# It's time to level up!

If you have ambition to scale your travel business, your future will be defined by how well you harness technology for competitive advantage.

Inspiring customers to book with you, will be determined by their confidence in you. Which means your online presence must stack up against the larger travel brands.

Travelgenix makes this possible by removing complexity through our innovative technology. Saving time. Saving money. And speeding up time to market.

Easy-to-configure widgets that can drop into any existing website and have you set-up for successful and secure transactions in a fraction of the time it normally takes. Enterprise class travel software that is at last accessible, affordable, powerful and easy-to-implement.

All of our considerable experience in the travel industry is baked into the platform so that you can concentrate on winning more clients and keeping them loyal.

# Our World

Technology around the globe.

**Expertise is what personifies our team.**

Our track record delivering award winning technology to hundreds of companies in over 60 countries, we have assembled a team with the experience and passion to deliver to each and every one of our clients.

Supplier Health

View the connectivity and effectiveness of all your connected suppliers in one place.

AWS and Azure Hosting

We take care of everything on our huge bank of cloud servers ensuring no matter the volume of traffic every client will get the same great experience.

# The power & flexibility you need to launch, manage & grow your travel business

# Site Control

## Platform Functionality

Edit by Device	Customise every element per device, for full control over how your site looks and functions on desktop, tablet and mobile.
Drag and Drop Editor	Reduce development time with our easy-to-use and intuitive drag-and-drop editor.
Flexible Navigation	Choose from various navigation styles for desktop, tablet and mobile.
Responsive Flex Sections	Build responsive, pixel-perfect pages in half the time, with support for CSS Grid, Flexbox, and snapping. Get full flexibility for total creativity.
Developer Mode	Access your responsive websites HTML and CSS for increased flexibility and control.
Font Styles	Choose from more than 100 gorgeous font styles that can be used throughout your website.
Shrinking Header	Create great-looking sites with trendy site headers that shrink while visitors scroll. Control the colour of shrinking header text, buttons, icons and more.
Copy and Paste	Make site-building even faster by copying and pasting elements inside your website.
Backgrounds	Create engaging websites by adding background images or videos and enabling parallax effects.
Page Duplication	Duplicate any page on your site and use its design and layout in another area of the site.
Content Import	Save time by pulling content from an existing website or web page. The content is automatically placed in the template and saved in the site Content Library.
Global Design	Create a consistent website by defining site-wide settings for text, buttons, images, and backgrounds. Save the colours so they are easy to reuse throughout the site.
Colour Overlays	Customise images and videos with colour overlays. You can control both their colour and opacity.
Text Link Customisation	Choose the font colour and format that you want for your website text links.

## Platform Functionality

Favicon	Improve your brand recognition by adding a Favicon that displays on the browser tab when a website is open.
Rich Text Editing	Engage site visitors by adding underlines, bold, italics, and more to text inside widgets, and by linking words to internal or external pages.
Customised 404 Page	Make the most of every website visit with a customised 404 page. Edit the page as you would any other page in the platform, adding images, videos, buttons, text, and more.
Centre Logo Navigation	Create perfect navigation every time with dozens of predesigned navigation and header layouts. All designs are fully responsive for all devices and screen sizes.
Free Images & GIFs	Choose free images and GIFs from our extensive library, Unsplash, GIPHY, and more. Our powerful Image Picker makes adding them to your site quick and easy.
Easy Image Upload	Add images from your computer, or from various locations on the web, including Dropbox, Google Drive and Facebook.
Videos	Increase visitor engagement by displaying videos on your sites. Upload them directly to your site, or embed links to YouTube, Vimeo, etc.
Video Backgrounds	Catch visitor's attention with video backgrounds on mobile, tablet and desktop.
Photo Gallery	Display images in an eye-catching photo gallery. Choose from several modern layouts and customise with text, buttons, hover effects, animations, and more.
Image Slider	Arrange multiple photos in a swipeable image slider and choose from fantastic layout options. Add titles, captions, buttons, links, and more.
Background Slider	Create a moving background with the Background Slider, that enables you to show multiple images as a background.

## Platform Functionality

Edit Anywhere	Edit and republish any site directly from your mobile device. Upload photos you've taken on your device, update phone numbers, change links and more.
Upload Photos from Your Device	What could be handier than updating photo galleries and image sliders with photos you've just snapped on your phone? You can also add, sort and edit images from the library.
Designed for Smartphones	Designed specially for touch, the mobile version of the editor has easy-to-click buttons and an intuitive flow, so you will find the entire experience easy and slick.
Build, Edit and Publish, Anywhere	Access the full editor, including site settings and stats, in a format customised for tablet. Upload images from your device, edit widgets in a tap, and more.
Designed for Tablet	Designed specially for touch, the tablet editor includes, among other things, a wider top bar for easy tapping, and deliberate deletion to make sure nothing is removed by accident.

