

**A unified platform for business
travel & expense management**

Fully integrated travel & expense management solution

Connecting travel, expenses & compliance in one solution

As companies expand their global reach, business travel plays a critical role in driving growth, building relationships, and exploring new opportunities. However, managing travel and expenses is essential to maintaining cost control, policy compliance, operational efficiency.

How it works:

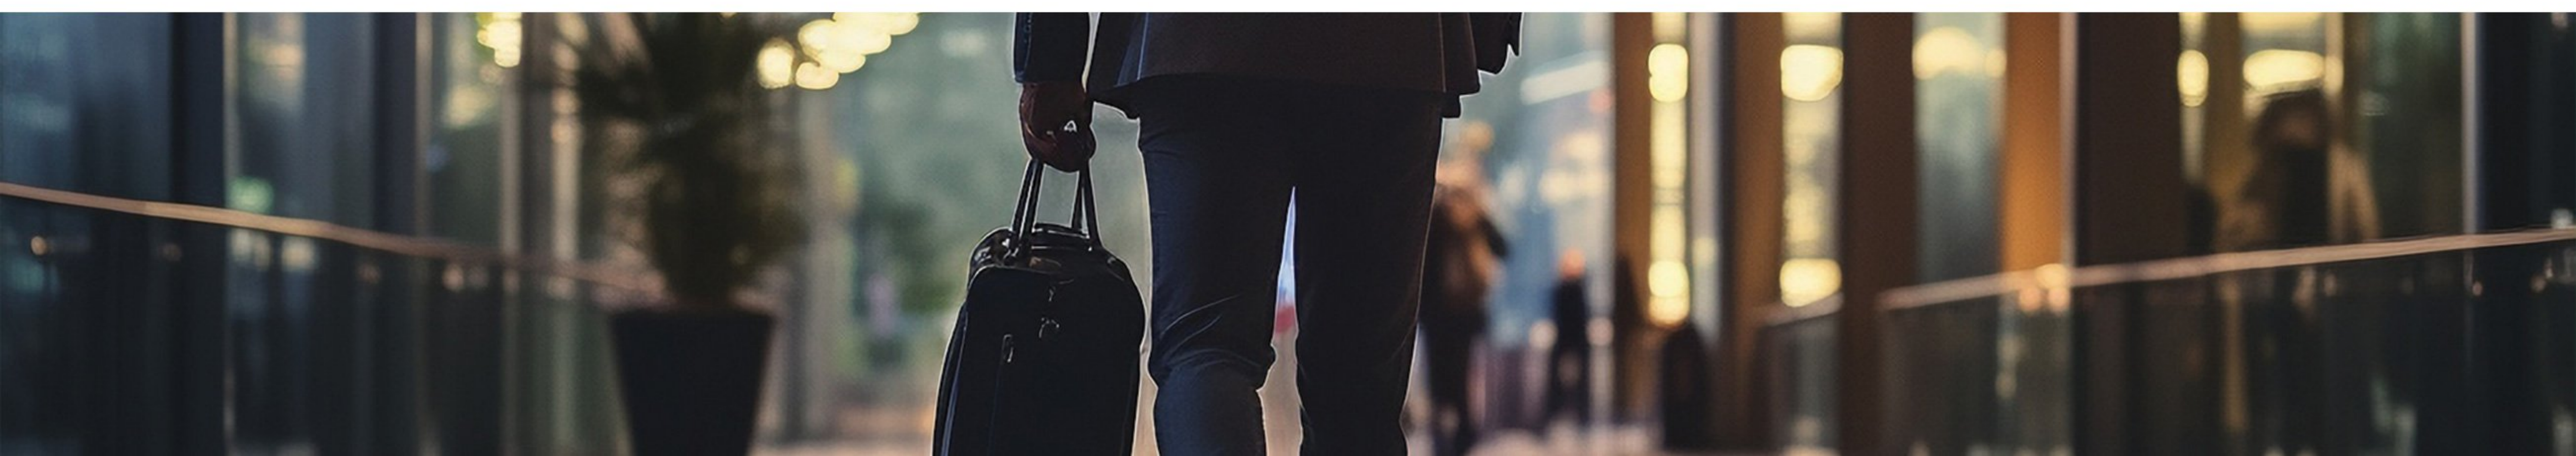

Self-servicing booking tool: Travelers book flights, hotels, and more in a unified system.

Connected global content: Integrates directly with airlines, hotels, cars & other service providers.

Policy & compliance: AI-driven tools ensure bookings align with company policies.

Real-time assistance: Concierge & TMC help desk provide 24/7 support.

Smart expense management: Travel expenses made with corporate cards sync automatically into the system.

