About iomart

20:20 Vision

We have been managing secure IT infrastructure for over 20 years.

We are with you every step of the way - from design, to implementation, and ongoing management - helping you to be cost-effective, connected, scalable and secure in the cloud.

Managed Services

We offer fully managed cloud, security and network solutions that meet your business requirements and operational needs.

Our expert teams provide technical support 24 hours a day, 365 days a year.

Most Accredited

We are proud to be the most accredited and ISO certified managed cloud services provider in the UK.

You can be sure that your data and IT infrastructure is in safe hands.

Managed Services

Managed Cloud

Cloud management from the experts for outstanding outcomes. Our fully managed cloud services include, dedicated private cloud, public cloud and hybrid cloud, backed by guaranteed Service Level Agreements.

Managed Connectivity

Our fully managed network services connect you to your workloads and applications in the most efficient way. Connecting your offices and people, no matter where they are located.

Managed Security

Our fully managed security service protects your systems, detects suspicious activity and takes action to nullify threats. Defence-in-depth from cyberattacks that delivers complete peace of mind.

Managed Infrastructure

Our fully owned UK data centres and private fibre network, and our global presence, connect your services across the world. Expert technical teams build, manage and monitor your solutions 24/7/365.

ServiceLink Key Features

Managed SD-WAN

Hybrid, low latency, high bandwidth connections between branch locations, data centres, public cloud and SaaS, over the same infrastructure, fully managed by iomart.

iomart's Managed SD-WAN is a Silver Peak Unity EdgeConnect™ edge platform that we install, maintain and manage round the clock.

- 
Centralise Control
 Centralised orchestration for managing and updating policies.
- 
Prioritise Traffic
 Use MPLS for critical applications and internet for lower priority traffic.
- 
Reduce Costs
 Guarantee uptime without the need for expensive network equipment.
- 
Improve Security
 Stop unauthorised traffic entering the branch.
- 
Simplify Management
 Connect any number of cloud estates through a single pane of glass.
- 
Guarantee Performance
 Select the optimal route for mission-critical applications.

CloudLink

Connect branch and remote offices directly to public cloud.

CloudLink from iomart delivers private direct connections to major public cloud providers.

- 
Global Connections
 Private direct connections to Microsoft Azure, AWS and Google Cloud, plus 30+ major public cloud providers in Europe.
- 
Simple Architecture
 Deployed as a single circuit or in highly resilient dual circuit architecture for mission-critical applications.
- 
Cost Efficient
 No need for expensive MPLS and Internet Exchange circuits.
- 
Guaranteed Service
 End-to-end SLA covering provision of third party services.
- 
Technical Support
 Expert cloud and network skillset backed by 24/7 management.
- 
Improved Performance
 Enhance productivity by directly connecting your people and locations to their cloud services.

Last Mile

Connecting your business to the Internet can be a significant challenge.

iomart works with leading service providers to manage the delivery of high performance, cost-effective communications solutions direct to your premises.

Fibre to the Premises (FTTP)

Fibre optic cable delivers digital data at high speed to your premises. If you are a growing business then the speed and bandwidth offered by FTTP will deliver a high quality and consistent service.

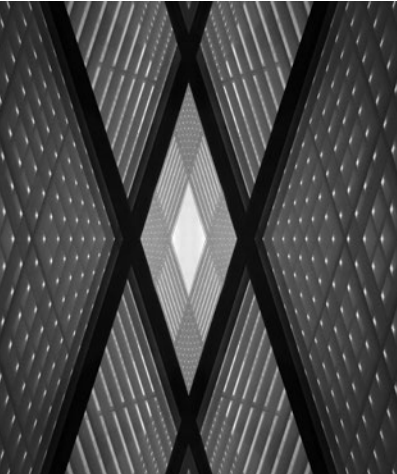

- > Faster connections
- > Dedicated connectivity
- > Capacity to support future growth
- > Ideal for cloud-ready internet and private network

Ethernet over Fibre to the Cabinet (EoFTTC)

Copper wire links from your business premises to the nearest street cabinet and a shared fibre optic circuit to the local exchange. Ideal for cloud-ready Internet access and private network connectivity.

- > Cost-effective bandwidth
- > Low cost connectivity
- > High speed and good reliability
- > Quick installation

ServiceLink Key Features

Managed WAN Services

Managed WAN services from iomart offer an end-to-end solution for your connectivity. MPLS IP-VPN provides more flexibility and scalability, allowing the creation of WANs between locations with different last mile connections.

-  **Managed Service**
We take complete responsibility for the service, from planning through to in-life, including arranging all tail circuits and routing equipment.
-  **Optimised Performance**
Actively tune your network to deliver the performance to match your evolving requirements.
-  **Scalability**
Add new sites quickly while keeping control of costs and maintaining network performance.
-  **Cost Efficient**
An affordable way to consolidate IT and telecoms traffic.
-  **Increased Control**
Centralise control with one set of operating costs and one network to manage.
-  **Voice and Video**
Minimise latency and increase network stability for voice and video communications.

Data Centre Interconnect

Data Centre Interconnect from iomart delivers high capacity, highly resilient, physical connections between data centres, to support your business requirements.

Ideally suited for disaster recovery solutions where low latency is critical.

