

SUSTAINABILITY TOOLKIT

Transparent, Affordable, Impactful

TAG

This toolkit is designed to help you understand, reduce and control carbon emissions.

Environmental sustainability is key to a better world and balancing travel with this is a delicate task. We understand the importance of capturing carbon emissions data and accurately reporting on these to enable better travel decisions. We believe it is critical to have a partner who can analyse this data and provide strategic advice on best practices to help improve your travel programme and to manage carbon emissions in line with your company goals.

**The reality is that travel programmes can thrive with sustainability measures in place.
Follow these 3 easy steps to launch your sustainable travel initiative:**

1. Understand

Benchmark your CO2 emissions through reporting & raise awareness for sustainable travel

2. Reduce

Get buy-in from leadership through best-in-class CO2e insights to help you reduce your emissions

3. Offset

Make changes to drive down emissions & invest in carbon mitigation or compensation projects to make your travel carbon neutral

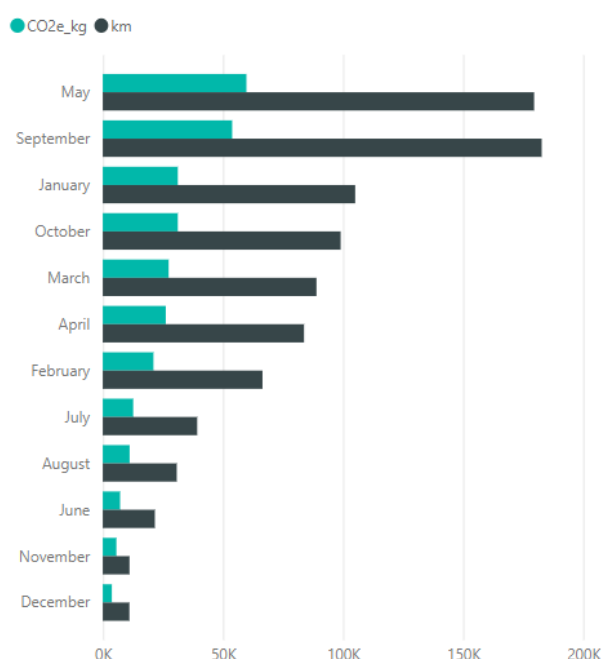

Services Included

Quarterly or bi-annual carbon reporting for your business

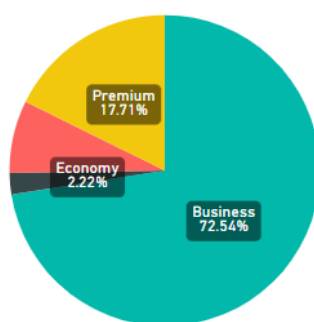

Bi-annual TAG analysis

Strategic supplier updates with collaborative supplier engagement

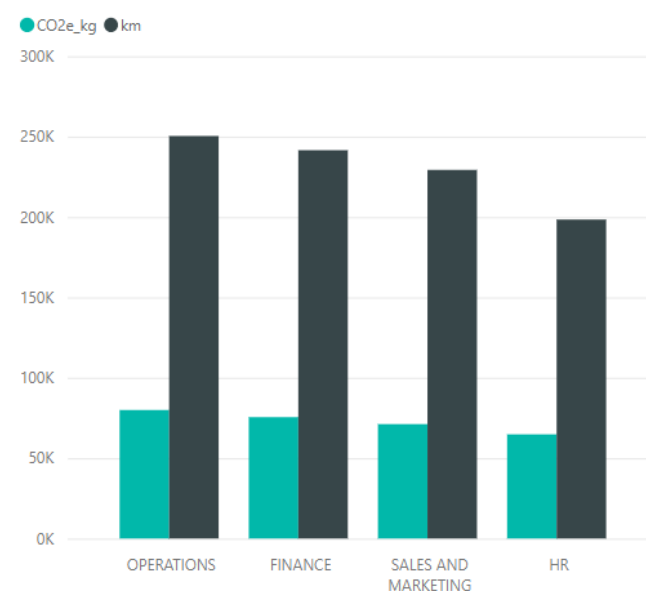

Travel carbon footprint and distance by month

Travel carbon footprint % by class

Travel carbon footprint by cost centre

The Benefits

Offering in-depth analysis on CO2 emissions generated from your travel

Easy to read, shareable and presentable reports

Option to facilitate the offset of your emissions

Savings through cost-effective and certified offsetting schemes

We would be delighted to help support your company goals with this and should you be interested please email sustainability@tag-group.com or reach out to your Account Manager who will be able to provide more information on how we can support.
