# Riskline

# Travel Search – Travel requirements API and Widget

By consolidating essential travel information in one location, travellers can conveniently plan and book their trips without having to navigate away from your platform. This comprehensive resource includes vital details such as visa requirements, health guidelines, necessary documents, upcoming events, and potential disruptions.

Our user-friendly plug-and-play API and embeddable widget offer daily updates of entry and travel safety information, carefully selected by our team of expert analysts.

Realtime Alerts

Seamlessly integrate data, increase user satisfaction and attract more travellers to your platform.

Key travel planning data

With a dynamic trip score, entry requirements, safety & possible disruption data, your platform will become a one-stop-shop for booking and managing travel.

Tech compatibility

The API integrates with your platform so you can deliver travel data within your unique user flow. Increase customer trust by providing up-to-date information.

User-friendly interaction

Our interactive map widget can be embedded on your platform with just a few lines of Javascript. Users can explore travel data around the world and plan their trip. Riskline maintains it so you don't have to.

Personalised advice

When users enter details about their trip and nationality, they receive personalised guidance. Our tools also include safety information specific to female and LGBTQ+ travellers.
