Making Business Simple

At Herbst Software, we've spent the last 40 years helping businesses in Ireland and the UK work smarter, not harder. As a fully Irish-owned company, we know what it takes to keep teams connected, processes smooth, and managers confident in their decisions.

Our business management solutions aren't just software: they're tools designed to make everyday work easier. Whether it's helping your team collaborate seamlessly, reducing repetitive tasks, or giving managers real-time actionable insights to make better decisions, we focus on solutions that make a real difference for the people using them.

And we don't just hand over the software and walk away. Our Continuous Customer Care team is here to support you every step of the way: from smooth migration and quick deployment to bespoke solutions tailored to your unique needs. We combine technical know-how with industry expertise to make sure your business gets the support it deserves.

When you call us, we answer. No chatbots, just real people ready to help. Our support team knows your system, your setup, and your business.

At Herbst Software, our goal is simple: empower your people, streamline your work, and help your business thrive.

And with regular major updates throughout the year, your system stays future-proofed and continuously improving.

Industries we serve

Distribution

Food & Beverage

Engineering

Quarry

Precast

Ready Mix

Waste & Recycling

Agri Trade

Oil Distribution

Manufacturing

Our Mission

To empower individuals to work as a team to achieve company goals efficiently and effectively.

Business Intelligence

Empower employees with instant access to the insights they need. Turn data into action and decisions into results.

Herbst gives us one place of truth across the organisation. It lets us gather our data, do our analytics and really get to the root of issues.”

Tadgh Collins

Head of Management, Accounting & ERP Development
Irish Dog Foods

With real-time data at your fingertips, our built-in intelligence keeps your business one step ahead.

- Fully integrated BI across the entire system
- Instantly access real-time information directly from ledgers
- Customisable dashboards available in every ledger
- Pivot, filter, and summarise large data sets with ease
- Instantly view complete histories to identify patterns and trends
- Drill down from summaries to original source documents
- Let each user tailor BI tools to their specific role or operations
- Apply advanced filters to quickly identify exceptions and outliers
- Generate detailed, flexible reports with the built-in report writer
- Automatically share key KPIs via scheduled email or SMS updates.

Business Processes

Assign, prioritise, and monitor tasks. With full visibility.

“

Before Herbst we had problems communicating between our sites. Since implementing it, we have visibility of purchasing, stock management and operations, and it has helped us grow much faster than we expected.”

Ken O'Brien

IT & Projects Manager - Pressure Hydraulics & Controls

Empower supervisors to create, delegate, and manage operations with ease.

- Simplifies workflows for smoother execution and faster results
- Automates and organises daily operations for greater efficiency
- Provides real-time visibility into every process and status update
- Empowers managers to track progress and spot bottlenecks early
- Streamlines task delegation and accountability across teams
- Boosts agility and responsiveness in a changing business environment
- Ensures seamless handovers between tasks, teams, and departments.

User Dashboard

See what matters at a glance with an intuitive, customisable dashboard designed for instant clarity and quick action.

“

I can look at the dashboard and see my sales, my gross profit and stock levels on a live basis. Everything is there and visible.

Joe Deacon

Managing Director - Distag QCS

Personalise your dashboard to display the exact information you need. When you need it.

- Tailored interface delivering role-specific data and insights
- Fully customisable to meet individual user needs
- Simplifies daily tasks with quick access to key information
- Presents real-time data at a glance for instant awareness
- Provides accurate, timely insights to support confident decision-making
- Monitors key performance indicators and overall progress in one view
- Highlights opportunities for improved resource allocation and efficiency.

Sales Ledger

Connect your sales team with every department to improve communication and collaboration effortlessly.

Once the invoice is raised, it is emailed to the customer in real time. We also send our monthly statements through it, and what once took hours now takes minutes.

Colin Egan

Finance Director - Banagher Concrete

Keep your sales team informed and agile with real-time access to key information.

- Manage sales pipelines and track ongoing correspondence seamlessly
- Create quotes quickly and monitor their status in real time
- Customise the telesales interface for fast, accurate order entry
- View live dispatch details directly from customer accounts
- Promote new product lines with targeted marketing campaigns
- Group, classify, and organise customers efficiently
- Store external files, contracts, and documents with customer records
- Generate exception views to identify lapsed or stalled sales
- Instantly access stock levels and related product information
- Implement flexible, dynamic pricing to suit your business needs.

Credit Control

Gain complete visibility and control over credit management with seamless integration across all business processes.

