GREEN ENGAGE

After opening our doors in 1953, InterContinental Madrid has always committed to a socially responsible approach in order to protect the environment in which our business operates.

We use the IHG Green Engage system, an innovative online environmental sustainability system that gives our hotel the means to measure and manage our impact on the environment. We can choose from over 200 'Green Solutions' that are designed to help us reduce our energy, water and waste, and improve our impact on the environment.

Moreover, our hotel accomplish Green Globe certification committed to operating to the highest level of sustainability, managing the use of energy and water as well as promoting reuse and recycling of materials and investing in protecting the culture and heritage of their host destination.
