# ProjectReady®

## THE DEMAND

### WHO WE SERVE

AECO  
Corporate Real Estate Owners  
Discrete Manufacturing  
State & Local Governments

### MUST-HAVES

A solution that:

- Adds value to your existing tech investments
- Promotes efficiency
- Ensures governance
- Reduces risk, re-work, and downtime

### KEY CHALLENGES

A single construction project may utilize upwards of six different products, including:

- Specialty platforms, project management tools, business operations software, applications, etc.

Data is siloed across platforms, products, and phases

Professionals and employees work across companies and often change across phases

Failure to easily access and use data to make informed decisions drives increased risk in the following areas:

- Labor
- Safety
- Litigation

Limited tech-savviness within the construction industry.

## Unlocking Microsoft 365 For The AECO

### Modern. Simple To Use. Repeatable Standards.

ProjectReady applies process over the leading AECO platforms, such as Procore and Autodesk, and applies those same processes to M365, SharePoint, and Teams. By bringing together industry-specific workflows and processes, users are empowered to collaborate on project information across platforms and teams - driving greater efficiency, reducing risk, and maximizing ROI.

80%

Increased Document Distribution

96%

IT Adm Overhead Reduction

### PROJECT INFORMATION MANAGEMENT OPTIONS

	Central	Enterprise
Set-Up		
Secure		
Sync		
Reporting*		
Email Management*		
Advanced Document Control		
Project Information Management		

\*ProjectReady's Central and Enterprise solutions feature advanced search, connected email, enhanced communication, cross-platform functionality and comprehensive dashboards. However, your specific access to KPIs, features, and functionality will depend on your specific subscription.

### SIX WAYS PROJECTREADY MAXIMIZES YOUR EXISTING MICROSOFT 365 SPEND

- ProjectReady drives increased Microsoft Power Platform consumption and increased E5 licensing.
- Client's Azure AD drives consumption and promotes security.
- Collaboration and communication driven by Teams.
- SharePoint streamlines document control & project close-out.
- PowerBI empowers users to make sense of their data.
- Data streams captured by ProjectReady feeds into a greater data lake that helps power Digital Twins.
