Riskline API — JSON

```
{
  "advisories": {
    "id": "35200",
    "title": "Ongoing measles outbreaks",
    "risk_level": {
      "id": "4",
      "name": "High",
    }
}
```

India

Insurgency in Assam, Manipur, Arunachal Pradesh, Nagaland, Meghalaya and Tripura states

All travel safety and destination risk assessment data is available to you via our well-structured API.

Besides the comprehensive API, you can utilise all the data through the Riskline portal.

Tech compatibility and data filtering

Leverage Riskline destination data in any depth and length that you need. Filter out specific categories or use all the information available via seamless API integration.

In-depth risk categories

Provide data for risk categories including political stability, conflict, crime, unrest, terrorism, nature, medical, local transport, and more.

Traveller-specific guidance

Understand risks specific to female and LGBTQ+ travellers.

Discover comprehensive destination data for travel confidence.