“

Using secure user profiles, I can select which team members can set credit limits or freeze accounts, giving us control and accountability.”

Padraig Tully

Managing Director - Tully Nurseries

Gives management the tools to monitor and control credit risk effectively.

- Initiate credit validations right from the order stage
- Automatically restrict dispatch for overdue accounts
- Apply flexible and detailed credit constraints per customer
- Calculate and charge interest on selected overdue balances
- Maintain a full record of all correspondence and communications
- Send instant updates with integrated SMS functionality
- Simplify management of high-risk or difficult accounts
- Receive on-screen credit alerts for overdue customers
- Automate personalised debtor letters to save time
- Assign customer credit ratings for more meaningful aged analysis.

Relationship & Marketing (CRM)

Empower your teams with a CRM that unites customer and supplier data, revealing opportunities where they matter most.

“

Our sales reps can meet clients and have notes on what products or services they may need. All calls, texts and emails are tracked, so you can see exactly what dealings we have had with every customer.”

Martin Bourke
General Manager - FRS Cahir

Combining CRM, marketing, and account management in one powerful platform.

- Manage sales pipelines efficiently
- Track and retrieve correspondence effortlessly
- Organize customers to uncover new opportunities
- Leverage real-time data to identify lost sales
- Streamline account management with powerful tools
- Run targeted campaigns via email, fax, or mail
- Send SMS promotions directly to relevant customers
- Categorize and differentiate all types of correspondence
- Schedule, follow up, and map activities on a shared calendar.

Purchase Ledger

Streamline your purchasing process with a system that boosts efficiency, reduces errors, and keeps your spend under control.

A photograph of a man with a beard and mustache, wearing a dark blue baseball cap and a dark jacket over a plaid shirt. He is holding a large cardboard box in front of him. In the background, there is a white van with its rear door open, revealing more cardboard boxes inside. The scene is outdoors with trees and a building visible in the distance. Three teal circles are overlaid on the image: one to the left of the man's head, one to the right, and one below the man's head.

“

Before Herbst we had very little communication around purchasing. Now we have full traceability between purchasing and stock management across all our sites.”

Ken O’Brien

IT & Projects Manager - Pressure Hydraulics & Controls

Gives leadership the tools to safeguard operations and control risk effectively.

- Manage the entire procurement process seamlessly
- Built-in supplier account management for better relationships
- Integrated stock and sales ledger for full operational visibility
- Special pricing and contract management for optimized deals
- Product and supplier approval workflows to maintain compliance
- Access comprehensive historical activity at a glance
- Secure payment procedures with authorization controls
- Track all correspondence and documents effortlessly
- Support back-to-back ordering for smooth operations
- Automated VIES & INTRASTAT reporting for compliance and efficiency.

Stock Ledger

Built for performance and precision, this system manages complex, high-volume stock operations effortlessly.

“

Herbst can handle over 20,000 stock items in dual locations, in transit and in sales. It has allowed us to track, monitor and forecast everything.”

Joe Deacon

Managing Director - Distag QCS

Manage your product life cycle and optimise inventory operations.

- Support multiple units of measure per product for total flexibility
- Update prices instantly with quick and adaptable pricing tools
- Enable barcode and QR code scanning for efficient stock handling
- Automate delivery, insurance, and additional charge calculations
- Gain real-time visibility of free and actual stock levels
- Automatically manage manufacturer and customer part numbers
- Streamline logistics with an integrated Warehouse Management System (WMS)
- Handle kits, BOMs, and work orders within one unified system
- Easily manage outstanding orders and generate picking lists
- Simplify reordering and stocktaking with built-in automation tools.

Nominal Ledger

Stop paper chasing. Empower your finance team with the control and insight of an integrated ledger system.

“

Herbst gathers the information for our VAT and ROM1 requirements, so when we need the results they are there at the click of a button.”

Rodney Bates

Managing Director - Bates Oil

Access live, connected data for faster, smarter financial decisions.

- View real-time profit and loss for instant financial insight
- Analyse working capital live to make informed business decisions
- Support multiple departments with flexible budgeting tools
- Customise your nominal ledger with a dynamic, re-definable tree structure
- Adapt easily with flexible accounting periods
- Quickly correct entries with intuitive editing utilities
- Ensure accountability with detailed security logs and user-level restrictions
- Access a comprehensive library of standard financial reports
- Drill down seamlessly from summaries to original source documents.

