ABOUT ECLIPSE

Committed to Your Workshop Success

Our Mission

Deliver high-quality diagnostics backed by exceptional support and training.

Established Experience

Over 20 years experience serving workshops, fleets and technicians.

Customer Partnership

You're not just buying a tool, you're joining a support-focused partnership.

UK-Based Support

Get technical support from industry-trained vehicle and IT experts.

Innovative Solutions

We bring the latest diagnostic technology, regular updates and add-ons.

Training & Knowledge

Structured training helps technicians master both software and hardware.

2005

Eclipse founded by experienced diagnostic professionals

2010

Eclipse made official distributor of Jaltest in the UK.

Today

Eclipse offers complete diagnostics, support & training.

Your All-in-One Diagnostic Tool

CV

ACV

OHW

MHE

marine

Multi-Brand Vehicle Coverage

Comprehensive diagnostics across a wide range of vehicle makes and models.

Fault Codes & Live Data

Deep insight into system status with real-time signals.

Guided Diagnostic Workflows

Step-by-step procedures reduce guesswork.

System & Component Tests

Activate actuators, calibrate systems and verify functions.

Fault Cause Finder

Diagnostic logic to pinpoint likely fault sources.

Intelligent Reporting

Generate documented reports for customers and compliance.

jaltest

Dealer-Level Functionality on All Major Brands

Jaltest CV from Eclipse provides comprehensive **multi-brand** diagnostic capabilities for the full spectrum of commercial vehicles. This powerful software gives your workshop the tools to diagnose, repair and maintain at the same level as a main dealer.

VEHICLE COVERAGE:

Truck

Trailers

LCV

Bus/Coach

YOUR COMPLETE KIT

What's Included?

On-site handover training

Jaltest CV software licence

Cable kit tailored for the vehicle makes you work on

12 months software updates and warranty

Eclipse **Testpad Extreme® Pro**, handheld workshop Tablet PC

Jaltest V9 link
(Bluetooth / wired)

12 months UK-based technical support

Scan to Learn More

Discover full product details, specs and coverage.

FUNCTIONALITY

Key Features & Capabilities

Extensive Vehicle Coverage

Diagnose **200+** major commercial vehicle makes. Jaltest CV supports thousands of models across trucks, buses, trailers and LCVs.

Dealer-Level Functionality

Read and clear **fault codes**, perform ECU programming, run system checks, and carry out component actuations.

Guided Fault Diagnosis

The software links fault codes directly to repair procedures, **wiring diagrams** and **component locations**, guiding technicians step by step.

Live Data & Interactive Diagrams

Visualise, graph and analyse **live data** while referencing interactive wiring diagrams for fast and precise diagnosis.

Expert Mode

Unlock **advanced functions** like ECU parameter modification, sensor or actuator calibration, and DPF regeneration.

Technical Data & Repair Resources

Access OEM-level repair information: component locations, service data, maintenance steps, and calculated repair times.

Routine Maintenance

View vehicle maintenance data and scheduled service procedures to help prevent future faults.

Precision Diagnostics for Agricultural Machinery

Jaltest AGV delivers **multi-brand** diagnostic capabilities tailored for the agricultural sector. From tractors and harvesters to implements and ISOBUS-connected equipment, this software empowers your workshop or fleet to service agricultural machinery with the same professionalism as OEMs.

VEHICLE COVERAGE:

Tractors

Harvesters

Trailing Equipment

YOUR COMPLETE KIT

What's Included?

On-site handover training

Jaltest AGV software licence

Cable kit tailored for the vehicle makes you work on

12 months software updates and warranty

Eclipse **Testpad Extreme® Pro**, handheld workshop Tablet PC

Jaltest V9 link (Bluetooth / wired)

12 months UK-based technical support

Scan to Learn More

Discover full product details, specs and coverage.

