affected airports, airlines, and travel routes.

Human verified data and advice
Our expert analysts use our innovative tech to monitor over 100,000 open sources, personally verifying it before pushing it live.

Empower travellers on-site with smart travel risk alerts.