## Platform Functionality

Popup	Add popups that promote sales, encourage email signups, or personalise the site for specific visitors.
Contact Form	Make it easy for visitors to get in touch with an easy-to-edit Contact Form. It has an opt-in consent fields, multiple layout and style options, and can be integrated with MailChimp, and Google Sheets.
Custom HTML	Add your own HTML/CSS/JavaScript directly to your websites. Great for third-party integrations or adding custom code.
Business Hours	Let website visitors know when a bricks-and-mortar store is open and when it's not. Save time by importing and then editing business hours from an online source.
Click To Call	Enable site visitors to call a business with a single click from a mobile device.
Click To Email	Enable site visitors to email website owners directly from their websites.
Divider	Add customisable dividers to your sites. Choose from a variety of layouts and designs.
File Upload	Enable website visitors to download PDFs, spreadsheets and more by clicking a button.
Facebook Comments	Allow visitors to comment on a linked Facebook page without leaving the website.
Facebook Like	Enable visitors to like a business's Facebook page without leaving the website.
Icons	Choose from a library of more than 1000 icons, or upload your own SVG, and customise to suit your site's look and feel.
List	Create an engaging list of anything you like, from company services to team members. The list can include titles, descriptions, images and image links.
Maps	Powered by Mapbox, choose from several sleek layouts, and make it easier for site visitors to find bricks-and-mortar locations.
Multi-Location	Insert a map powered by Mapbox that shows multiple locations and enables website visitors to find the location closest to them.
RSS Feed	Incorporate blog posts from another URL directly onto your website.

# Site Widgets

## Platform Functionality

Share	Make it easy for site visitors to share the website on social media networks including Facebook, Twitter, LinkedIn and more.
Social Widgets	Make it simple for site visitors to share your site with their followers. Choose which icons to display and customise as you like.
Twitter Feed	Keep site visitors up-to-date by displaying a live Twitter feed.
Yelp Reviews	Build credibility with site visitors by displaying top Yelp reviews directly on your customers' websites.
Zoom	Add this video conferencing service to your sites and give an easy, quick, and effective way to engage with site visitors.

# Templates

## Platform Functionality

Modern Templates	Choose from a library of beautiful, sleek, natively responsive website sections. The selection is growing all the time.
Versatile & Flexible	Section templates, are incredibly versatile, and can be adapted with ease for many uses.
Save Your Templates	Built a customised template that you want to reuse? Simply save it in the My Templates section of the Editor. You and your teammates will be able to use it over and over again.
Predesigned Sections	Speed up your website design process by adding predesigned sections to your websites. Each section is professionally designed and available in a click directly from inside the editor.
Create Your Own Sections	Create your own sections, or save existing rows or full pages as sections, and reuse them as often as you like.
Share Sections	The Team Sections dashboard makes it easy for you to share any section that you've designed, and access sections that your teammates have designed and saved.

# Content library

## Platform Functionality

Connect to Widgets	Text blocks, images and addresses are just some of the widgets you can now connect to the Content Library for easy data management all in one place.
Create Collections	Add entire collections of business images with their titles and descriptions to the Content Library. You can connect this data to photo galleries, image sliders, background images, list widgets and more.
Manage Images	The Content Management tools enable you to manage and save all of your images inside the Content Library. You can access the Image Picker to select from free and premium images, upload your own and sort them into folders.
Manage Files	Consolidate any and all files related to your business in one convenient location inside the Content Library.
Manage Form Responses	Easily view, manage and delete responses from visitors that submitted a contact form on your website.

## Platform Functionality

Flexible & Customisable	Add any content that you want to your posts, including images, widgets, rows and columns. As for the layout and style, customise easily any way that you like.
Schedule Posts	Ensure your blogs are filled with fresh content, even when you're not on hand to post it, by scheduling post publishing in advance.
Smart & Connected	Two connected modes keep your blog posts looking great. Set structure in Layout Mode; add content in Post Mode. The connection between modes gives you design flexibility within a consistent structure.
Blog Tags	Optimise blog SEO and make it easier for visitors to find posts about the topics they care about with consistent, error-free autofill tags.
Syndicated Content	ATOM and RSS feeds are automatically generated and updated for every new blog post.
Fully Responsive	The blog displays perfectly across desktop, tablet and mobile devices.
Smart Design	Every post in the blog has a smart and consistent design structure. This is good for SEO and makes for a great visitor experience.
Multiple Authors	Increase the scope of your blog by enabling multiple contributing authors.
Blog Stats	Know how many people visit every post with automatic visitor tracking.
Easy management	The search feature makes it easy to find a specific post according to the subject, author and publish date.
Accessible Site-Wide	You can add a blog element anywhere on the website so visitors can access the posts easily, regardless of where they are on your site.