FUNCTIONALITY

Key Features & Capabilities

Wide Agricultural Coverage

Full coverage for major brands of tractors, harvesters, forage harvesters, and farm implements.

ISOBUS Connectivity

Seamless diagnostics for ISOBUS-compatible implements and tractors – including electronic controls and data modules.

Fault Code Reading & Clearing

Diagnose and reset error codes across all supported ECUs.

Live Data Monitoring

Record, view, and analyse live sensor parameters such as engine temperature, pump pressure, injection timing, and more.

Component Actuation & Testing

Activate and test components like actuators, injectors, valves, and other systems.

Calibration & Adjustments

Perform calibrations (e.g., throttle, EGR, DPF) and parameter changes.

Technical & Wiring Diagrams

Access essential wiring diagrams, connector layouts and maintenance procedures.

Maintenance Data & Service Information

View scheduled service intervals, lubrication points, and OEM-recommended maintenance.

Complete Off-Highway Diagnostic Coverage

The **Jaltest OHW** system by Eclipse offers **dealer-level** diagnostic power for a wide range of off-highway, construction, earth-moving, and stationary-engine equipment. It provides a complete solution for diagnosing, servicing, and maintaining heavy-duty machinery, including excavators, cranes and road sweepers, across **multiple brands**.

VEHICLE COVERAGE:

Heavy Equipment

Compact Equipment

Stationary Engines

Road Sweepers

YOUR COMPLETE KIT

What's Included?

On-site handover training

Jaltest OHW software licence

Cable kit tailored for the vehicle makes you work on

12 months software updates and warranty

Eclipse **Testpad Extreme® Pro**, handheld workshop Tablet PC

Jaltest V9 link (Bluetooth / wired)

12 months UK-based technical support

Scan to Learn More

Discover full product details, specs and coverage.

FUNCTIONALITY

Key Features & Capabilities

Extensive Multi-Brand Coverage

Support for major off-highway and construction equipment manufacturers – from heavy equipment to compact machines, road sweepers, stationary engines, and more.

Dealer-Level Diagnostics

Read and clear error codes, perform full system scans, and access ECU programming.

Guided Troubleshooting & Repair Workflow

Fault-code driven diagnostics that link directly to wiring diagrams, component locations, and step-by-step repair or maintenance procedures.

Interactive Wiring & System Data

Detailed wiring diagrams, component maps and technical data to locate components precisely – essential for hydraulic, engine, ECU and electronic systems.

Live Data Monitoring & Actuations

View real-time sensor and system parameters (e.g. engine status, hydraulics, pressures), and perform component tests or actuations to verify system operation.

Maintenance, Calibration & Service Functions

Full service data access, ECU calibrations, system resets and maintenance scheduling – giving you the power to maintain and repair machines to OEM-level standards.

Advanced Diagnostics for Material Handling Equipment

Jaltest MHE brings **multi-brand**, workshop-grade diagnostics to the material-handling sector. Whether it's forklifts, telehandlers, scissor lifts or lift platforms, MHE delivers full diagnostics – from fault-code reading to hydraulic, engine, electric or control-unit troubleshooting.

VEHICLE COVERAGE:

Forklifts

Telehandlers

Lift Platforms

YOUR COMPLETE KIT

What's Included?

On-site handover training

Jaltest MHE software licence

Cable kit tailored for the vehicle makes you work on

12 months software updates and warranty

Eclipse **Testpad Extreme® Pro**, handheld workshop Tablet PC

Jaltest V9 link
(Bluetooth / wired)

12 months UK-based technical support

Scan to Learn More

Discover full product details, specs and coverage.

FUNCTIONALITY

Key Features & Capabilities

Comprehensive Multi-Brand Coverage

Works with **leading MHE brands** (Toyota, Hyster, Linde, STILL, Crown, Manitou, JCB, Yale, Doosan, Nissan, Caterpillar, Komatsu and more), covering forklifts, telehandlers and lift platforms.

