

BRIMONN PERFORATED PLATE AND WOVEN WIRE MESH TROMMEL SCREENS

PERFORATED PLATE TROMMEL SCREEN

WOVEN WIRE TROMMEL SCREEN

These screens are particularly useful in sizing or scalping operations and in heavy duty screening applications where standard screens have limited use. They offer excellent wear life for high impact, high abrasive and high material flow. Both these types of screens can be manufactured in a wide range of apertures and thicknesses and can be rolled ready for fitting. Perforated punch plate can be manufactured with Round, Square, Rectangular or Hexagonal Holes.

Punch plate available in:-

- Mild Steel
- Hardox™
- ABRO™
- Stainless Steel

Woven wire available in:-

- High Tensile High Carbon Steel
- Stainless Steel 304 and 316

We can also supply the following:-

- Trommel cleaning brush
- Trommel clamp plates
- Hooked Plate for tensioned decks
- Flat/bolt down type plate for tensioned decks

BRIMONN FINGER GRID AND POLYBLOCK SYSTEM

BRIMONN FINGER GRID

The Brimonn Finger Grid has been developed to assist in eliminating clogging even with today's demanding applications.

Key features of the Brimonn Finger Grid include:-

- Robust modular design to suit all makes of vibrating grids.
- Fewer modifications are required to fit to the screen box.
- Heavy duty forged tines.
- Quick and simple tine replacement.
- Available in a wide range of apertures.

Applications include:-

- Soil preparation
- Recycling
- Excavation
- Reclamation
- Landfill
- Demolition
- Screening and separation
- Rip Rock

Plus, many other heavy-duty applications.

Applications include:-

- Contaminated soil clean up
- Recycling
- Excavation
- Landfill
- Screening and separation
- Reclamation

BRIMONN POLYBLOCK FINGER SCREEN

The Brimonn polyblock Finger Screen is designed specifically for applications such as waste disposal, topsoil, compost and aggregates.

With no cross wires the material being processed suites for less catching on the screening surface. The cascade effect produced by the series of fingers produces excellent screening properties in the most demanding of applications.

Key features of the Brimonn Finger Screen include:-

- Robust modular design that can be tailored to suit all makes of screening equipment.
- Easy to fit with generally no modification required to your screenbox.
- Variable angle adjustment.
- Fingers and holders can be individually replaced quickly.
- Available in a wide range of apertures and rod thicknesses to suit.
- Heavy duty forged tines - manufactured from only the highest quality high tensile steel.
- Compact design for ease of shipping.
- Available in a wide range of apertures and rod thicknesses to suit your individual screening needs.