## Platform Functionality

Google Page Speed Optimisation	All websites are automatically optimised for Google Page Speed upon publishing and republishing.
Global CDN	Load times are significantly reduced thanks to the global CDN (Content Delivery Network), which hosts all static files (such as images, pdfs, and documents).
Local Business Schema	Increase site discoverability with Local Business Schema, which provides search engines with reliable, structured information about your business.
Free SSL	SSL certificates are included with every one of our responsive website and can be installed in just one click to improve your website's' SEO rankings.
Dynamic Serving	Your website automatically responds to the type of device (desktop, tablet or mobile) it is being viewed on and content is optimised accordingly to speed up load times.
Robots.txt	Automatically included, robots.txt informs search engines which pages should and should not be indexed by search engines.
Sitemap	A sitemap is automatically generated for each site and informs search engines which pages they should crawl.
Open Graph Support	Share a website image, title and description with social networks including Facebook and LinkedIn using Open Graph.
Vary: user-agent	Vary: user-agent informs search engines that users will receive different content depending on their device type.
Page Titles	Control the title of each page for optimal search engine visibility.
Meta Keywords & Descriptions	Control the keywords and descriptions for an entire site, and for every page individually.
Customizable Page URLs	Customise the URL of any page on a site to improve search engine visibility and inform visitors of what page they are on.
Alt and Description Tags on Images	Improve the ability of search engines to discover images on a website through tags.
301 Redirects	Help maintain strong SEO when switching from an old site to a new one by redirecting an old page URL to the new one.
Mobile-Friendly Design	All images are automatically optimised so they meet (and exceed) Google standards for mobile-friendliness.

