

Restoring Health

IPM 2026

Dr Tina Peers MBBS

Naturopathic, wholistic practitioner

Cofounder of the DrPeersInstitute.org

What are we facing?

- We are seeing ill-health daily
 - in our clinics,
 - in our hospitals,
 - Our families
 - In our communities
-
- Please put your hand up if you have been affected
 - you know someone who is suffering
 - You know people who have died unexpectedly

Please do your own
research-all the
evidence is there

Multiple Signals:

1. CEO Scott Davison, of One America Life insurance company, stated in the share holder meeting Nov 2021 that there had been an increase of 40% in claims in 25-44 year olds after the roll out of the mRNA injections to this age-group.
2. An extra 65,000 young lives lost in 6 months. More than in Vietnam war.

Prof Angus Dalglish –
‘There are at least 12
mechanisms triggered
by the spike protein
that activate
oncogenesis.’

1. The Senate hearing featuring Senator Ron Johnson and Dr. Aseem Malhotra : took place on Wednesday, June 3, 2026.
2. "Plausible Mechanisms of COVID-19 Injections Causing Cancer and Attacks on Scientific Publications,"
3. Dr. Malhotra, a British cardiologist, testified alongside other experts including Dr. Angus Dalglish and Dr. Wafik El-Deiry discussing potential biological mechanisms linking COVID-19 vaccines to cancer risks and the suppression of scientific publications.

One of over 3500
peer-reviewed
publications on the
toxicity of the spike
protein

► Biomedicines. 2023 Aug 17;11(8):2287. doi: [10.3390/biomedicines11082287](https://doi.org/10.3390/biomedicines11082287) 

‘Spikeopathy’: COVID-19 Spike Protein Is Pathogenic, from Both Virus and Vaccine mRNA

MHRA Public Assessment report for the temporary authorization

The MHRA Public Assessment Report for the Temporary
Authorisation of the BIONTECH injections

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1112667/COVID-19_mRNA_Vaccine_BNT162b2__UKPAR___PFIZER_BIONTECH_ext_of_indication_11.6.2021.pdf

Please look at pages 16-21 where the safety studies are usually quoted. There were none.

www.react19.org

>3580
publications

1. Pfizer's own post marketing 6 monthly report published 28th February 2021 showed they were aware of:

1223 deaths directly attributed to the injections

1221 serious adverse reactions (9 pages of alphabetically arranged conditions in Appendix A) odysee.com

2. International study conducted by the Global Vaccine Safety Research Project with over 99 million vaccinated individuals given 252 million doses-13 AESI studied:

Faksova, K. et al. (2024). COVID-19 vaccines and adverse events of special interest: A multinational Global Vaccine Data Network (GVDN) cohort study of 99 million vaccinated individuals. *Vaccine*, pp.S0264-410X(24)00127-0.

CDC has claimed that the vaccines have caused 'the largest carcinogenic exposure in human history.'

Korean study 8.4 million published in IMA -only truly independent journal

<https://journalofindependentmedicine.org/>

Vol 1 No 3:

Review article on mechanisms by which Covid 19 mRNA induces Turbo cancers

The SARS-CoV-2 spike protein may interfere with core regulatory pathways of carcinogenesis, including metabolic reprogramming, immune surveillance, apoptosis resistance, and stem cell proliferation.

'must be investigated further with objectivity and scientific rigour [as a matter of urgency]'

What does spikopathy cause?

- Microclots (? from positively charged spike protein and other contaminants in the vials)
- Thrombosis: heart attacks, strokes, pulmonary emboli
- Myocarditis
- Immunosuppression
- Neurological pathologies; Guillain Barre, tonic/clonic seizures, ALS ,
- Turbo cancers
- Prion diseases
- Psychiatric disorders including suicidal ideation- Dr James Thorpe's paper 84 neuropsychiatric conditions
- Infertility
- Miscarriages, preterm labour, intrauterine deaths, congenital abnormalities, maternal deaths
- Mast cell activation, Dysbiosis (gut flora imbalance-destruction of Bifidobacterium) resulting in reduction in GABA

What are we seeing in the clinics?