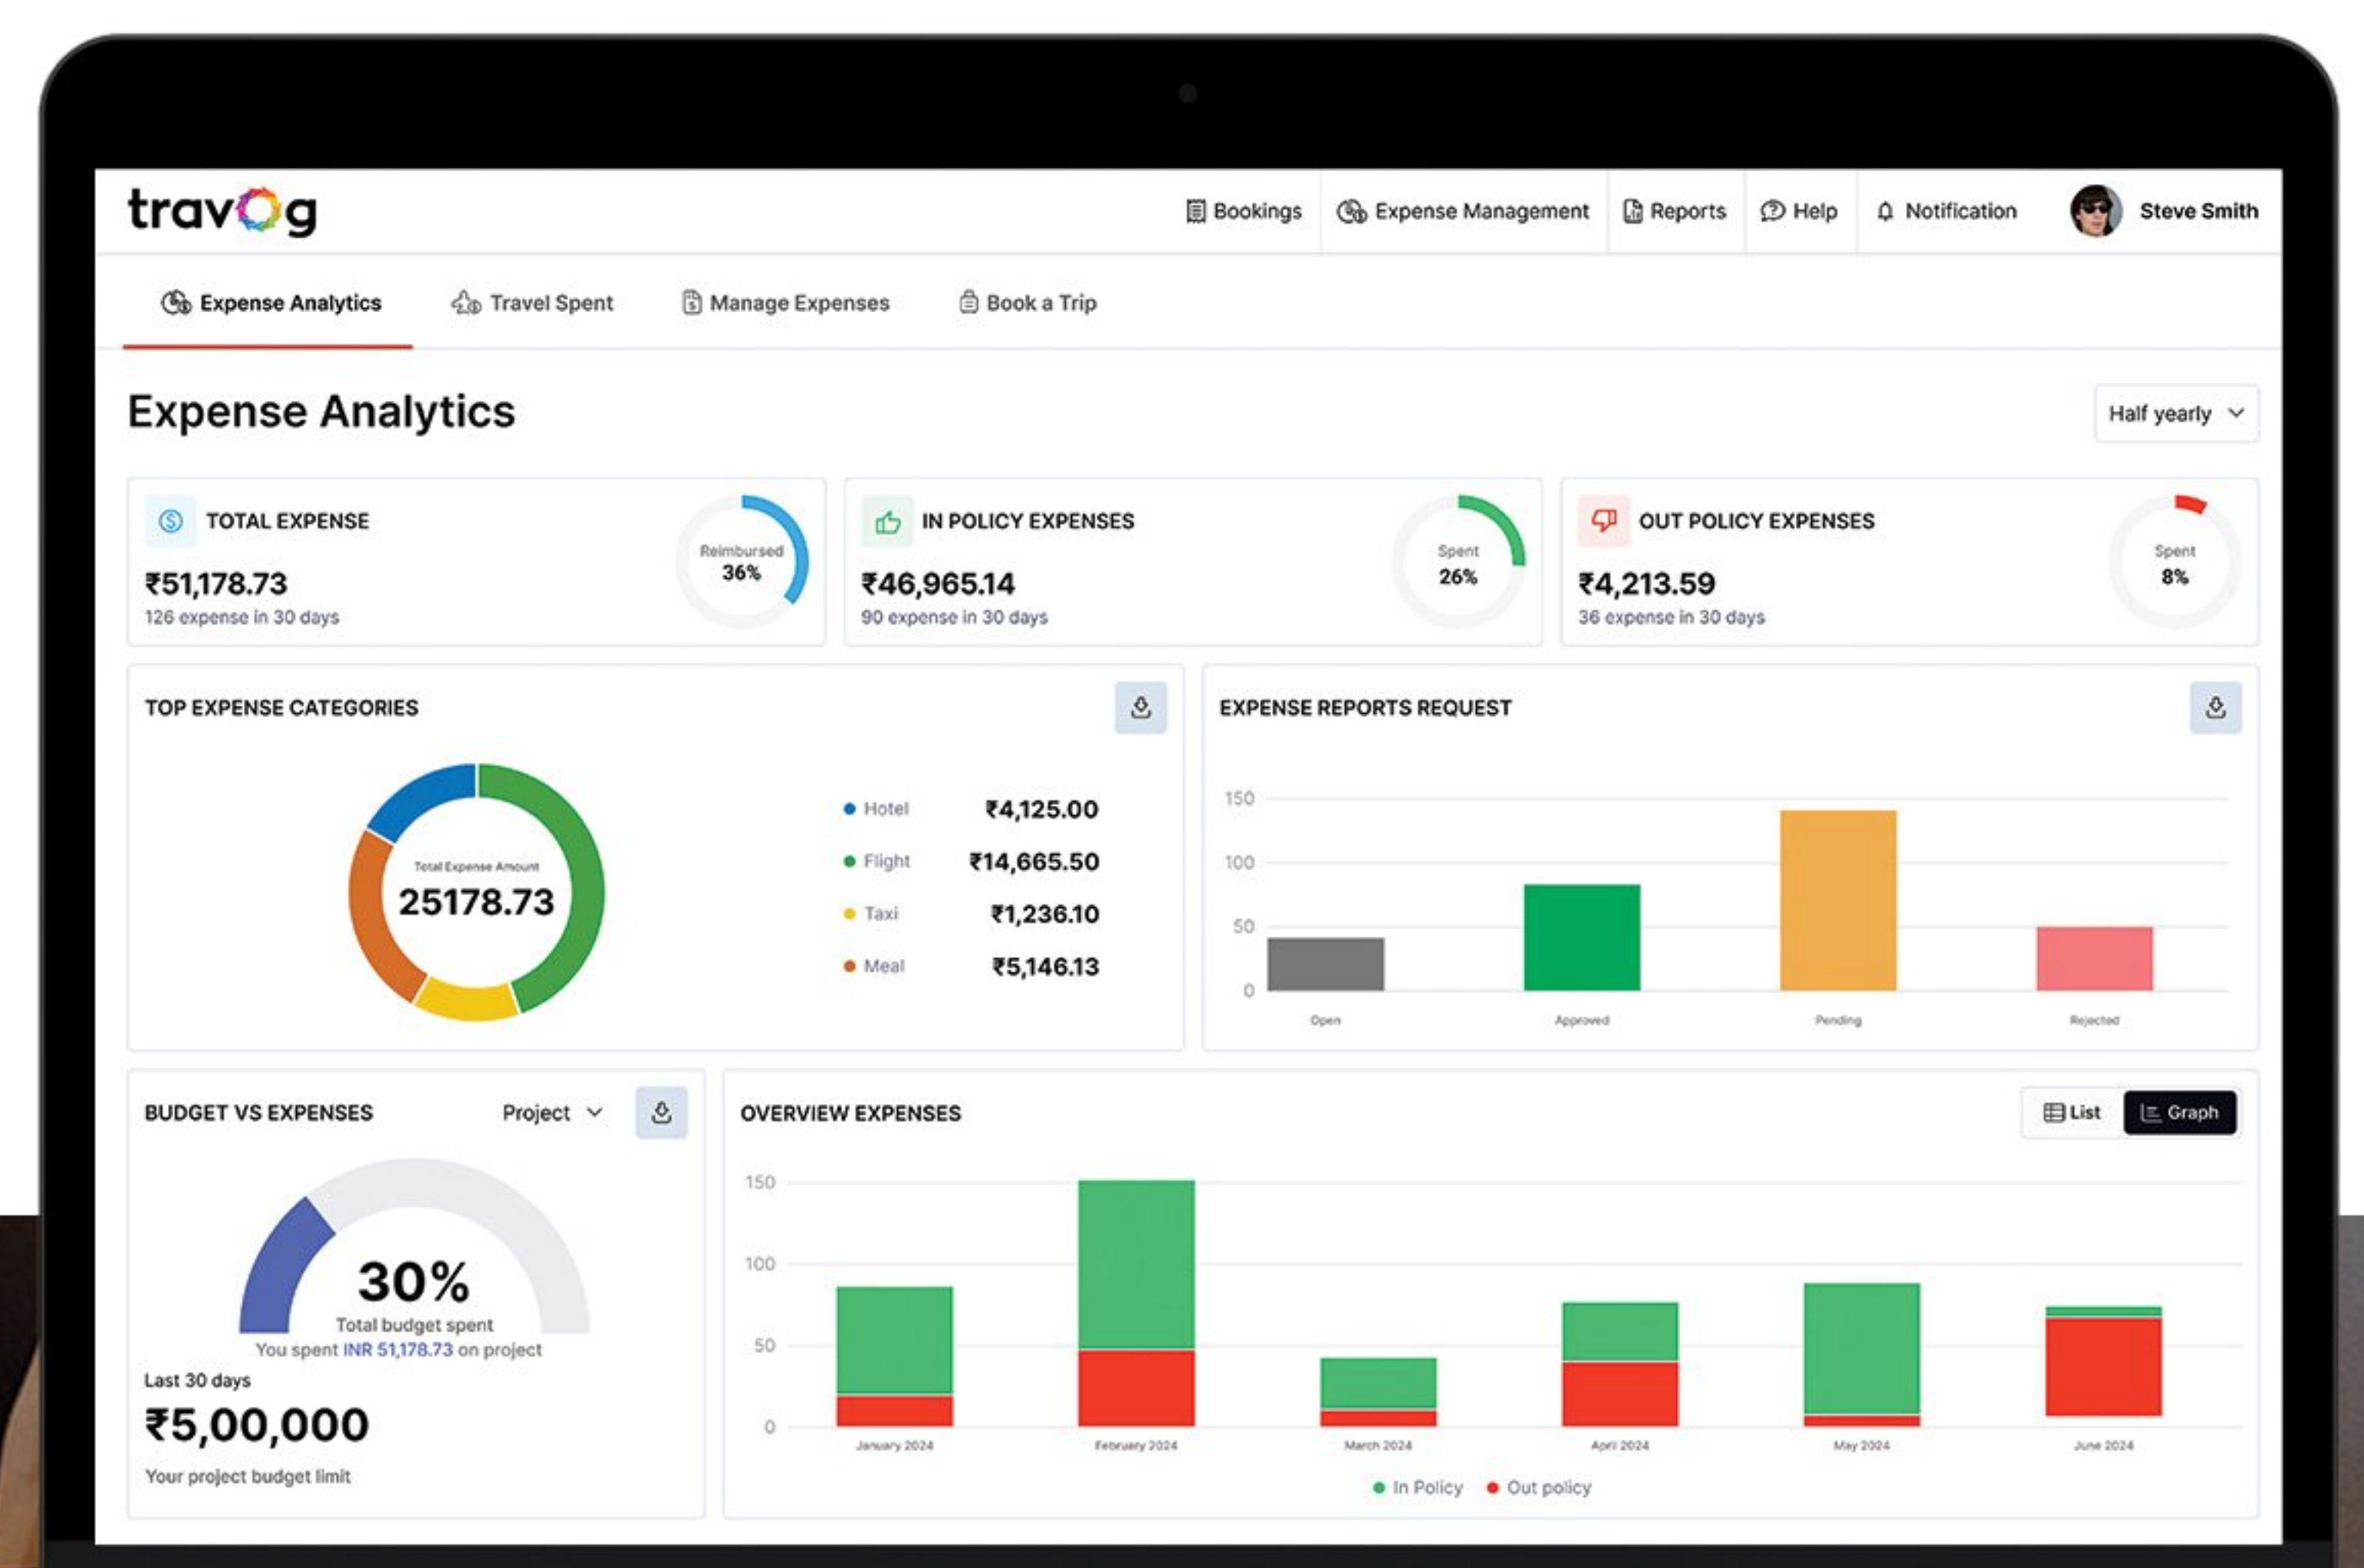

The ultimate corporate travel and expense management platform

Self-booking tool (SBT)

Travog is designed to empower Travel Management Companies (TMCs) and Corporate Clients with an intuitive, automated travel management solution. It streamlines corporate travel by allowing customizable policies, multi-level approvals, and seamless booking workflows—all in one centralized platform. With Travog's SBT, companies gain total control over travel planning, ensuring compliance, cost efficiency, and a hassle-free experience for both travelers & managers.

- ✓ Effortless corporate booking for employees and travel arrangers.
- ✓ Multi-product search & booking for flights, hotels, and more.
- ✓ Built-in policy compliance to ensure seamless approvals.
- ✓ Multi-level approval workflows for better control and flexibility.
- ✓ Flexible payment options including credit limits and corporate cards.
- ✓ Automated corporate deals for preferred airlines and hotels.
- ✓ Business intelligence dashboards for real-time insights.
- ✓ Cost-saving reports to track and optimize travel spend.
- ✓ Employee location tracking for safety and compliance.
- ✓ Advanced BI analytics to power data-driven decisions.