## Platform Functionality

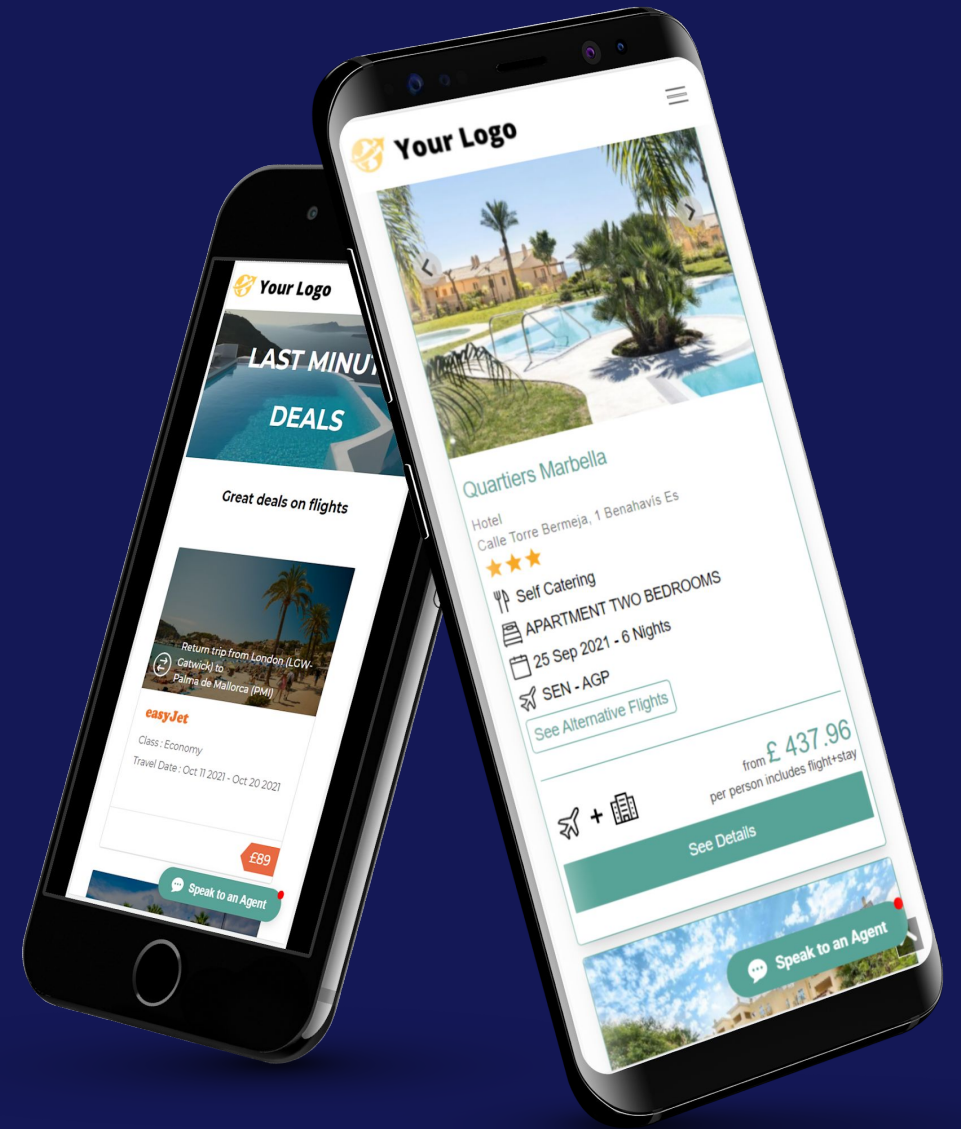

55+ Languages	Choose from dozens of international languages.
Easy-to-Use	Quickly create multi-language responsive websites based on easy-to-edit automatic translations by Google Translate.
SEO-Friendly	Boost your website SEO ranking with language-specific URLs designed for geo-targeting.
Fully Customisable	Easily edit every page in every language, so nothing gets lost in translation.
Under the Hood Access	As with all our websites, you can access the code on every page if you like and make per language adjustments.
Dynamic Pages	Speed up your site-building process by creating multiple pages based on a single design and filled with content stored in Internal Collections inside the editor, or in external collections.
Internal Collections	Manage content, including text, images, addresses and more, directly inside the editor. Connect your collections to Dynamic Pages to instantly create multiple pages based on a single design.
Ready-to-Use Dynamic Pages	These pages are already connected to a dataset that is managed directly from the editor. Available for company team pages, blank pages, and more.
External Collections	Connect a Google sheet or Airtable to Dynamic Pages (no code required!) or with any other external database using our robust API*. Every time the data is updated, your site updates automatically.
API Documentation	Build and manage Dynamic Pages without even entering the platform via API calls*.
Any page can be a Dynamic Page	You can convert an existing site page to make it dynamic or start from scratch, designing a page that's dynamic right from the start.

## Platform Functionality

Reliable Hosting	All websites are hosted on Amazon Web Services (AWS) and Microsoft Azure, the industry's most trusted and secure cloud-based solutions. There is no limit to bandwidth or storage. All API's and Travel widgets are stored and served from Azure web services
Privacy Page Template	Every website comes with a privacy page template that can be used as a guide for explaining to site visitors how collected information is being used. Simply activate the template and customise or create your own in just a few clicks.
Customisable Cookie Notification	Activate this notification to notify users when a website collects data on them in the form of cookies. Can be fully customised.
Form Response Page	This dedicated page enables you to manage and delete all personal information submitted by site visitors via Contact Forms.
GDPR Compliance	Everything you need to make your sites GDPR compliant is already in the platform. This includes a privacy policy template, customisable cookie notification, form response page and more.
Status Page	Track the operational status of the website platform at any time via the Status Page.
Google Page Speed Optimisation	All our websites are automatically optimised for Google Page Speed upon publishing and republishing.
Dynamic Serving	Your website automatically responds to the type of device (desktop, tablet or mobile) it is being viewed on, and content is optimised accordingly.
Site Backups	Create site backups of a current website version before making edits. You can revert to this version at any time.
Global CDN	Load times are significantly reduced thanks to the global CDN (Content Delivery Network), which hosts all static files (such as images, pdfs, and documents).
Custom Domain	Control your site's domain name and easily connect it with a third-party provider.

Unrivalled functionality  
with powerful 'no code'  
widgets that are  
designed to attract,  
engage & convert  
browsers into buyers

# Content Widgets

## Widgets

Age Verification	Verify the age of your visitors before they can access your website.
Back To Top	Let your users instantly scroll to the top of the page in a single click.
File Embed	Allow users to view and download any type of file (.doc, .xlsx, .pptx, .txt etc).
Frequently Asked Questions	An informative, SEO friendly FAQ widget.
Google Maps	Turn browsers into customers with Google Maps.
Price Slider	A sleek, responsive horizontal price slider.
RSS News Feed	Share content from news websites and blogs.
Tabs	Reduce clutter on your site and improve the user experience.
Team Showcase	Create and display profiles of your team members and staff.
Text-Type	Add dynamic multi-word text-type content to draw in your users.
Typewriter Text	Add dynamic multiline typewriter text to your website.
Weather	Boost weather dependent products / service / event sales.