Chronic inflammatory illnesses

MCAS

Hyperinflammation

POTS/dysautonomia

Neurological conditions –ALS, OCD, Suicidal ideation

People unable to work, unable to function.

Disability allowances in the UK are now greater than total taxation income

How to detoxify from the spike protein:

Augmented NAC detaches the spike protein, denatures it and the fragments are then excreted into the urine. www.zerospike.org/en

Case studies

1. My vaccine injury and recovery with ANAC
2. 54 year old nurse Meegan with mycocarditis and heart failure.45% function to 100%
3. 17 year old , from age 12 severe OCD and suicidal ideation. Full recovery in days

4. Michael Oesch in Canada

‘Why can’t we talk about this’ 2024

<https://www.youtube.com/watch?v=XwjDeRglkwg>

Sequel 2026 Dean Rainey Film maker

please read some of the comments from other injured and bereaved people.

<https://store.augmentednac.com/via=?wellness>

One three times a day for 3 months then one daily

Also take molybdenum and selenium

Please see www.DrPeersInstitute.org

Register and access the PPT on MCAS

New comprehensive model. 7 stages of healing - New Medical Curriculum:

1. Environmental/toxins
2. Physical/biochemical/structural
3. Light/energy/mitochondria
4. Emotional/trauma
5. Intellectual/ego/defences
6. Soul/authentic self/persona/family soul
7. Spirit/Unified field/G.O.D

The magic of Mitochondria

Approx 500 trillion in the body

Producing the power of an AA battery in each cell

32% of body weight

70-80 kg of ATP per day

1. ATP production

2. Cell danger response : Defense

3. 70% of mitochondrial output comes from **Light, water and magnetism**, 30% from food

The magic of light- Quantum coherence

1. We collect photons from the sunlight
2. We emit biophotons from mitochondria and DNA
3. Biophotons regulate 100,000 biochemical processes per second in each cell
4. Many biochemical compounds absorb and emit light at specific frequencies- neurotransmitters, hormones, NO
5. Emotions can interfere with the coherence of these compounds by disrupting the photons
6. Calmer states, breathwork, gratitude stabilize the biophotons leading to coherence and order.
7. The biophotons direct our biochemistry faster than nerves, throughout the body-in picoseconds (1 trillionth of a second)

Cell Danger Response

Dr Robert Naviaux
CDR map: healing
cycle

1. Electron flow determines health-need to ensure you rebuild your electron flow
2. Non- native EMFs destroy quantum coherence in our cells
3. When cells are under threat, CDR is initiated and energy production reduces
4. This should be temporary/adaptive response but can get stuck leading to chronic inflammation and disease

1. When CDR is triggered numerous biochemical changes occur
2. The mitochondria prioritize survival over function
3. Patients often become highly sensitive and react to everything
4. Cell death with extracellular ATP and mitochondrial DNA triggers the mast cells
5. Triggers must be removed and salugenesis restored (restoration of biochemical balances)

MCAS and CDR

1. The Health Cycle as the foundation for all healing
2. Disconnection from nature as the root of chronic illness
3. Stage 3 interventions: light, circadian rhythm, grounding, magnetism : Building Biologist
4. Redox regulation, hydration, and the role of EZ water
5. Breath retraining, the BOLT score, and nervous system coherence
6. Cold exposure and photobiomodulation
7. Environmental coherence as the container for salugenesis
8. Healing as reconnection with nature's rhythms and intelligence

All of critical importance

Thank you for
your
attention!

1. Please register on www.DrPeersInstitute.org
2. You will have access to some PP presentations, there will be podcasts and newsletters and interesting content.
3. A place for practitioners from all modalities to be able to discuss, teach, learn and hear about some of the latest developments- particularly in the quantum field.
