# iomart

COMPLETE CLOUD SOLUTIONS

About iomart

20:20 Vision

We have been delivering digital transformation and managed IT infrastructure for over 20 years, helping organisations of all sizes to maximise cost effectiveness, flexibility and security in the cloud.

We're with you every step of the way - from design, build and migration, through to providing an ongoing managed service with 24/7 technical support.

Bespoke Solutions

We have built long-standing relationships with key partners including AWS, Microsoft and Google Cloud to ensure that we're delivering leading-edge cloud solutions.

Our agnostic approach to technology and cloud platforms allows us to provide independent advice, only recommending what best suits your business and operational requirements.

Most Accredited

One of the most commonly cited fears for companies considering outsourcing elements of their IT infrastructure to the cloud is data security.

As an ISO and industry accredited managed cloud services company in the UK, you can be sure your data is in safe hands.

Managed Services

Cloud Edge Support

Cloud Edge allows iomart to become an extension of your IT team with easy access to 3rd line support resource online.

This service is available as a standalone service and provides support on a wide range of technologies including Microsoft Azure, Azure Stack, Office365, Sharepoint, Exchange, Windows 10, AWS and security.

Domain Management

Our domain name management service actively manages your digital assets ensuring business continuity, on hand advice and ongoing brand protection.

Our service covers domain name resolution, acquisition, renewals, transfers and monitoring to ensure your domain names are fully protected.

Cloud Email

Complete enterprise grade business email and collaborative message services including integrated social media accounts, delivered in the cloud.

Easy to use, highly available, secure and cost effective, designed for today's communication needs and backed by our guaranteed SLAs.
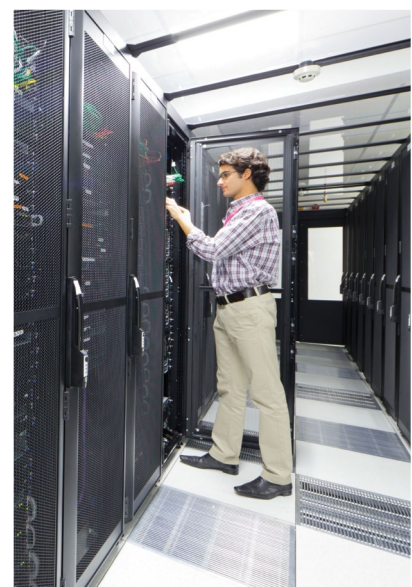

Managed Office 365

With Office 365 from iomart you can get your work done from anywhere and on any device.

We manage the complete customer experience, providing all the benefits with the added support and cloud expertise of iomart.

Managed Microsoft Exchange

Enjoy the benefits of Microsoft Exchange for your business without the cost and hassle of managing it.

Hosted within our state-of-the-art data centres, this email solution is secure, resilient and backed by our impressive SLAs.

Digital Transformation

Strategy Engagement

We design and deliver independent, high level strategies and roadmaps to optimise your IT environment and meet your business objectives.

We create cost models with a clear indication of TCO and ROI, giving your leadership team complete confidence in the timescales and outcome.

Cloud Enablement

We have a team of certified technical experts who work with you to help transform your IT environment and optimise your applications for the cloud.

They perform an analysis of your existing estate and produce a detailed roadmap to achieve the desired results.

Modern Workplace

Boost collaboration and improve productivity in your work place by enabling your people to work from anywhere at any time.

We ensure your users can access company resources using secure systems and devices that meet your compliance requirements.

Data Protection

Cloud Backup

Using enterprise grade platforms, we offer the most robust and secure cloud Backup as a Service for both physical and virtual environments. Application aware agents deployed to each network endpoint (laptop, desktop, server etc.) and backup schedules and configuration managed through iomart's proprietary secure web accessed control panel.

Cloud Storage and Archiving

Secure and intelligent protection for your valuable data assets. From file sync and share, to unlimited capacity options for large IT estates, we remove the burden and expense of on-site storage solutions.

With military grade encryption and multi-site, multi-user options, we deliver the most scalable, flexible and secure archiving solutions for any organisation.

Data Management

Simplify your secondary data protection and management on a single hyperconverged, scalable platform, fully configured and managed by us. Manage data retention and compliance across all clouds, eliminate data silos and derive valuable insight from previously untapped data. We configure the platform to your requirements and provide SLA-driven 24/7 support.

Business Continuity

Disaster Recovery as a Service

Working seamlessly with our Cloud Backup solution, our DRaaS solution provides complete peace of mind. Managed through our online control panel, we can rapidly restore your business critical data with industry-leading RPOs and near instant RTOs to minimise any disruption or revenue loss.

Hosted Virtual Desktop

Enable your workforce to access business applications and data anywhere at any time, through any internet-connected device.

Provision new users in seconds, configure hand-held devices and scale up and down as required.

Dynamic Workplace Recovery

Ensure your staff can get back to work and connect to your IT systems as quickly as possible in the event of an emergency.

Gain access to an unparalleled network of over 3000 office recovery locations with internet and telephony connected workspaces.

Global Network and Infrastructure Services

Global Data Centres

Wherever you do business across the globe, iomart provides the infrastructure to support your international ambitions.