Take **Control**

Experience seamless integration with our suite of mobile applications and touchscreen kiosks. Empower your employees with tailored solutions designed for diverse roles and dynamic work environments.

Traceability & Quants

Cut duplication and paperwork with integrated traceability, streamlining processes and simplifying accountability across your organisation.

“

We chose Herbst because of its integrated traceability system. It is a regulatory requirement for us because we supply veterinary medicines.”

Donal Duggan

Managing Director - Duggan Veterinary

Maintain precise records and track products seamlessly from start to finish.

- Use existing batch numbers or create new ones for flexible tracking
- Apply a 'first in, first out' batch allocation approach to optimise stock rotation
- Track all ingredients used in end products for full accountability
- Generate batch recall reports and letters quickly and accurately
- Manage inspection dates to ensure compliance and quality
- Control dispatch based on product expiration dates
- Implement goods-inwards control points to maintain accuracy from the start
- Select and manage stock efficiently by batch
- Support multiple batch numbers at the document line level for detailed tracking.

Customer Self Service

Online self-service web portal for your customers, allowing them to log in, view past transactions, place new orders, and make payments. Any time.

Herbst let our customers order online and find invoices themselves. It has cut down completely on phone calls to the office and lets customers get the information when they need it.

Rodney Bates

Managing Director - Bates Oil

Adds real value for your customers by simplifying transactions and account management.