-  **Increased Stability**
More predictable network performance.
-  **High Availability**
Guaranteed connectivity in the event of a network failure.
-  **Easily Scalable**
Add extra capacity and connections as your requirements change.
-  **Fully Managed**
Expert cloud and network skillset backed by round-the-clock management.

Media Streaming

Capture live TV, radio, satellite and cable channels and use our multicast platform to stream them directly over an IP network at any resolution, to any destination.

Streams are directed to your hardware in our data centres, to virtual machines provided by us, or to your chosen public cloud provider.

-  **Satellite Downlink**
Optical fibre distribution from onsite satellite farms.
-  **Cloud Connectivity**
Direct connectivity to hypercloud providers AWS, Microsoft Azure and Google Cloud.
-  **Low Latency**
Dark fibre network to deliver scalability, resilience, high bandwidth and speed for high volumes of data.
-  **Media Hub**
Encoding, streaming, OTTV, multicast networks and media related services.
-  **Content Delivery**
Access to leading content delivery networks.
-  **Global Connectivity**
Access to multiple on-net global and regional network and telco providers.

Why iomart?

For over 20 years iomart has helped growing organisations to maximise the flexibility, cost-effectiveness and scalability of the cloud. From data centres we own and operate in the UK, and from connected facilities across the globe, we help you navigate the complexities involved in building, securing and operating large IT environments.

Listed on London Stock Exchange (AIM: IOM)

£100m+ revenue

350+ highly skilled technical staff with deep knowledge of cloud

13 fully owned UK data centres

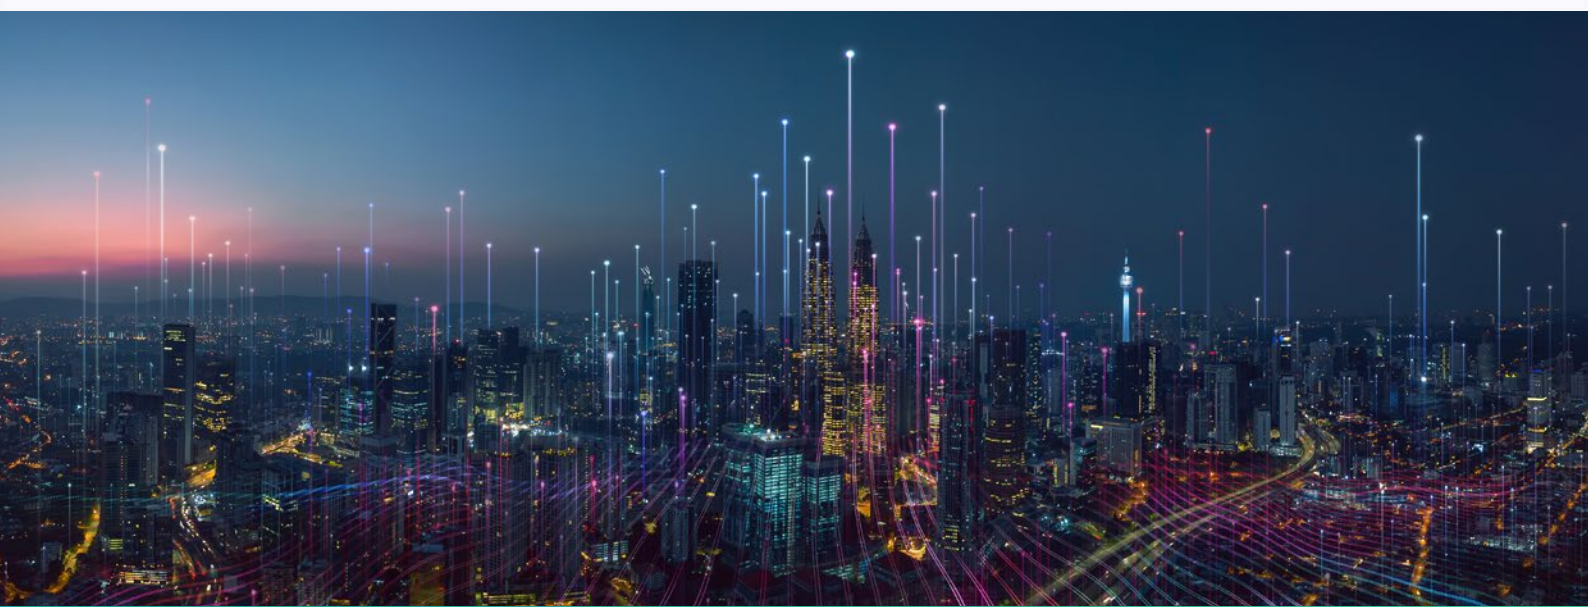

Dedicated UK private fibre network

25+ global Points of Presence including EU

We connect your people to their applications
and your business to its workloads.

Build a network for the multi-cloud world with iomart.

Connectivity

Great connectivity and guaranteed network performance is essential in a rapidly evolving multi-cloud world.

ServiceLink from iomart is a comprehensive portfolio of services to meet the demands for network agility, security and scalability.

Benefit from guaranteed performance; low latency; and end-to-end Service Level Agreements that cover internet connectivity. Manage and connect complex workloads cost effectively across multiple clouds and locations.

At the core of ServiceLink is iomart's fully owned data centre infrastructure, private fibre network and global reach, all backed by our industry-leading accreditations and managed services expertise.
