Return to Travel Dashboards

Your essential return to travel reporting

Benefits

- **Increase line of sight** through easy to use, on-demand dashboards.

- **Aids decision-making.** The Return to Travel Dashboards help you assess the risks to your travelling employees.

- **Near real time visibility to cases** relating to trips booked by your employees.

- **Helps fulfill stewardship of your employees.** The dashboards provide the ability to document the assistance your employees require.

- **Minimize the impact of travel disruptions.** Knowing and taking action on information before your employees travel and whilst on-trip, can enhance employee well-being and lower stress.

Return to travel planning

As business travel re-emerges, the COVID-19 pandemic is forcing organizations to re-think the way they manage the health and safety of their employees.

Your employees are your responsibility, so safeguarding their welfare must be a top priority of your managed travel program. If you don't plan for their safety, security and medical needs, the financial and employee well-being implications could be exorbitant.

The Return to Travel Dashboards help you meet your stewardship obligations to care for your employees, manage risk for your organization and reduce associated costs.

Get visibility across your organization

The easy to use dashboards provide up-to-date COVID risk and travel restrictions information from multiple sources in one convenient location.

In addition to globally consolidated CWT booked travel data (updated near real-time), the dashboards incorporate data from external sources.

Management of your unused and refundable tickets has never been easier. Quickly identify how many unused tickets are available, have been exchanged, refunded, expired or are about to expire, the value of those tickets and to whom they belong via the three dedicated unused ticket dashboards.

Key features

- **Quick reporting.** Know where your travelers are booked and travelling to at any given moment and the associated risks.

- **Improved visibility.** Compare booked travel data against risk and restriction information, including trends and government responses.

- **Empowerment.** Help avoid unsafe, unhealthy and unproductive situations with informed, data driven decisions.

- **Easy access.** Available via AnalytIQs*.

- **Global availability.** Gives you a consistent solution across your organization's geographic footprint.