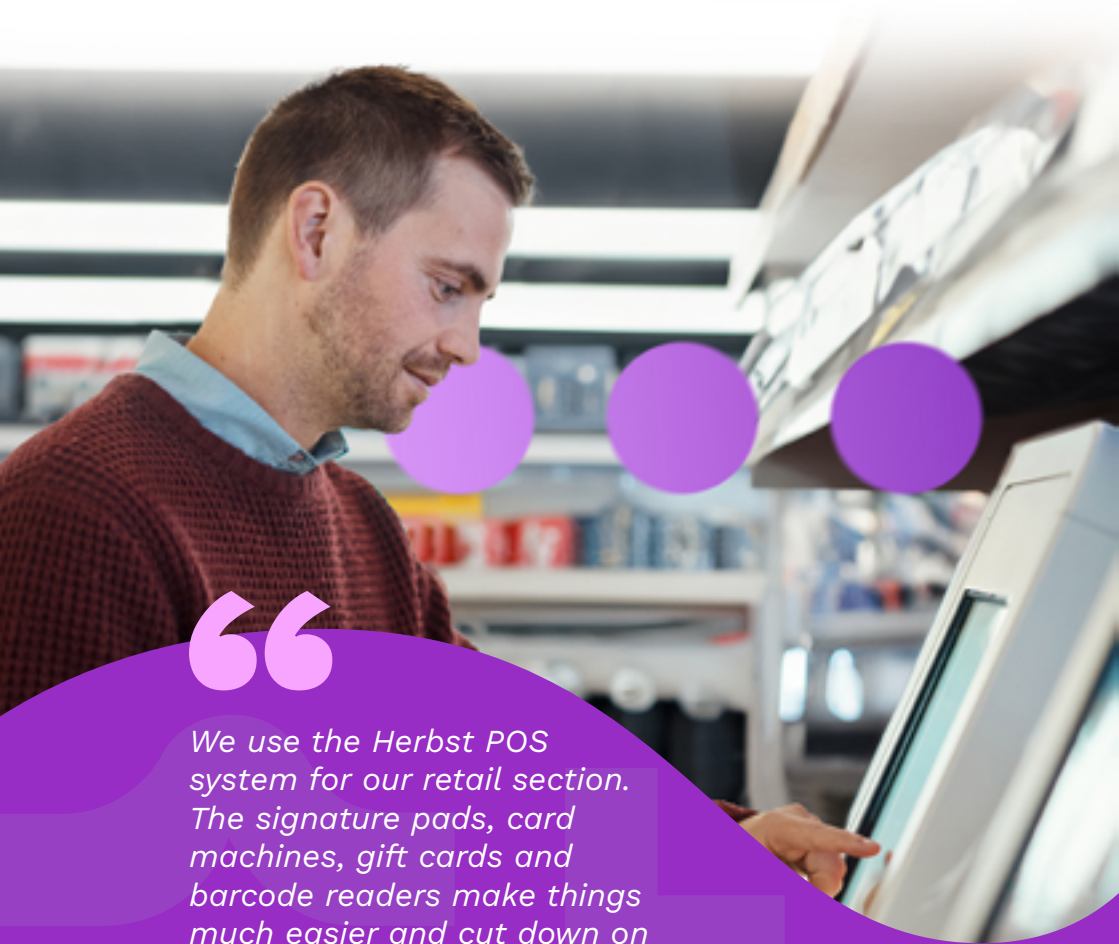

- Customer-specific password management tools for secure access
- Share files and contracts safely online
- Support for customer-specific pricing
- Display product availability, images, safety information, and more
- Sales orders and payments feed directly into your system
- Full synchronisation between the Products Ledger and the web portal
- Access last statements and previous invoices in real-time
- Customizable interface with your branded logo and colors
- Integrated content management system for easy updates
- Mobile optimised and auto-adjusts for all devices, including mobile, tablet, and PC.

Point of Sale

Customised for warehouse and retail settings, this touchscreen POS integrates seamlessly with accounts and stock control, eliminating duplication.

“

We use the Herbst POS system for our retail section. The signature pads, card machines, gift cards and barcode readers make things much easier and cut down on mistakes and time.”

Rodney Bates

Managing Director - Bates Oil

Empowers management with real-time insights while simplifying the processing of transactions at the point of sale.

- Specialised features for B2B trade counter operations
- Fully integrated with the stock ledger for accurate inventory management
- Automatically checks credit limits for account customers
- Quick access to detailed product and customer information
- Supports special pricing and promotional offers
- Enforces delivery details for cash sales when needed
- Supports capturing signatures at the point of sale
- Barcode and scanner compatibility for faster transactions
- Live profit and loss reporting available in the back office.

Job Costing

Designed for bespoke projects, this module provides precise, order-based costing for every unique job.

We use the Job Costing module to track our transport budgets on specific jobs and compare them with the actual financial performance.”

Colin Egan

Finance Director - Banagher Concrete

Track the status of every job as it happens and compare against your initial forecasts.

- Fully integrated with stock and nominal ledger for accurate financial control
- Assign hours to each job, complete with detailed descriptions
- Supports internal jobs and research projects alongside customer work
- Handles fixed price, cost plus, and time & materials costing methods
- Supports suballocation of costs to Bill of Quantities (BOQ) and job costing codes for in depth subanalysis
- Record job coordinates and contact details for efficient management
- Accumulate correspondence and attach files directly to jobs
- Customisable user fields, including optional and mandatory lists
- Assign and manage purchase orders and goods received for each job
- Group, categorise, and analyse information to support decision-making.

Assembly Manufacturing

Streamline your manufacturing processes with tools to plan, track, and manage assemblies from start to finish.

Giving you the tools to monitor, manage, and optimise manufacturing operations effectively.

- Schedule work orders efficiently to optimise production flow
- Manage bills of materials with full version control
- Plan parts requirements seamlessly with integrated parts planning
- Capture labour costs accurately for each assembly process
- Transfer real costs from source materials to finished products
- Track ingredients and components with integrated batch management
- Operate via a user-friendly touchscreen kiosk interface
- Generate insights and reports with the integrated report writer.

Warehousing

Streamline warehouse operations with an integrated system that manages aisles, bays, slots, and stock locations efficiently.

“

For our warehouse management we use Herbst to scan everything into our bays and slots with barcodes. As we moved along, we kept gaining more and more benefits.”

Tadgh Collins

Head of Management, Accounting & ERP Development
Irish Dog Foods

Drive warehouse productivity through smart, intuitive touchscreen interfaces.

- Streamlines inventory storage and retrieval for faster, more efficient operations
- Uses touchscreen technology to eliminate paperwork and instantly relay information to the office
- Fully integrates with kiosks and handheld applications for seamless warehouse management
- Provides real-time access to inventory levels and stock locations
- Improves accuracy in order picking and packing
- Ensures timely and precise order deliveries
- Reduces errors linked to manual inventory tracking
- Works in coordination with sales and purchase modules for smooth order management
- Instantly updates inventory records and communicates real-time information across the business.

Weighbridge

The complete solution for busy weighbridge operations. Delegate tasks confidently while maintaining full control and preventing costly daily errors.

“

The weighbridge is a big part of the business. It picks up the information at the start and moves it onto invoicing, stock control and outputs. It is essential to the running of the quarry.”

Billy McGrath

General Manager - McGrath Limestone

User-friendly and fully connected to your accounts for smooth financial management.

