

## PREPARE PRE-EVENT

### Web Portal

**Create** custom questions and answers

**Print** answer sheets if using barcode scanners

**Set targets** and measure performance

**Manage** app licence allocation, set user permissions and view the status of individual licences

**Create** additional users for the portal to follow the lead capture progress

You can access the Visit Connect web portal at <https://visitconnect.n200.com>

## ACCESS LEADS

**View** leads captured by all devices

**Edit** all leads scanned by all devices

**Download** leads to Excel spreadsheet

**Measure** performance against targets

**Assess** Rol of the event

## COLLECT LEADS AT THE EVENT

### Scan App

**Scan** the scan app licence code to activate it

**Scan** a visitor badge

**Answer** questions, makes notes, add voice memos, add photos

**Access** leads via the app or export via email

All leads collected are synchronised to the web portal when online

Should internet connectivity be temporarily lost while using the Scan App, users can continue to scan and make notes. Once connectivity is regained all detail will be synchronised and full functionality be available.

Search in App Store or Play Store for 'Visit Connect'.

# QUICK START GUIDE

**Visit Connect enables you to efficiently follow up on your leads captured at the event**

- Scan a visitors badge to capture their information
- Answer questions bespoke to your business
- Make notes, take voice memos, even take photos on the spot!
- No more transcribing business cards or sifting through scribbled notes
