

Empower Your Business with Connectivity

Why eSIM?

100% Digital

Improved Security and Quality

Flexibility and Scalability

Streamlined Management

Sustainability

ZIM Connections

Connected Everywhere at All Times

Problems

High Roaming Costs - Businesses spend \$25 per day/employee on roaming; customers spend \$18 per day on roaming.

Complexity in Managing Multiple SIMs - Managing several SIM cards for different countries is inconvenient for travellers.

Connectivity Issues - Ensuring reliable, high-quality connectivity is vital for business operations while on the move.

Set-up Times - Traditional SIM cards often require time-consuming set-ups and activations.

Customisation Needs - Diverse businesses have unique connectivity requirements.

Solutions

1. Affiliation

Clients can access ZIM directly from the partners' website. We generate personalised promotion codes and provide an affiliate dashboard to track sales and commissions.

2. Integration and White Label

A single API integration covers 190 destinations, enabling clients to access eSIM plans on the partner's platform. We offer fully customisable white-label solutions.

3. B2B

Employers can efficiently manage and allocate eSIM plans for employees via a dashboard, monitor expenses, and access wholesale eSIM plans.