- Automatically enforce credit control directly at the weighbridge
- Check and authorise weight documents quickly for invoicing
- Convert weight documents to invoices with ease
- Simple, intuitive weighbridge interface for fast and accurate data entry
- Drill down from invoices to the original weight documents for full traceability
- Access real-time management information for informed decision-making
- Restrict access to sensitive information to maintain security and compliance
- Support mandatory fields, test results, and haulage details for complete record-keeping
- A specialised driver-operated touchscreen kiosk interface for streamlined operation is also available.

Herbst Inspector

A powerful mobile form and inspection tool that simplifies fieldwork, reporting, and compliance management. Herbst Inspector enables teams to design, complete, and submit forms directly from any Android device: capturing data, photos, and signatures on-site with ease.

“

The checklist is prepopulated, we can add a note or a photo if something is wrong, sign it off and it goes straight to the office.”

Rodney Bates

Managing Director - Bates Oil

Ensures all inspection records, accident logs, job reports, and asset checks are securely stored and instantly accessible.

- Customisable forms for inspections, audits, and surveys
- Capture photos, notes, and voice-to-text entries in real time
- Works fully online and offline for remote field operations
- Automatically syncs completed forms to the system for live, centralised reporting
- Link inspections directly to jobs, customers, traders, or sites for full traceability
- Seamlessly integrated with Herbst Insight CRM.

Think Intelligently

Manage operations while gaining powerful business intelligence. All centred around the user.

Our solution presents real-time insights visually and interactively - giving you the information you need. At the touch of a button.

Haulage & Carriage

Simplify and automate your haulage operations with a fully integrated management solution.

Enhances precision, cuts out duplication, and delivers live data instantly.

- Manage back-to-back haulage orders efficiently
- Track zones, radial miles, depots, and multiple client sites seamlessly
- Generate detailed reports by haulier and driver
- Monitor waiting times and minimum load requirements
- Produce automated self-billing reports for faster invoicing
- Maintain coordinates for every location for accurate routing
- Compare performance across all your hauliers to optimise operations
- Automatically apply additional haulage charges when required
- Assign default hauliers to customers to simplify order processing.

Routing

Easily schedule and manage orders using a simple 'drag-and-drop' calendar interface.

Assign orders to drivers quickly and efficiently with an interactive map view.

- Simplifies order scheduling with a visual, user-friendly drag-and-drop interface
- Automatically generates itineraries based on time and distance calculations
- Apply orders directly onto a calendar to book free slots efficiently
- Assign orders precisely to available driver slots for optimal utilisation
- Visualise all orders on a map to enhance route planning and optimisation
- Streamlines workflows for faster, more efficient logistics operations.

Advanced Pricing

Tailored for business-to-business operations, offering comprehensive tools to manage diverse pricing models.

Streamline complex pricing processes with integrated tools.

- Manage price classes in both base and foreign currencies for purchases and sales
- Set special prices for base and foreign currencies
- Apply special prices at site level for precise control
- Schedule future price changes in advance
- Create discount price categories based on product groups
- Apply discount price categories according to customer type
- Handle rebates, including oil-specific rebate schemes
- Generate price list reports tailored to individual customers
- Automatically apply customer extra charge schedules
- Quickly and flexibly adjust prices across a range of products, customers, or sites.

Advanced Budget

A fully integrated budgeting system that monitors actual versus planned performance and informs management in real time.

“

It is streamlined and has full visibility from a management point of view, which is all that you want.”

Paoric Kavanagh

Operations Director - KORE Insulation

Streamlines budget management while minimising the need for external spreadsheets.

- Set budgets and targets aligned to business periods for accurate tracking
- Flexibly define budgets by quantity, margin, or value to suit your needs
- Assign budgets and targets to managers for clear accountability
- Ensure nominal budgets never conflict with sales targets
- Apply nominal budgets at a departmental level for detailed control
- Access standard reports and a report writer for comprehensive analysis
- Allocate budgets and targets to specific suppliers and customers for precise oversight.

Ensure **Flexibility**

Our business management solution is modular, flexible, and scalable.

Whatever the size of your business or budget, we can adapt to meet your requirements. At any time.

Discount Control

Assign threshold discounts on every sales transaction, giving frontline staff controlled flexibility with pricing.

Manage price exceptions confidently. Without losing control of margins.