Expense management system

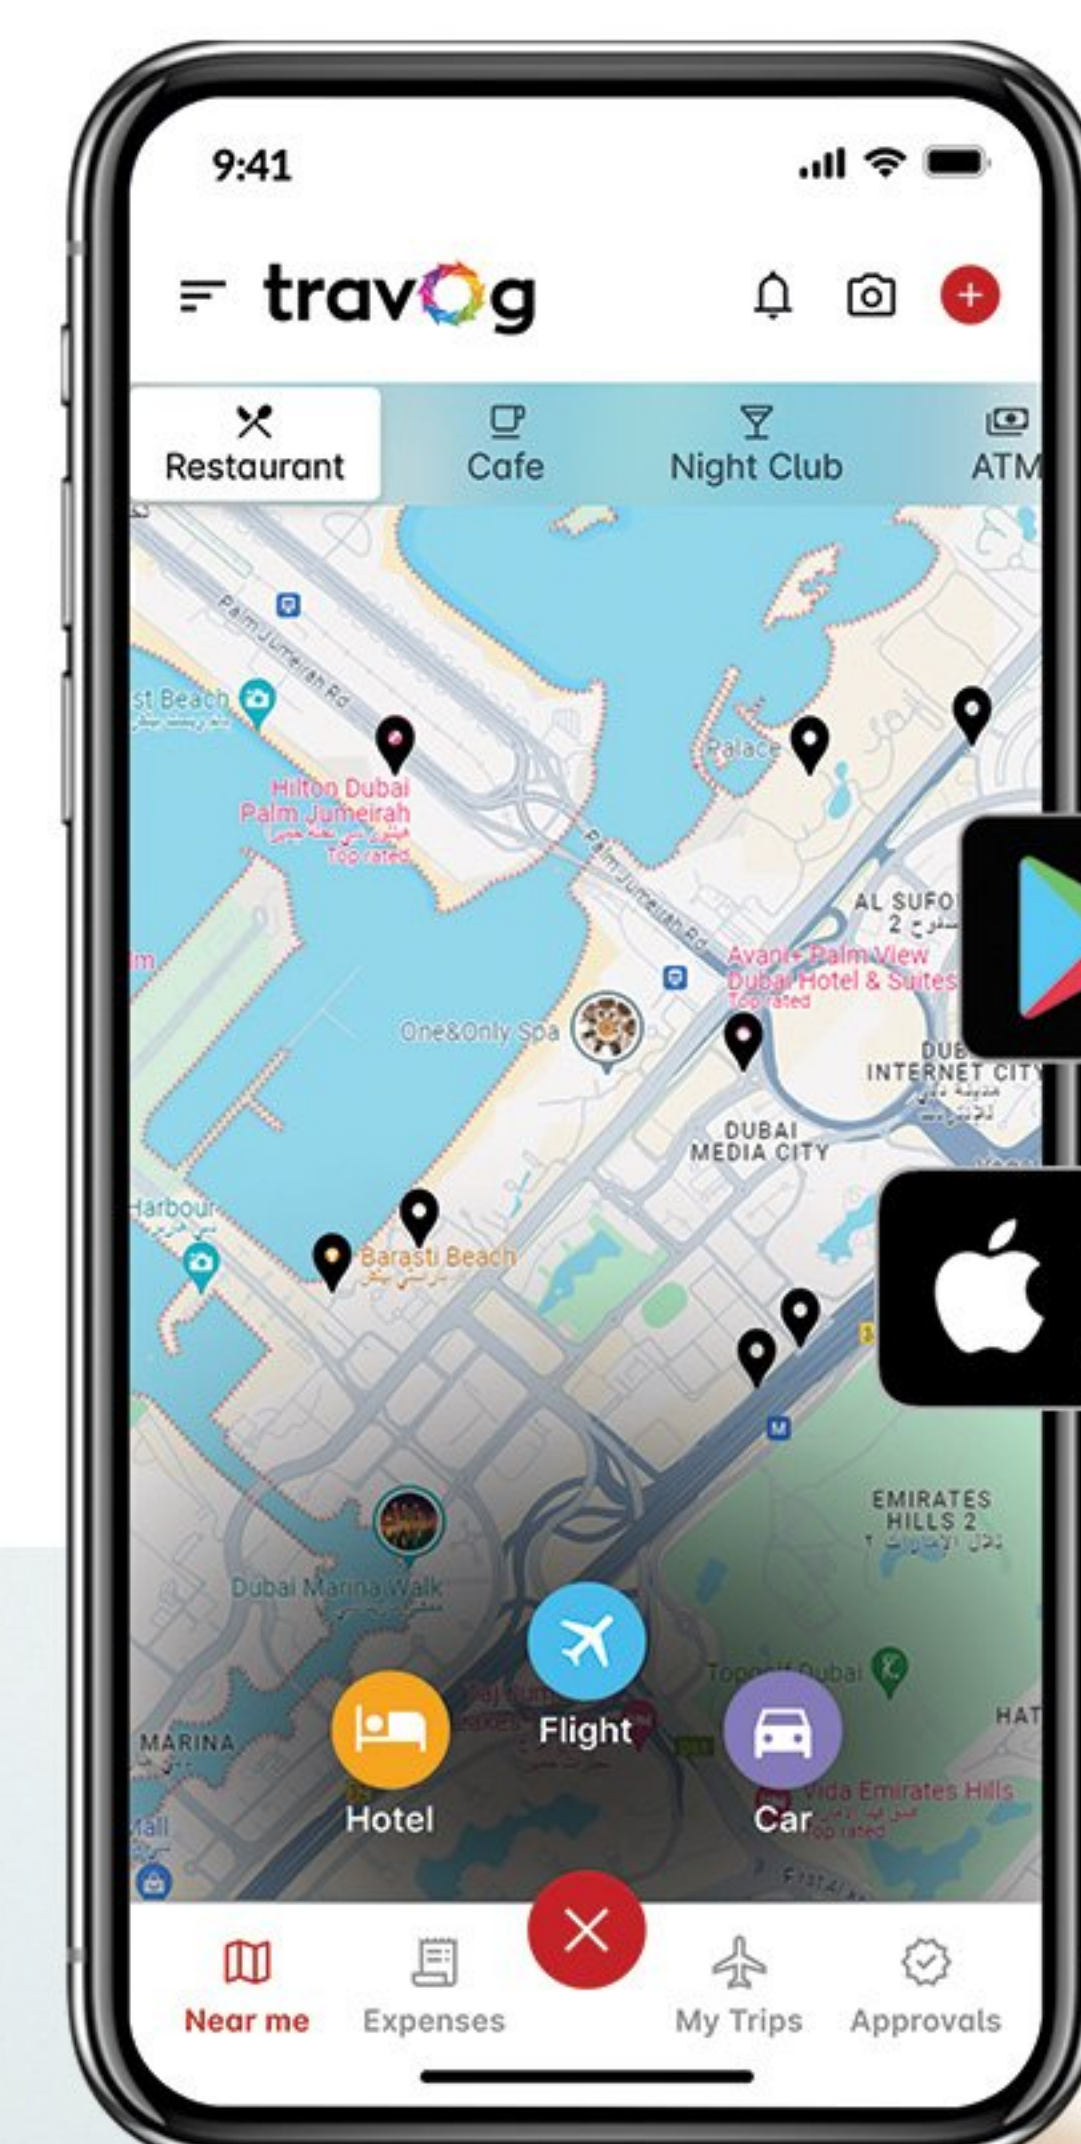

Tracking, managing, and reconciling business expenses can be complex, but it doesn't have to be. Our Expense Management System simplifies the entire process—right from budget allocation to final reimbursement—ensuring compliance, accuracy, and transparency. With automated approvals, digital receipt management, and seamless reconciliation, businesses can gain better control over their travel expenses while reducing administrative overhead.

- ✓ Pre-loaded Expense Budget
- ✓ Streamline expense management with e-receipts
- ✓ Ensure policy compliance & Simplify multi-level approvals
- ✓ Reconcile corporate cards automatically
- ✓ Reconcile expenses and process travel reimbursements with ease
- ✓ Achieve better visibility through Reports and BI Dashboard

Mobile application (Travel companion)

Corporate travel should be convenient, connected, and hassle-free. Our mobile application transforms the way employees book, manage, and experience business travel. With seamless booking, instant notifications, and location-based recommendations, travelers can stay in control at every step. Whether it's booking flights, finding the best local services, or tracking approvals, our app ensures a smooth and stress-free travel experience—anytime, anywhere.

- ✓ Book business & leisure trips effortlessly.
- ✓ iOS & Android compatibility with global traveler profiling.
- ✓ Location-based search for flights and hotels.
- ✓ Access in-destination recommendations for dining & services.
- ✓ Instant approval notifications for quick processing.
- ✓ View and manage current bookings in real time.

