

Carbon Offsetting FOR MEETINGS & EVENTS

TRAVEL
WITH PURPOSE

Using the Hilton's LightStay corporate responsibility management system, Hilton provides a detailed estimate of the carbon emissions associated with a specific meeting or event. **Carbon offsets can be used to mitigate carbon emissions, such as those associated with meeting and events travel.**

Hilton, in partnership with South Pole, can then provide clients with carbon neutral meetings by investing in high quality carbon reduction projects that are aligned with the United Nations' Sustainable Development Goals and Hilton's 2030 Goals, which are to cut our environmental footprint in half and double our social impact by 2030.

CORPORATE RESPONSIBILITY

Since 2009, Hilton has used LightStay, our award winning corporate responsibility management platform to measure and manage our environmental and social impact across our global portfolio of hotels. Every one of Hilton's properties is required to track its corporate responsibility performance against prior years.

MEETING IMPACT CALCULATOR

Using the information within the LightStay platform, the Meeting Impact Calculator takes a property's consumption data to create a bespoke report that shows the estimated carbon, energy, water and waste that will be produced from your meeting or event.

CARBON CREDITS

Based on your meeting's impact, Hilton will offset the CO₂ emissions associated with your event by procuring carbon offset credit from the South Pole Group.

YOUR EVENT, CARBON NEUTRAL, AT NO COST TO YOU