- Fully functional within the POS for seamless operations
- Use authorisation cards for supervisors to approve discounts
- Maintain a full audit trail of who authorised discounts and why
- Apply different percentage limits by product category
- Set varying levels of authorisation for different users
- Keep cost prices hidden from frontline staff while applying discounts
- Automatically considers special prices and quantity breaks
- Works across sales orders, quotations, and invoice documents.

Kiosk Checkpoint

A simple touchscreen interface to delegate, facilitate, control, and report business processes across the warehouse, weighbridge, and factory floor.

“

Using the kiosk on the production floor gave us full visibility of our products, the ingredients used, when the product was made and when it was sent to the customer.”

Margarete Morski

Production Manager - O'Keefe's Bakery

Minimise paperwork and administration through full back-office integration.

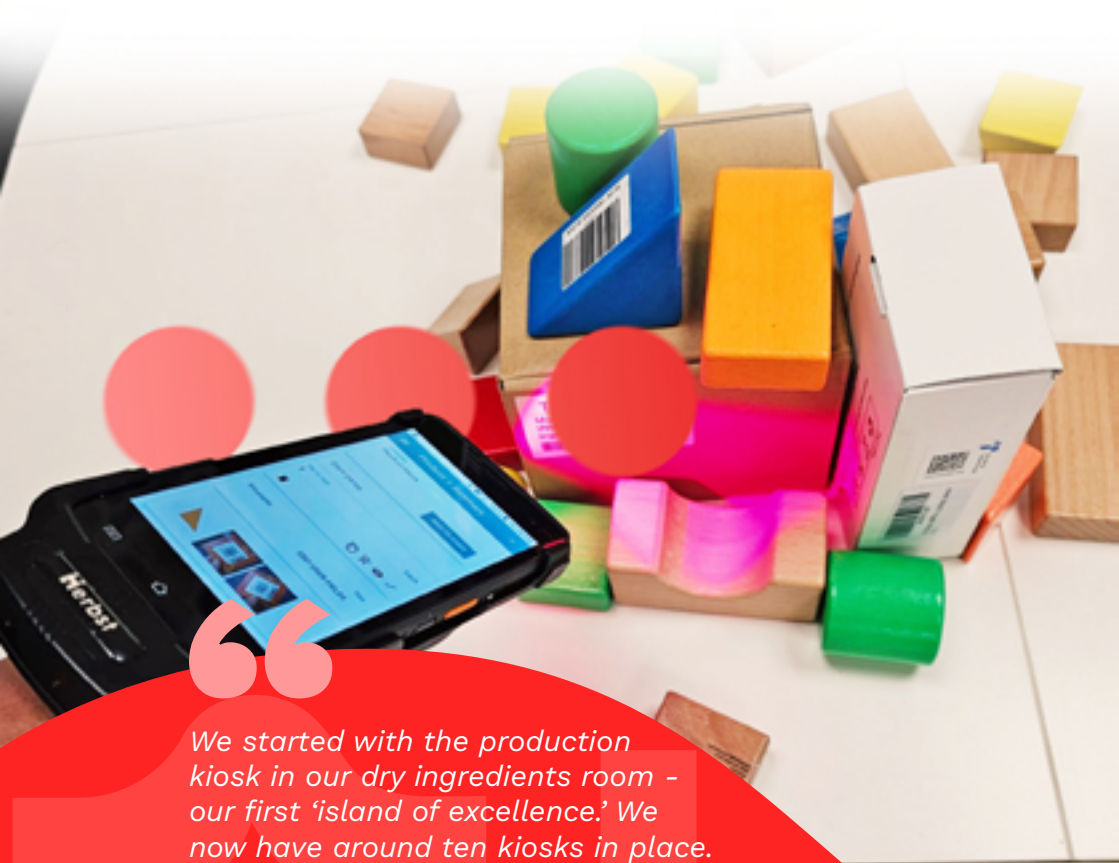

- Highlights discrepancies between expected and actual results for quick resolution
- Provides a practical, simple-to-use touchscreen interface
- Simplifies relevant procedures, reducing complexity and errors
- Supports swipe ID cards for fast user identification
- Handles batches to maintain traceability throughout operations
- Acts as a checkpoint for goods produced to ensure accuracy
- Serves as a checkpoint for goods received and dispatched, streamlining workflow.

Kiosk Mobile App

A mobile solution designed to bring flexibility and control to warehouse and production activities.