Travel CRM & mid back office

Client management

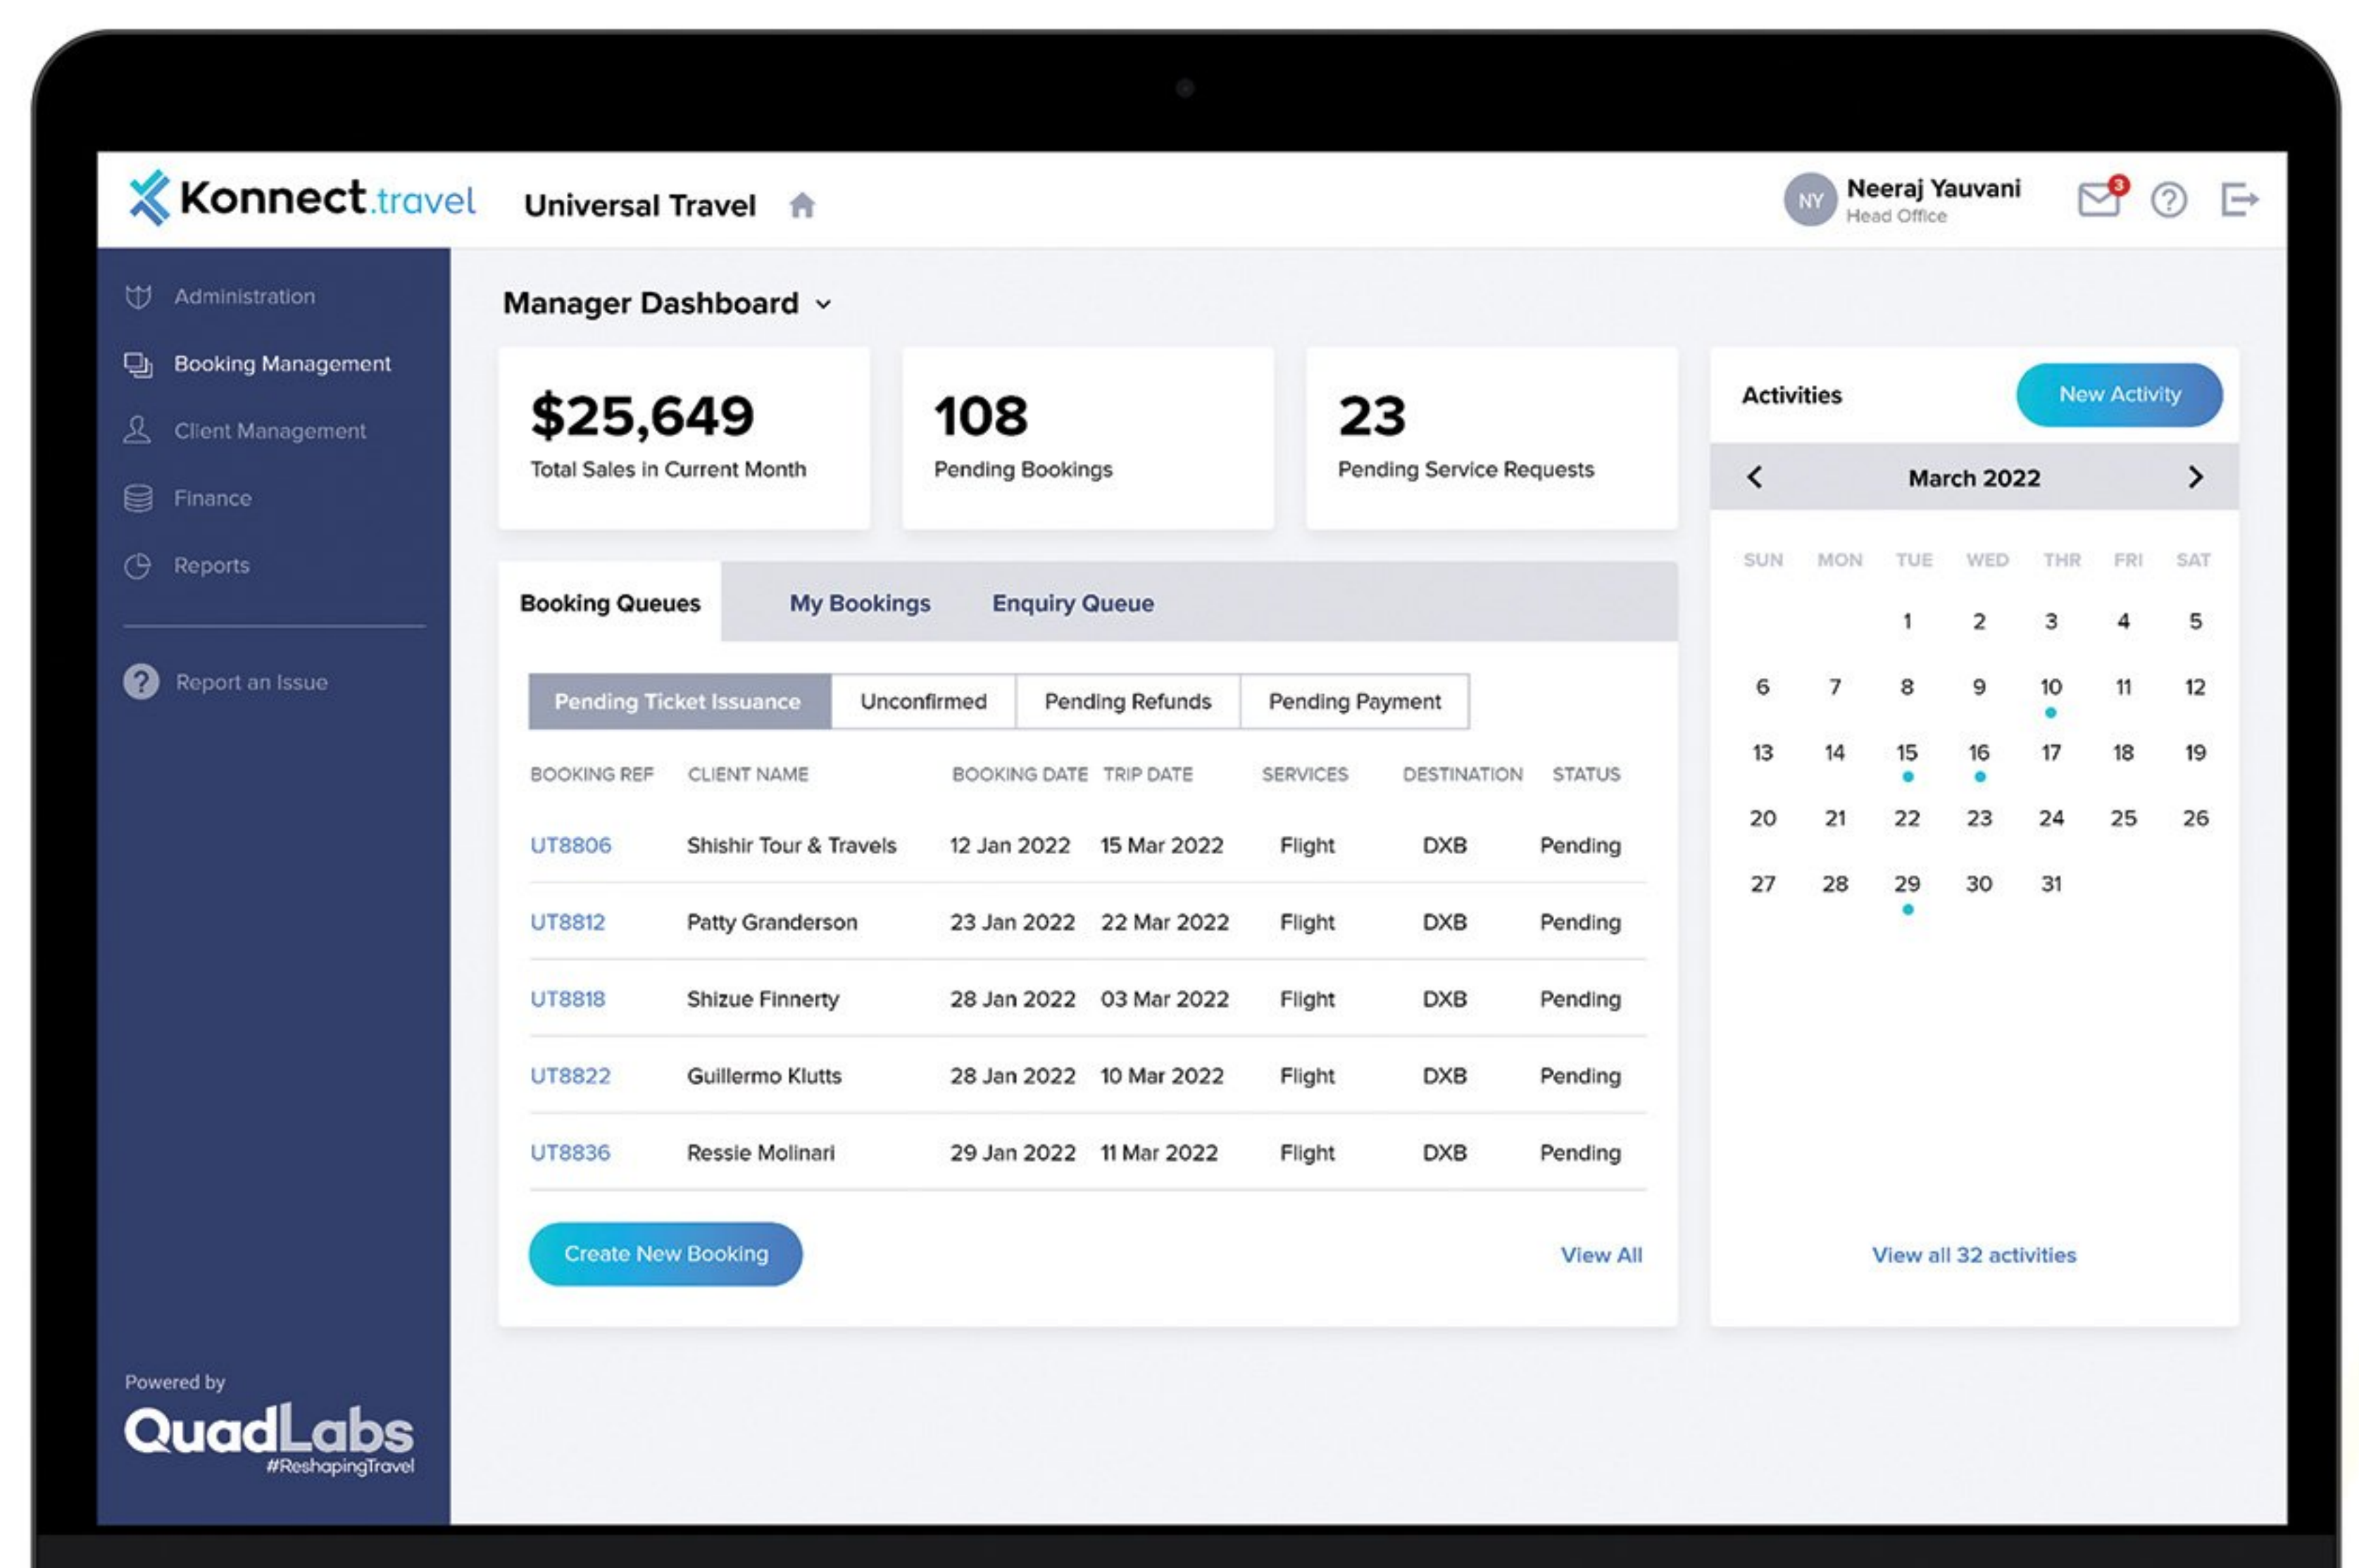

Seamless client interactions are the foundation of a successful travel business. Our Client Management module centralizes customer data, streamlines communication, and enhances service efficiency. With intelligent tools for profiling, feedback management, and targeted promotions, businesses can personalize their offerings and build lasting customer relationships.

- ✓ Retail, Business & Subagent Profiling
- ✓ Client Enquiry & Feedbacks
- ✓ Email Promotions
- ✓ Manage Markups and Commissions
- ✓ Policy Management & Approval Workflow

Financial accounting

Managing finances should be as smooth as managing travel. Our robust Financial Accounting system automates transactions, reduces manual errors, and provides real-time financial insights. Businesses gain complete financial visibility from BSP & bank reconciliation to ledger maintenance with automated reporting for improved decision-making.

- ✓ Account Payables & Accounts Receivables
- ✓ Financial Reports - Profit & Loss, Balance Sheet, Ledger Statement etc.
- ✓ BSP & Bank Reconciliation
- ✓ Chart of Accounts
- ✓ Ledger Book Keeping
- ✓ Automated Financial Posting

Mid-back office

A powerful and centralized Mid Office system designed to automate travel operations, optimize booking workflows, and streamline financial processes across multiple sales channels. With advanced automation and seamless integrations, businesses can enhance efficiency, improve compliance, and deliver superior customer experiences.