We own and operate ISO-accredited data centres across the UK. We also have multiple Points of Presence in Europe, the Middle East, North America and Asia-Pacific, connecting your business to a huge range of Tier 1 networks.

Colocation

The cost-effective way to house your equipment within our state-of-the-art data centres. Our robust and secure infrastructure can easily scale to meet demand, providing a reliable service fully supported by our onsite teams. With our high-speed connecting fibre network and uptime guarantee, we offer (and deliver) industry-leading SLAs.

ServiceLink

iomart has been delivering robust connectivity solutions and a comprehensive range of network services for over 20 years. From fully managed high speed IP-VPN to dedicated direct Internet access, Content Delivery Networks, and most recently, private connectivity to over 50 different cloud providers including AWS, Microsoft Azure and Google Cloud.

Our consultants and solution architects will work with you to deliver a high performance network service covering single and multiple offices, different geographic locations and multi-cloud architecture.

Available as a fully managed service, providing robust SLA backed connectivity, security and resilience, while you maintain full control and visibility via the iomart control panel.

UK Fibre Connectivity

We own the most advanced and resilient network in the UK, meaning you get unrivalled performance and security, backed by our industry leading SLAs and 24/7 managed support.

We route over 300 Gigabits per second of traffic at peak times and have over 1 Tbps of internet capacity available at any time.

DDoS Protection

Advanced, automated DDoS threat detection and mitigation. We've partnered with one of the world's leading providers of DDoS prevention technology, to offer cost-effective protection of your networks from attack.

Managed Cloud Hosting Solutions

Dedicated Servers

Raw power with guaranteed computing performance. High performance hardware racked and ready to go.

Simply deploy your preferred range of computing options to create your cloud solution with the entire server compute power for your sole use – perfect for meeting high compute demands.

Azure Stack

Realise the potential of hybrid cloud using Microsoft Azure Stack to move workloads across public and private clouds.

Leverage the power of hyperscale public cloud services through our ultra-secure ISO-accredited UK data centres while maintaining control over your data and applications.

Managed AWS

Allow your applications to take advantage of AWS with the added convenience of expert management.

As an AWS partner, our team of account managers have a full knowledge of all available solutions, allowing us to tailor the service to exactly meet your needs.

Hybrid Cloud

The perfect solution for organisations that need to strictly control core elements of their IT network, but want to extend into a secure cloud environment.

Blended mix of physical servers and public and private cloud solutions, fully secure and accredited, allowing you to develop complex and bespoke architectures to exactly fit your needs.

Managed Cloud

The ultimate enterprise cloud experience – designed to deliver outstanding reliability and results.

Our fully managed shared hardware platform delivers flexible and scalable cloud solutions from on demand virtual servers and storage. It is backed by our secure infrastructure and SLAs.
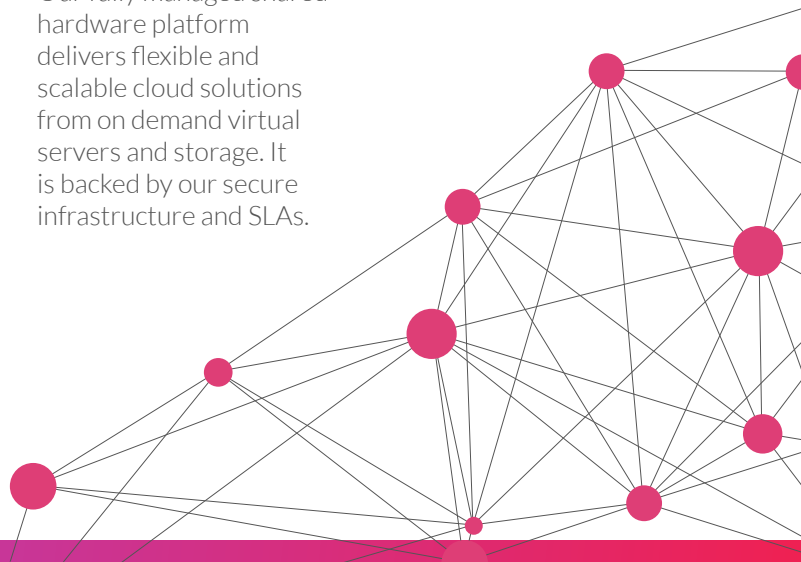

Private Cloud

Dedicated infrastructure, platforms and software, in an easily managed and cost effective solution.

The perfect solution to the toughest security and compliance challenges. This provides a dedicated resource without losing the protection or speed of an on premise solution.

Managed Microsoft Azure

Microsoft's Azure platform offers a range of integrated services, from analytics and computing, to databases, mobile, networking and storage.

Let us manage your Azure environment while you focus on business growth.

Why we're one of the World's Leading Cloud Companies

Working with you at every stage of your cloud journey – from discovery to delivery – we help you navigate the complexities involved in building and operating cloud platforms.

As accredited experts in all flavours of managed cloud - public, private and hybrid - we are vendor, platform and technology agnostic and will only recommend the cloud environment to meet your specific strategic business needs.

With a global infrastructure, fully certified to supply services to both the public and private sectors, and with over 300 technical experts on hand, we are ideally placed to deliver.
