Workflow

One Platform, Infinite Flexibility

Change Is Fast And Furious. Has Your Automation Kept Up?

- Shortage of experienced personnel
- Rapid fluctuation in travel demand patterns
- Increased service demands due to schedule changes, NDC and content fragmentation
- Traveler expectations for personalization and support
- Dropping revenue per transaction and increased operating expense

> " Companies save on average $600 in T&E per year for each employee through automation.

The Solution

- Travel automation tailored to your exact needs
- Supplement only where needed or implement the full stack
- Bookings from multiple sources and formats are standardized, QC'd and enriched with data like accounting codes or traveler information
- Choose from our extensive rules library or have us code for you

- Automate any workflow, from QC to ticketing, unused tickets, schedule changes, and travel policy management
- Set future actions like updating records for duty of care providers

Features

Infinite Configuration

One Platform Built Around You

- Sync records from multiple sources, including GDS, Aggregators, and direct connects
- Multiple formats from traditional EDIFACT to NDC
- Use your record structure or our universal format
- Ticketing status report
- Fare and seat checker
- Exchanges

Capabilities:

- Quality Control
- Ticketing
- Travel policy management
- Schedule changes
- Ticketing and itinerary delivery
- Virtual card integration
- Air commission reconciliation
- Unused ticket management