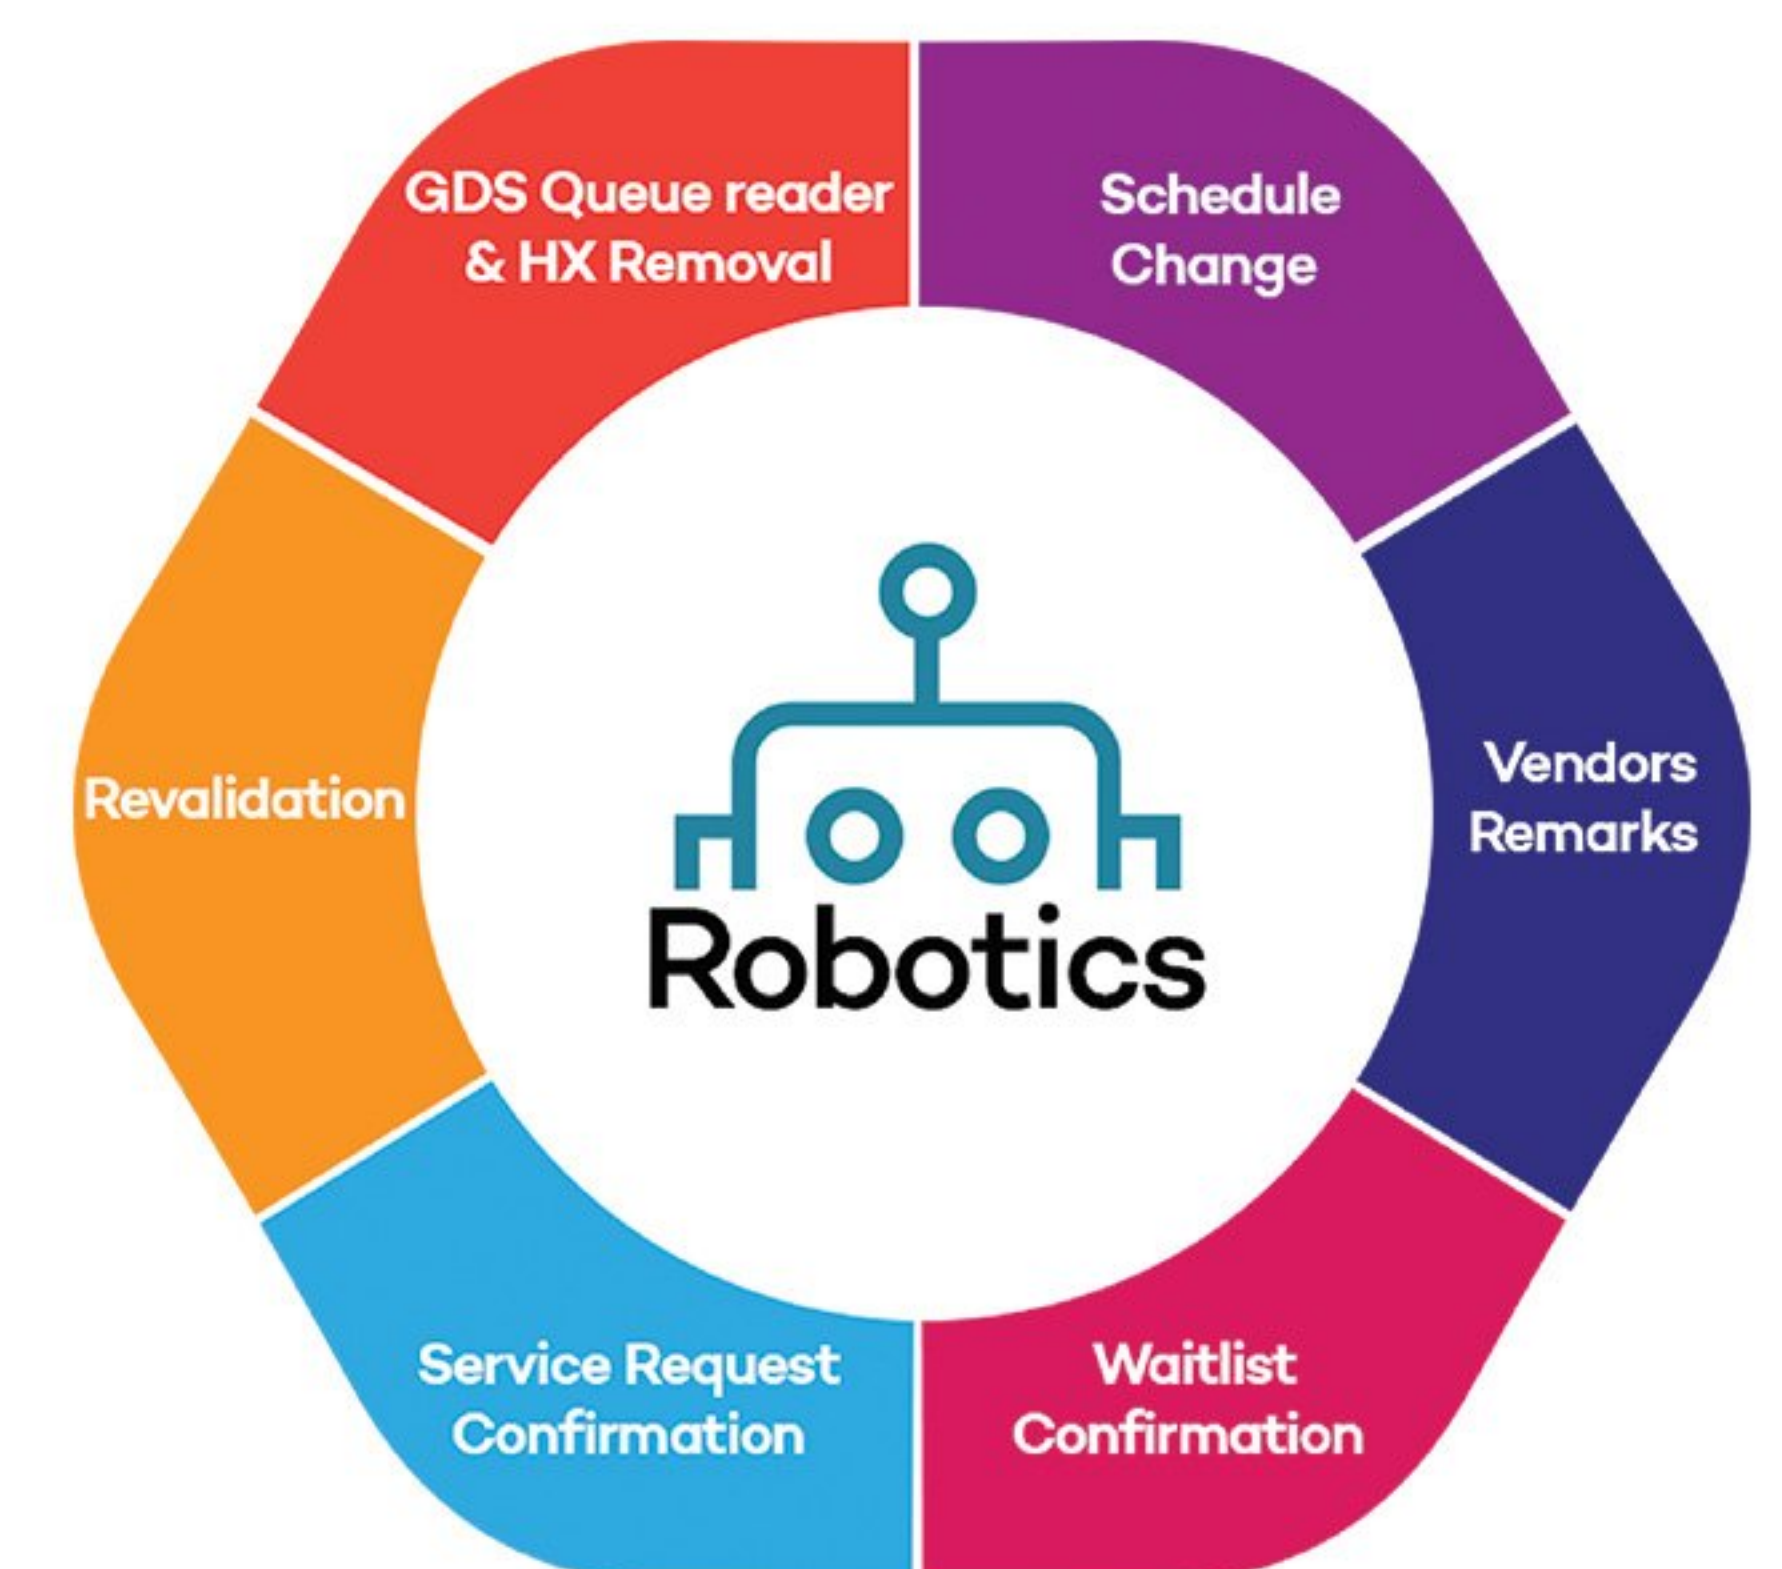

- ✓ Booking Management & Fulfilment
- ✓ Sales, Product and Finance Reports
- ✓ Purchase and Distribution Rules
- ✓ GDS Queues & Robotics
- ✓ Supplier Management

Robotics & queue management

Eliminate manual inefficiencies with end-to-end robotics for booking fulfillment. Our intelligent scheduler automates ticketing, queue handling, cancellations, and confirmations, ensuring smooth travel operations while saving time and resources for travel agencies.

- ✓ GDS Queue Management
- ✓ Auto Ticketing post approval
- ✓ PNR stamping & Data capture
- ✓ Auto cancelation before ticketing time limit
- ✓ HX Removal, SSR confirmation & Vendor remarks

Reports & MIS

Gain actionable insights with a comprehensive reporting system that consolidates data into a single web-based interface. Businesses can generate real-time reports, track financial performance, and export data in multiple formats for strategic decision-making.

- ✓ BSP & Product wise sales report
- ✓ Daily Sales & Profit report
- ✓ Destination-based reports