Full System Diagnostics & ECU Programming

Read and clear error codes, run system scans, access system and ECU data, program ECUs, and test across hydraulics, engines, transmissions, electric motors and controllers.

Guided Troubleshooting & Technical Data

Built-in wiring diagrams, component location maps, repair guides and maintenance data help you diagnose and fix problems quickly, even on unfamiliar makes or systems.

Live Data & Component Actuation

Monitor live sensor data (engine, hydraulic pressures, motor parameters, etc.), graph values for trend-analysis, and perform component actuations or tests.

Adjustments, Calibrations & Maintenance Functions

Perform ECU parameter adjustments, calibrations, system resets, scheduled maintenance checks – giving you **dealer-level** service capability in your workshop.

Complete Diagnostics for Boats, Engines & Watercraft

Jaltest Marine from Eclipse delivers powerful, **multi-brand** diagnostics designed for the marine industry. Whether you're working on inboard or outboard engines, jet-skis, stationary marine engines or watercraft, this system gives your workshop or yard the tools to diagnose, repair and maintain vessels with OEM-level precision and speed.

VEHICLE COVERAGE:

Inboard

Outboard

Stationary Engines

Jet Ski

YOUR COMPLETE KIT

What's Included?

On-site handover training

Jaltest Marine software licence

Marine cable kit (tailored to you)

12 months software updates and warranty

Eclipse **Testpad Extreme® Pro**, handheld workshop Tablet PC

Jaltest V9 link (Bluetooth / wired)

12 months UK-based technical support

Scan to Learn More

Discover full product details, specs and coverage.

FUNCTIONALITY

Key Features & Capabilities

Extensive Marine Coverage

Works across hundreds of vessel brands and models – covering inboard, outboard, jet-ski and stationary engines from leading marine manufacturers.

Dealer-Level Diagnostics & ECU Programming

Read and clear engine and system fault codes, perform ECU programming, system checks and calibrations just like official manufacturer tools.

Guided Fault Diagnosis with Technical Data

Faults link directly to interactive wiring diagrams, component locations, vessel service data, and step-by-step troubleshooting.

Live Data, Monitoring & Component Actuation

Read real-time data for sensors and systems (engine, powertrain, controls), graph values, test components and verify repairs under load.

Maintenance & Service Data Access

View maintenance schedules, service intervals, technical specifications and maintenance history- useful for routine servicing and preventive maintenance.

EDIS II

Multi-Brand Diagnostics for Cars & Light Commercial Vehicles

EDIS II from Eclipse is a complete, OEM-level diagnostic solution for cars and light commercial vehicles. Covering tens of thousands of models across major brands, it brings advanced diagnostic functions, live-data monitoring, coding and programming, and guided repairs – giving your workshop the flexibility to tackle everything from routine servicing to complex fault diagnosis on one platform.

VEHICLE COVERAGE:

Cars

LCV

Eclipse **Testpad Extreme® Pro**, handheld workshop Tablet PC

12 months software updates

12 months of **UK-based** technical support

Scan to Learn More

Discover full product details, specs and coverage.

FUNCTIONALITY

Key Features & Capabilities

Extensive Vehicle Coverage

Diagnostic support for a huge range of cars and light commercials – petrol, diesel, hybrid and electric.

Full System Diagnostics & Coding

Read/clear faults, access live data, run tests, calibrations and coding across all major systems.

Modern Protocol Support

Compatible with DoIP, PassThru, CAN-FD and features fast, reliable Bluetooth VCI communication.

Auto-VIN & Guided Diagnostics

Automatic vehicle identification, Intelligent System Scan and step-by-step guided repair procedures.

Security Gateway Access

Built-in compatibility with OEM security gateways for access to protected modules and functions.

Live Data & Component Testing

View real-time sensor data, graph values, and perform component activations and calibrations.

OEM Repair Data Add-On

Optional **HaynesPro** info system for wiring diagrams, manuals, torque settings, recalls and bulletins.

