

artLynx uno, a single universe ethernet gateway

We are excited to announce the launch of artLynx uno, the latest product in our DIN rail ethernet gateway range.

As the inventor of Art-Net, Artistic Licence is well known for the quality of its ethernet gateway products (devices that convert Art-Net or sACN into DMX512/RDM). The [artLynx](#) range (pictured above) offers particular value for money, using the convenient DIN rail format and offering - until now - a choice of 2 or 4 universe conversion.

artLynx uno and DMX-Workshop

Now, with the launch of [artLynx uno](#), customers requiring a basic ethernet gateway can benefit from even greater savings. As the name suggests, artLynx uno is a slimmed down version of the product, providing just a single universe of data conversion. However, this is often adequate for customers without heavy data processing requirements.

artLynx uno is particularly targeted at users of [DMX-Workshop](#), the free software package written and provided by Artistic Licence. DMX-Workshop is a powerful diagnostics tool for the management, analysis and configuration of lighting networks, but requires an Art-Net ethernet gateway to link the PC to fixtures running DMX/RDM or DALI. artLynx uno provides an ideal solution, in a compact and economical form.

artLynx uno

- Converts 1 Universe Art-Net/sACN to DMX512/RDM
- RDMnet LLRP compatible
- Compatible with all variants of DMX512
- RDM V1.0 (E1.20 - 2010) supported
- DMX512 port protected from mains electrocution
- 10/100BaseT Ethernet

- DHCP or static IP
- Factory reset / squawk button
- PoE (IEEE 802.3af-2003 standard) supported
- Power indicator
- Network and DMX activity indicators
- DIN Rail mounting

About Us

Established in 1988, Artistic Licence specialises in lighting control, with a broad range of products that are all designed and manufactured in the UK. We also develop OEM technology for clients worldwide.

For project work, our in-depth technological knowledge enables us to offer custom-build solutions where no off-the-shelf product would be suitable. We routinely work with all the open lighting protocols, including Art-Net (which we invented), sACN, DMX512-A, RDM, RDMnet and DALI.

From stadium rock to sculptural art, and municipal works to designer hotels, we offer an eclectic and international outlook.