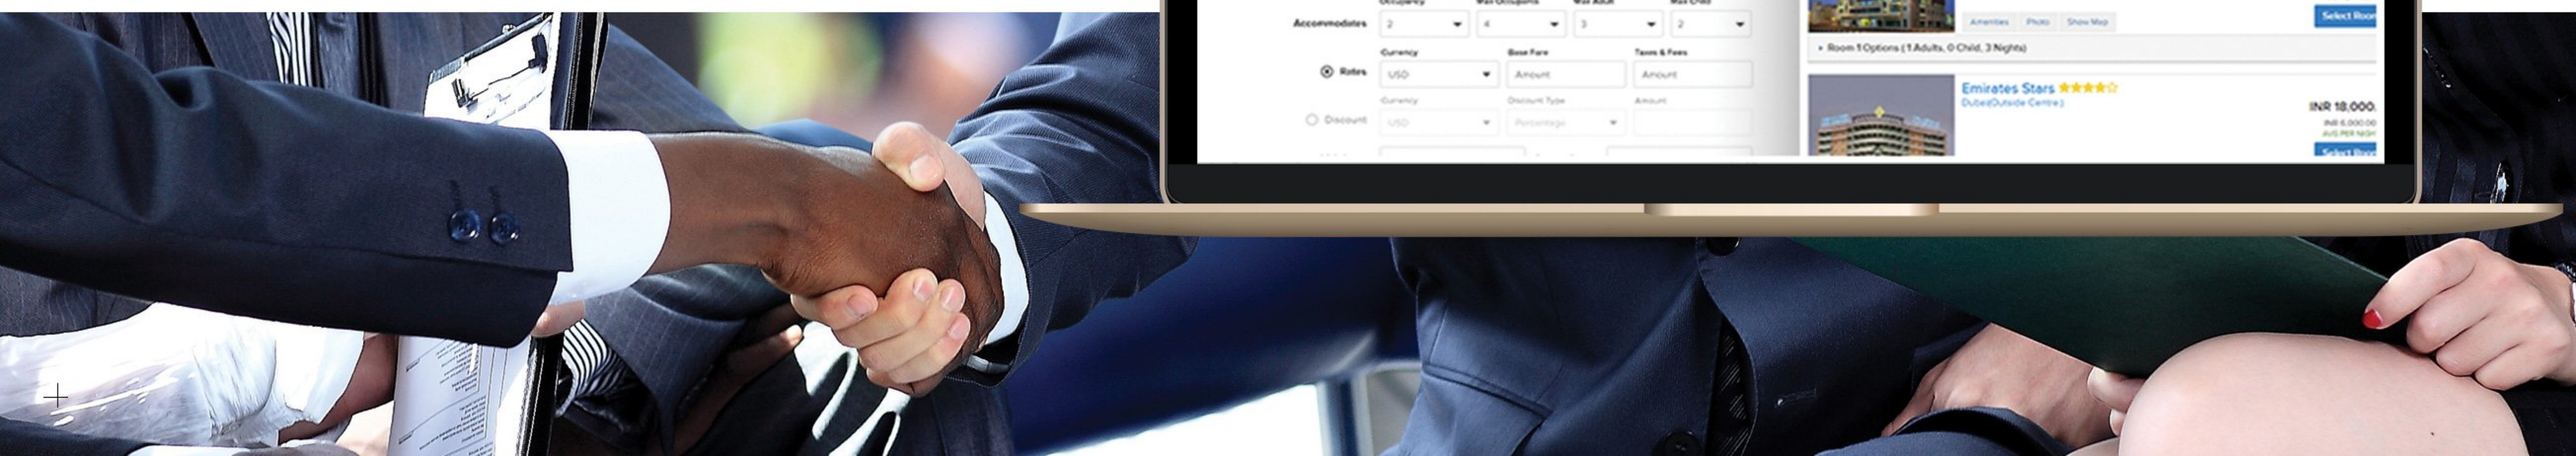

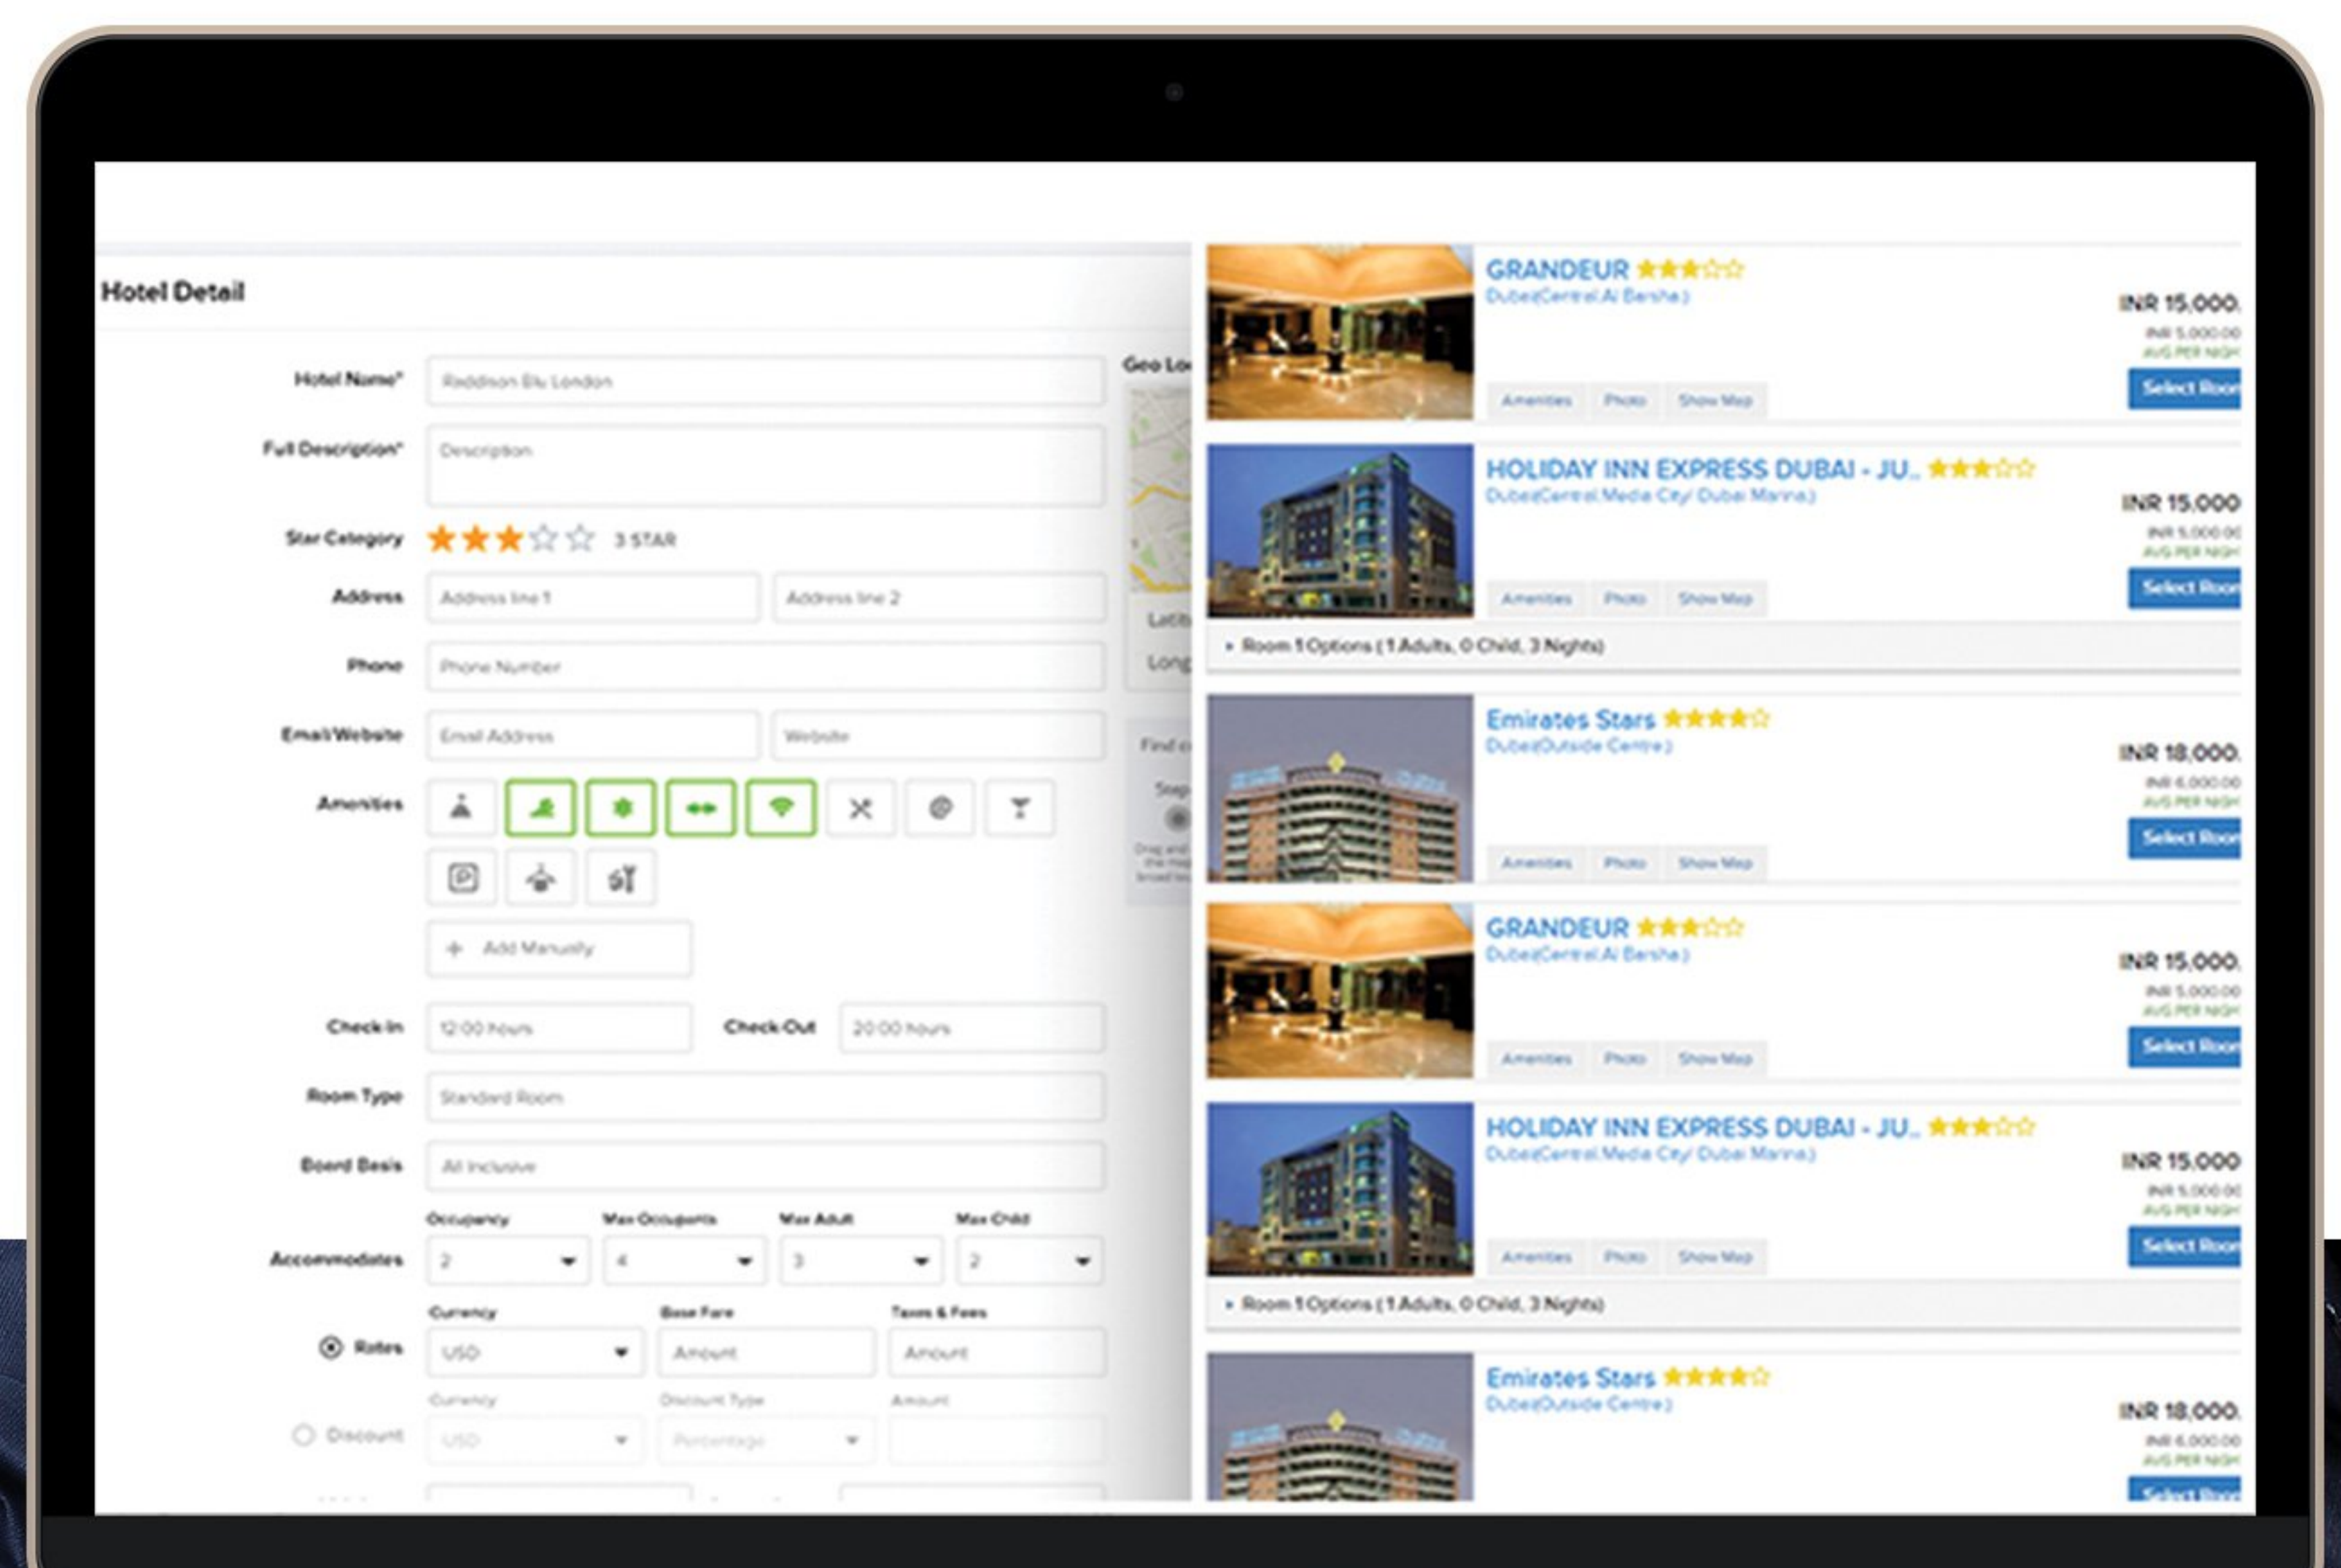

Content management

Hotel, Sightseeing, Car rentals, Travel insurance & Transfers

Contract management (Land product)

A robust contract management and distribution system designed to handle private and negotiated inventory across various travel services, including hotels, sightseeing, car rentals, travel insurance, and transfers. This solution enables aggregators and consolidators to establish direct relationships with suppliers, ensuring seamless inventory distribution. Users can efficiently upload and manage contracted rates, allocations, special deals, and discounts while maintaining full control over mark-ups and commission structures across multiple sales channels.