“

We started with the production kiosk in our dry ingredients room - our first ‘island of excellence.’ We now have around ten kiosks in place. The mobile apps take it even further, allowing us to reach every corner of the factory and warehouse”

Tadgh Collins

Head of Management, Accounting & ERP Development
Irish Dog Foods

Full suite of mobile apps designed around specific functions to support workers. Both on-site and off-site.

- Extends touchscreen kiosk functionality to mobile devices for flexible operations
- Highly intuitive, job-oriented user interface for efficient task management
- Enables fast and accurate real-time job entry and product verification
- Supports receipt, production, dispatch, and management of stock
- Compatible with a wide range of smartphones and rugged tablets
- Finger-friendly interface with full barcode scanning support
- Enforces quality checks and batch tracking for traceability
- Provides real-time visibility connected to the back office
- Offers convenient portability for seamless floor operations.

Herbst Jobber

Makes job clock-ins quick, simple, and fully traceable.

Flexible Jobber solutions designed to suit diverse business requirements and operational scenarios.

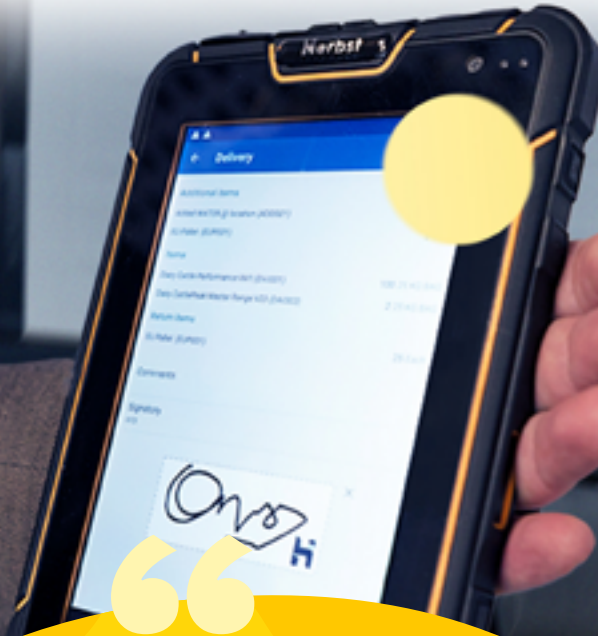

- Factory Floor Jobber version designed for on-site operations
- Mobile Jobber version for flexibility and remote access
- Allows workers to update the status of jobs in real time
- Record and detail the type of work carried out at any stage
- Fully integrated with job costing and accounts for seamless tracking
- Includes functionality to scope and define job requirements
- Built-in checklist features to ensure accuracy and consistency.

Herbst Trucker

Keep your team and customers informed with real-time updates, ETAs, and proof of delivery. All while ensuring vehicle safety and maintenance.

The Trucker app means the driver does not have to go into the front office. He gets the docket on his phone, gets it signed on-site and everything goes back to the office in real time."

Colin Egan

Finance Director - Banagher Concrete

Reduces administration and streamlines day-to-day operations for drivers.

- Vehicle checklists fully integrated with the CRM for seamless management
- Proof of delivery automatically linked to the original documents
- Operates both online and offline for uninterrupted functionality
- Sends live updates and delivery information directly to the back office
- Handles both deliveries and collections with ease
- Option for drivers to edit quantities prior to customer signature
- Integrates with Google Maps for efficient navigation and route planning
- Significantly reduces administration through smart automation
- Mobile app compatible with a wide range of smartphones and rugged tablets.

Sales Cloud Client

Access and update client information in real time from your smartphone or any mobile device. Fully connected to your main HQ system.

“

Our sales reps can meet clients, log notes and set reminders, and all calls, texts and emails are tracked so you can see exactly what contact has been made.”

Martin Bourke

General Manager - FRS Cahir

Supports account managers and sales representatives wherever they are, ensuring real-time access to information.

- Compatible with iOS and Android devices for full mobile flexibility
- Works seamlessly on tablets and laptops
- Create quotes, orders, deliveries, and invoices on the go
- View all customer-specific credit details instantly
- Check real-time stock levels and special pricing
- Access statements and previous transaction history in real time
- Track prospects and manage opportunities efficiently
- Simple, finger-friendly interface that works in any browser
- Browse the product ledger for alternatives and potential items.

Eliminate Duplication

Reducing - or even eliminating - data duplication is a major benefit for any organisation.

Give your team the tools to work smarter, not harder.

