

# The next generation in short-term immigration compliance

A Fragomen Technologies Company

- Tech-enabled solutions for business travelers and their immigration needs
- Formed by experienced professionals from the business visa and immigration industry
- Global footprint and wing-to-wing immigration solution in conjunction with Fragomen

## Services

### Short-Term Immigration Compliance

- Pre-trip compliance assessments
- On-trip monitoring
- Real-time alerts
- Fully customizable reporting

### Business Visas

- Web portal and app
- Online ordering
- Price transparency
- Dedicated order contact
- Best-in-class customer service

### Posted Worker Notifications

- Online solution based on world-leading rules database
- Auto submission
- Reminders to upload recurring documents

## Key Features

### Traveler Profile

- Fundamental to Nomadic service delivery
- Secure portal containing all immigration-related docs and info
- Can be created at any time, including via data feed from client systems
- Learns from previous applications and does not repeat requests for information

### Pre-trip Compliance Assessment

- Unique for each traveler
- Based on the world's largest immigration law database
- Can incorporate your company policy for sensible business outcomes
- Assessment results page links to online order form to immediately order Nomadic services

### GPS Functionality

- Available depending on client preference
- Only monitors the traveler's current immigration jurisdiction
- Allows for visa/permit usage monitoring and real-time travel alerts
- Can reconcile with profile and tax provider post-trip

### Reporting

- All fields in system reportable for detailed analytics
- Client-generated reporting via PowerBI, so reports are fully customizable to see what you need to see
- Permission levels can limit access to certain business units or teams

### Automation

- Robotic Process Automation used to complete forms and file online applications (including Posted Workers)
- Accelerates filing process
- Reduces risk of transcription errors

### Integration

- Robust API layer
- Integration with client internal systems, travel management companies, expense providers, immigration law firms and tax providers