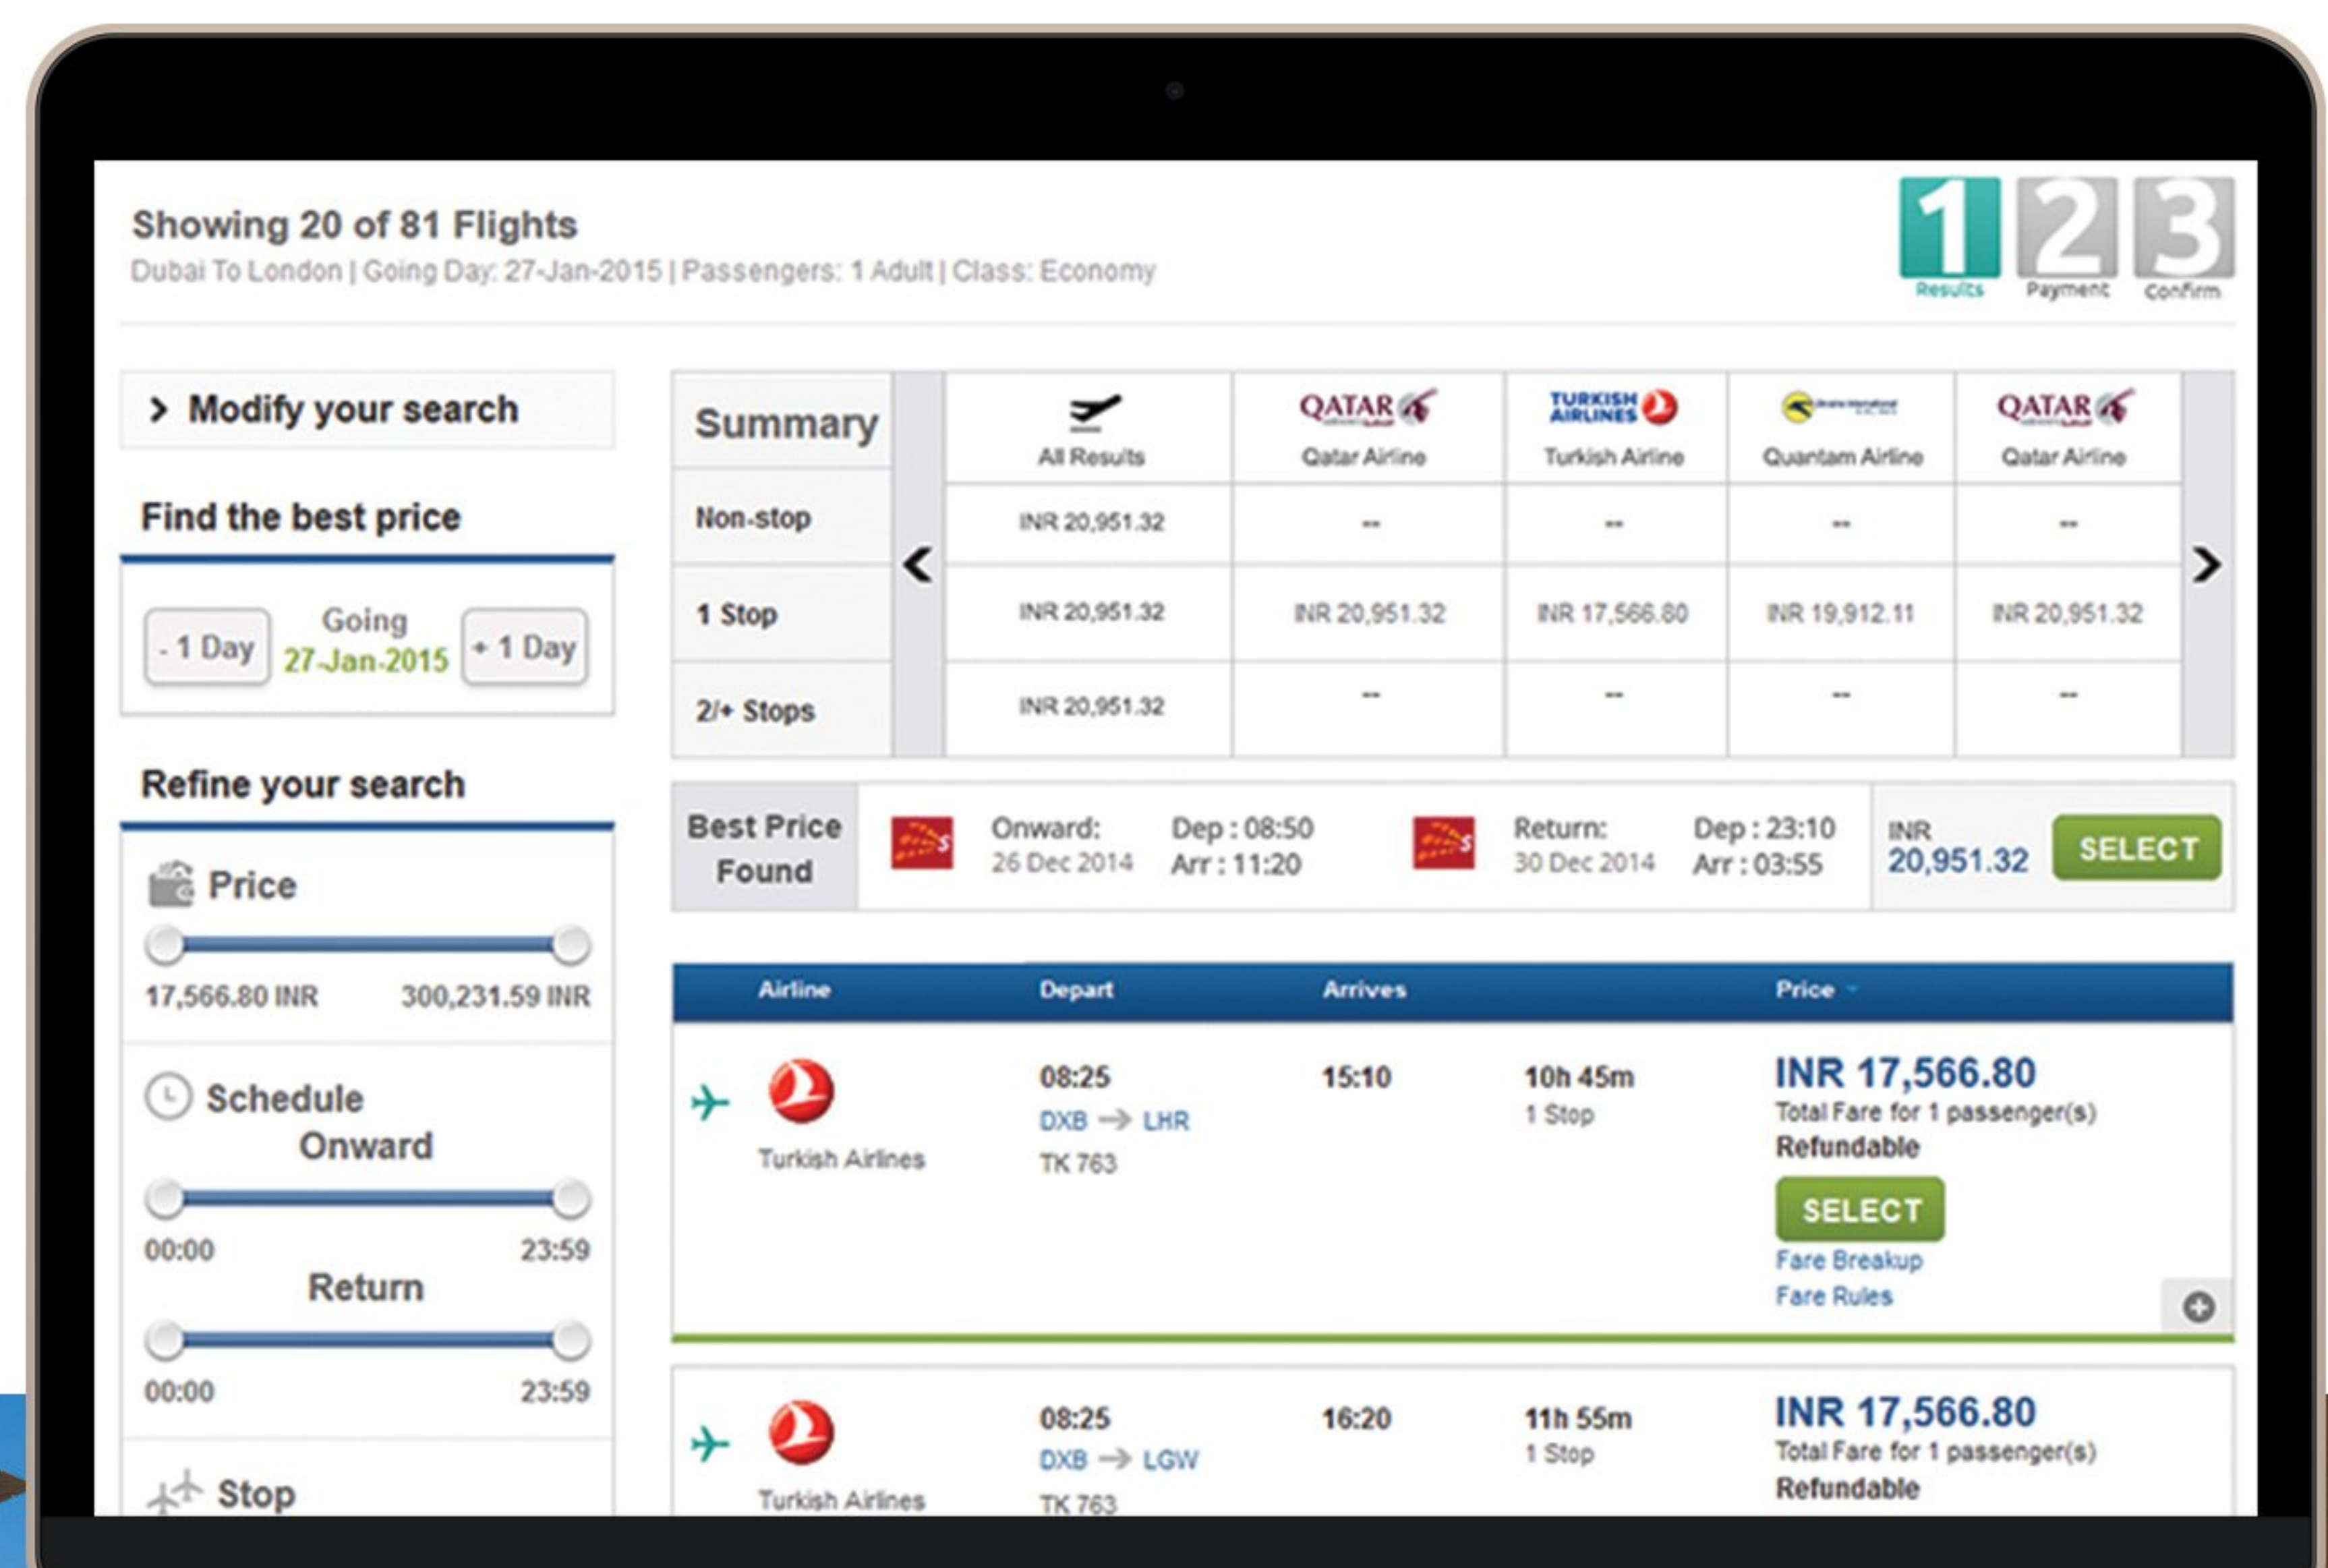

- ✓ Seamless contract management for hotels, sightseeing, car rentals, travel insurance, and transfers.
- ✓ Centralized maintenance of private and negotiated agreements for streamlined operations.
- ✓ Efficient allocation management to optimize hotel stays, sightseeing tours, and transfers.
- ✓ Multi-geography rate and allocation management for global scalability.
- ✓ Policy-driven handling of complex rules, conditions, and supplier agreements.
- ✓ Flexible seasonal offers, special deals, and discount management.
- ✓ Integrated booking engine for fast, accurate retrieval with quality and validity checks.

Flight inventory management system

The Flight Inventory Management System is an advanced solution designed to streamline the management and distribution of flight inventories across multiple sales channels. It automates pricing adjustments based on market demand, ensuring optimal revenue generation. Air aggregators and charter resellers can centrally manage pre-purchased flight inventory and seamlessly distribute it through online portals, agent dashboards, and XML web services. This system enhances operational efficiency, reduces manual effort, and provides real-time control over flight availability and pricing.

- ✓ Efficient Inventory Management – Centralized control over flight inventory distribution.
- ✓ Multi-Airline & Multi-Sector Support – Manage diverse flight inventories with ease.
- ✓ Comprehensive Fare Management – Maintain multiple fare sheets and conditions.
- ✓ Seamless Integration – Easily connects with existing booking engines.
- ✓ Flexible Class & Cabin Handling – Supports varied seat configurations.
- ✓ Real-Time Updates – Ensures accurate inventory and pricing availability.
- ✓ Tax & Fare Regulation Compliance – Automated handling of pricing conditions.
- ✓ Optimized Sales & Revenue – Manage inventory release periods for maximum profitability.
- ✓ Dynamic Pricing & Yield Management – Automated price fluctuations based on market demand.

NDC capability

QuadLabs is a certified NDC developer, aligning with IATA's New Distribution Capability (NDC) standards to enable seamless direct connections between airlines, travel agents, and technology providers. This advanced standard enhances communication, offering rich airline content and a transparent shopping experience. Travel agents gain access to real-time inventory, ancillary services, and last-seat availability across all fare types.

To streamline the booking experience, we integrate NDC content in a hybrid structure, merging it with other supplier content for a unified, comprehensive display across all sales channels.

Key advantages for travel intermediaries through NDC:

Air ancillaries & rich content

Access in-depth airline offerings, including WiFi, baggage options, meal preferences, and seat selection throughout the booking journey.

Cost advantage & greater transparency

Direct airline connections eliminate unnecessary markups, ensuring cost savings for travel agencies while granting travelers full visibility into airline offerings.

NDC hybrid content engine

Empowers TMCs and Corporates by consolidating airline-direct fares alongside GDSs, LCCs, and aggregators—ensuring the best deals in a single search.