GIS Mapping

A Geographic Information System (GIS) that lets you visualise, analyse, and interpret data to reveal patterns, relationships, and trends.

One key thing we've found with the system is that we get instant proof of delivery, including the time, date and exact GPS location of where the truck made the delivery."

Rodney Bates

Managing Director - Bates Oil

Turn existing data into visual insights. And identify new opportunities.

- Easy to use and fully integrated with your real-time data
- Maintain coordinates for customers and traders for accurate mapping
- Includes a GIS/KLM report writer for custom reporting
- Store coordinates at document level, including deliveries
- Identify customers with outstanding orders at a glance
- Visualise customers by location or area for better planning
- Comes with a comprehensive set of standard reports
- Find the 10 closest customers to any given customer
- Map previously sold products at customer locations to spot trends and opportunities.

Work Centres

Simplify and optimise operations to create smarter, more efficient workflows. An advanced & flexible option for a company with a multitude/mishmash of intake, production, & dispatch centres.

Once we created an island of excellence, it was very easy to roll it out to the other departments. We now have production kiosks across the whole facility.”

Tadgh Collins

Head of Management, Accounting & ERP Development
Irish Dog Foods

Gives management the tools to logically organise operational resources within defined “Work Centres”.

- Named Work Centres are linked with their predefined capabilities, allowing managers to allocate and monitor operational orders effectively
- Lean and intuitive interface supported by smart architecture with access to live orders and stock details
- Significantly declutters operations for factory floor users by keeping information focused and job-specific.
- Defines logical connections between depots, locations, Work Centres, checkpoints, and user groups
- Combined with permissions and availability rules, this reduces administration, cuts repetition, and helps prevent human error.

H. Hosting

Access your live business system securely from any location with our admin-free cloud solution.

“

We chose the hosting option because we wanted something easier for us and not to worry about security, backups or updates.”

Margarete Morski

Production Manager - O’Keefe’s Bakery

Connect to your business management system. Anywhere. Any time

- Easy and secure access to your systems via the internet
- Routine proactive and preventative security measures
- Live monitoring and regular backups of your database
- User software, operating system, and hardware updates included
- Advanced architecture optimised for both security and performance
- Hassle-free, fully managed cloud solution
- Ideal for multi-branch operations and out-of-office work
- Transparent, predictable pricing structure
- Robotic PA services, including Telegram Bot integration.

A smart assistant that brings critical business metrics and insights straight to your device.

“

With the BOT system I can see my sales for the day, the profit of the day, the number of invoices and transactions. It gives me a handy overall view of the business.”

Martin Bourke
General Manager - FRS Cahir

Designed to give you full oversight and control from any location.

- Instant access to crucial KPIs anytime, anywhere
- Customisable notifications for key transactions and updates
- Daily, weekly, and monthly performance overviews
- Insights on sales, activities, goods in/out, and profit margins
- Real-time monitoring of business performance on the move.

Backup Scheduler

Safeguard your data with a secure, automated backup solution.

Ensures daily backups occur without relying on staff to perform them.

- Schedule automatic backups for consistent data protection
- Specialised utility designed for efficient database management
- Check database integrity to ensure reliability and accuracy
- Differentiate between daily and monthly backup routines
- Store backups securely in your own off-site vault
- Automatically receive email status reports for each backup.

Note: Backup Scheduler is designed for businesses that run Herbst Insight on their own in-house server. If you use Herbst Hosting, backups, security and updates are already handled for you.

Swagger API

An intuitive interface that allows developers to explore and interact with your ERP system's API endpoints, facilitating seamless integration and data exchange.

Supports effortless connectivity between your ERP and third-party apps.

- Extensive API endpoints designed for consumer e-commerce operations
- Streamlined endpoints for effortless data updates within spreadsheets
- Dedicated endpoints for seamless integration with Power BI
- API support for purchase approval systems using document scanning
- Facilitates seamless endpoint access in third-party applications via Swagger
- User-friendly customisation of endpoints within the existing client interface
- Supports JSON and CSV formats to meet diverse data requirements
- Endpoints optimised for integration with external CRM systems
- Version control ensures compatibility with the latest software updates.

Boost Productivity

A fully integrated solution enables your team to work smarter, communicate effectively, and delegate with confidence.

Transforming your business into a lean, agile operation.

Your Business. Optimised.

Unlock the full potential
of your business - reduce
duplication, enhance control,
and empower your workforce
to achieve more.
