INFRASTRUCTURE

COLOCATION SERVICES

Secure and connect your assets in our data centres

There are many reasons why you might want to move your IT infrastructure off your business premises: you want to go cloud first but aren't quite ready to make the leap; you want to cut costs and free up office space; you want to minimise risk and improve business continuity. Whatever the reason, colocation is the solution.

iomart offers the perfect home for your hardware – providing power, cooling and protection for your compute, storage, legacy applications and network equipment - 24/7, 365 days a year. Then, when you decide to move on to private or public cloud, virtualisation or bare metal hosting, you can do it all with us too.

Take your first steps towards the future with us.

Why iomart?

iomart is an experienced provider of hosting and multi-cloud services. We take care of your hardware in data centres we own and operate across the UK, interconnected via our private fibre network which can be lit to 1 Terabit+.

Whether you want a primary colocation site with convenient access to your equipment, or a secondary site for disaster recovery purposes, we have a range of set-ups and locations to meet your needs. Where you have particular requirements around compliance, we offer cages and additional highly secure solutions to support you.

Our partnerships with major telcos and peering providers enables us to provide highly secure UK and global connectivity via dedicated connections and Internet links.

Key Benefits

> Cost Efficient

Power, cooling and connectivity all bundled up in a monthly bill.

> Built-in Resilience

Infrastructure, network, power, cooling and security designed and engineered with multiple layers of N+1 redundancy and advanced monitoring and testing of all systems.

> Security

Manned security, 24x7x365 CCTV surveillance (minimum of 90 days retention for PCI DSS) and biometric access. Physical access is strictly controlled and requires pre-authorisation.

> Carrier Neutral

Connections to multiple Tier 1 carriers in the UK to provide dedicated private network and internet connectivity.

> Connectivity

High speed and resilient connectivity between our data centres and the world's busiest communication hubs with resilient internet provision and links out to your headquarters and remote offices.

> 100% Uptime SLA

Power considerations are vital to ensure availability. We offer a 100% uptime Service Level Agreement for assurance against the risk of data centre downtime.

> Additional Services

Remote hands to carry out physical tasks on your behalf; additional monitoring; and patch management are also available.

> Energy Management

Effective management systems in place to reduce environmental impact and improve energy efficiency.

Data Centre Expertise

Each iomart data centre within the UK is built in line with Tier II and Tier III standards. We provide advanced data centre technology in nine UK cities with each facility staffed by skilled technicians and supported by our UK-based Network Operations Centre. Our permanent in-house engineers configure the server environment that best suits your business requirement. They monitor, test and evaluate all systems and components 24 hours a day, 7 days a week, 365 days a year.

> Racks, Cages, Cabinets and Suites

A range of cages, suites and server cabinet solutions depending on the requirements you have for security and power usage.

> Standard Colocation

Un-managed colocation of servers in standard 42U dual power supply cabinets or vendor cabinets in hot or cold aisles.

> High Density Colocation

Cabinets with appropriate power and cooling to house more power hungry equipment within a single footprint.

> High Security Colocation

Bespoke caged enclosures for all or some of your cabinets to meet your compliance or security requirements.

> Managed Colocation

Additional managed services - monitoring, patch management and remote hands - specifically tailored to your requirements.

> Connectivity

Private interconnects between our data centres, your offices, high speed internet services and the public cloud.

Renting space for your servers in our fully managed data centres gives you the ability to run your critical infrastructure in secure and scalable facilities and free yourself to focus on your business.

As a financially stable company listed on the Alternative Investment Market iomart offers you a strategic long-term hosting partner.

You won't find a better home for your hardware.