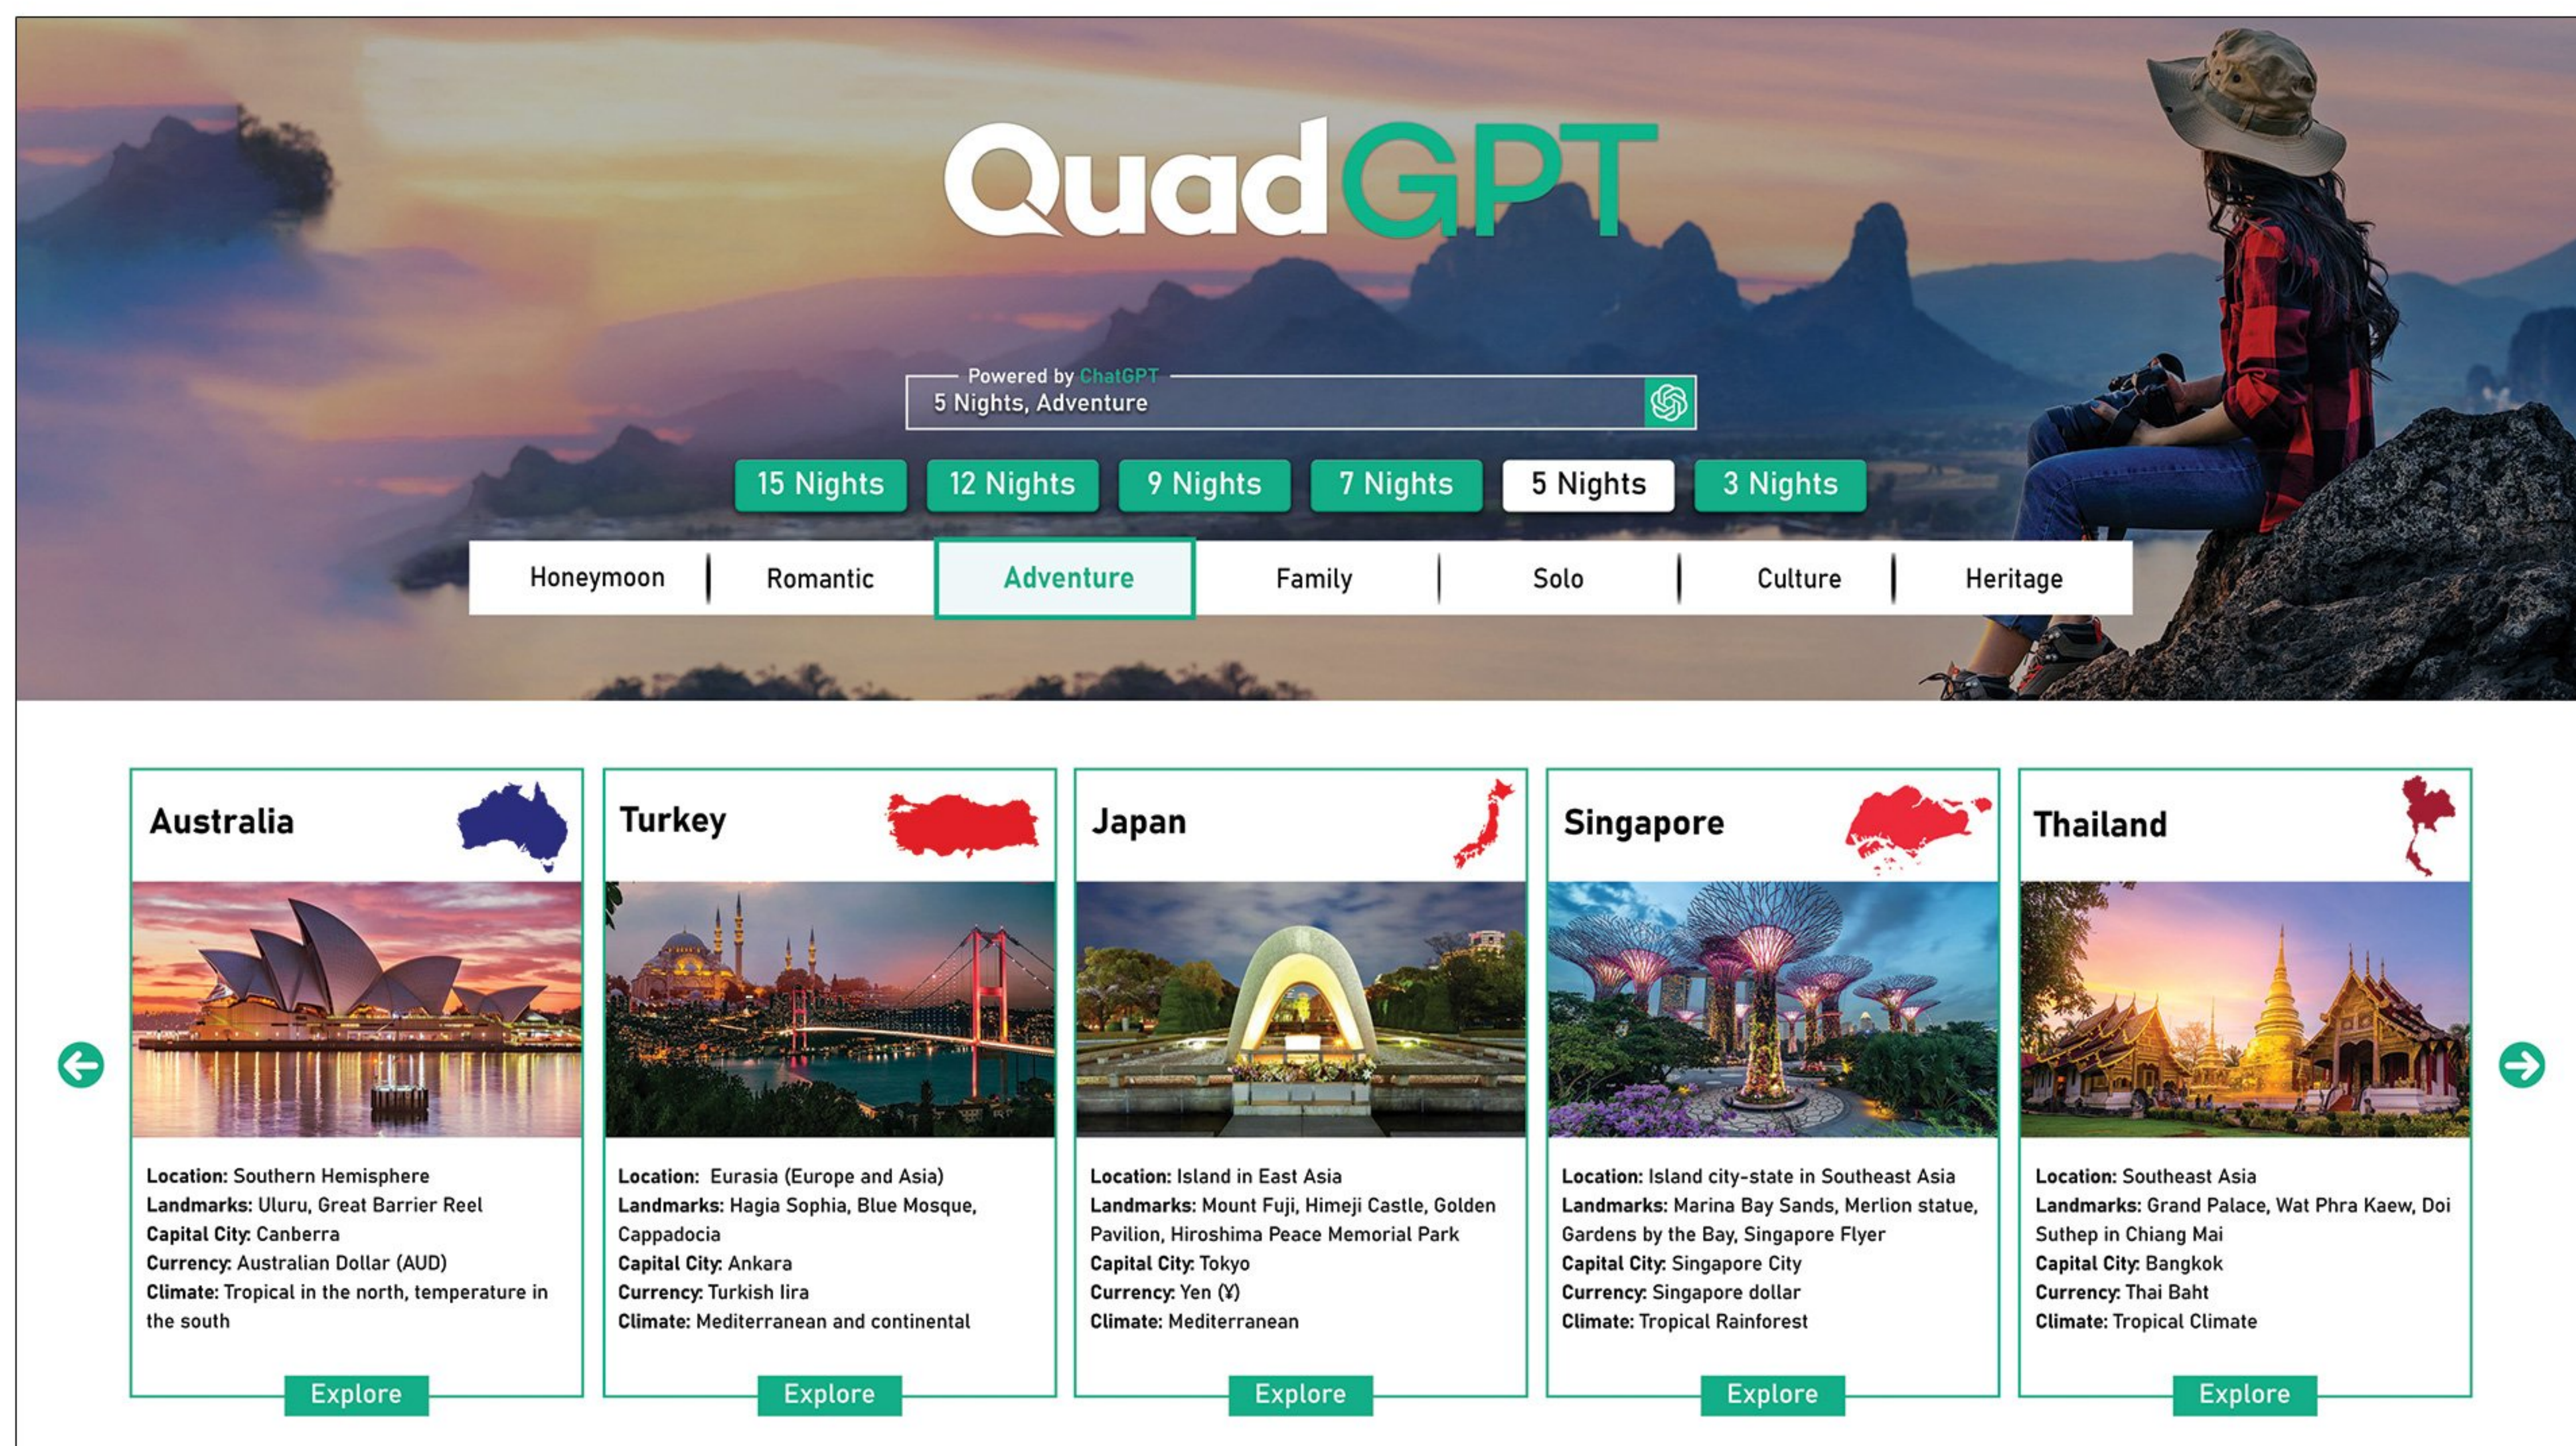

QuadGPT

QuadGPT is a next-generation AI-powered itinerary builder that redefines the way travelers plan and book trips. Designed to provide a seamless, intelligent, and fully personalized experience, QuadGPT enables travel agencies, OTAs, and corporate travel managers to offer dynamic, tailored itineraries with minimal effort.

Key features & benefits:

- ✓ One-Click Booking – Instantly book flights, hotels, and tours from a single platform.
- ✓ Budget Optimization – Get the best value with AI-powered cost balancing.
- ✓ Instant Itinerary Creation – Generate custom travel plans in seconds.
- ✓ Seamless Integration – Enhance your online travel portal with AI-powered booking.
- ✓ QuadGPT isn't just a tool—it's your virtual travel assistant for effortless trip planning.
- ✓ Smart Recommendations – AI suggests flights, hotels, and activities based on user preferences.