Expand Your Eclipse Diagnostics Platform

Eclipse offers a suite of **add-ons** designed to unlock deeper coverage, richer technical information and enhanced connectivity across all vehicle types. These optional modules allow workshops to access OEM data, troubleshoot complex braking systems, manage security gateways, and streamline remote services.

CHOOSE YOUR ADD-ONS

Build a diagnostics platform that **grows with you.**

KNORR-BREMSE DIAGNOSTICS

Specialised coverage for **Knorr-Bremse** systems.

INFO WEB

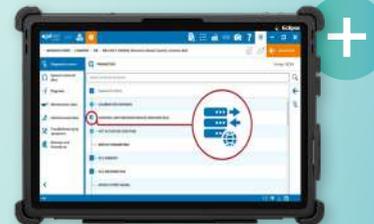

Access all Jaltest technical information on **any device.**

JALTEST TELEMATICS

Intelligent Remote Diagnostics & Fleet Management

Jaltest Telematics combines fleet tracking, remote diagnostics and predictive maintenance in one powerful platform, giving fleet managers and workshops **real-time visibility** into vehicle health and performance.

With **GPS tracking**, driver behaviour monitoring, maintenance scheduling and advanced remote diagnostic capabilities, including fault clearance and remote procedures, you can **reduce downtime**, optimise efficiency and make data-driven decisions across your entire fleet.

MORE THAN JUST TELEMATICS

Your **all-in-one** solution for more efficient fleets

Expert Technical Support, **When You Need It Most**

When you purchase a diagnostic kit from Eclipse, you're backed by a dedicated **UK-based** technical support team. Whether you need help diagnosing a vehicle, resolving software issues or arranging repairs, our specialists are on hand to get you back up and running quickly.

Vehicle Technical Support

Get expert help **diagnosing and repairing** the vehicle, vessel or machine you're working on. Our vehicle specialists use an extensive database of manufacturer technical data, wiring diagrams and repair information to guide you.

IDEAL FOR:

- Fault finding
- Advanced technical procedures
- System diagnostics
- Repair guidance

IT Technical Support

Our IT support team is on hand to help with computer, software and connectivity issues. From setup and updates to remote assistance, they ensure your diagnostic tools and systems run smoothly with **minimal downtime**.

IDEAL FOR:

- Remote assistance
- Installation & updates
- Software issues
- Connectivity problems

Repairs & Hardware Support

If your equipment needs attention, our repairs team can help assess, arrange and manage repairs quickly and efficiently, **minimising disruption**.

Speak to a Specialist

Contact our support team via telephone, remote session or **WhatsApp** for fast, direct access to expert help — **no call centres, no scripts**.

EXPAND WITH CONFIDENCE

Diagnostic Packages Built Around Your Workshop

Every workshop is different. That's why Eclipse Tech offers **flexible diagnostic packages** designed to match your vehicle coverage, workload and future plans. Whether you're upgrading existing equipment or starting fresh, we'll help you choose a solution that fits your needs — without unnecessary complexity.

Expert advice before purchase

Full technical support included

Scalable packages — no overbuying

Guided by Our Experts at Every Step

ENTRY-LEVEL

Ideal for workshops starting their diagnostic journey or expanding basic vehicle coverage.

ADVANCED

Enhanced toolsets offering deeper system access, advanced functions and broader coverage.

SPECIALIST

Targeted packages for ADAS calibration, electrical testing and advanced fault diagnosis.

FUTURE-PROOF

Designed for electric vehicles (EV), hybrid and emerging vehicle technologies, with room to grow.

1

Talk to an Expert

Our team helps you assess your workshop, vehicle types and diagnostic requirements.

2

Choose Your Package

We recommend the right combination of hardware, software and subscriptions.

3

Get Set Up

Your tools are delivered ready to use, with guidance for setup and activation.

4

Ongoing Support

Access remote, phone and online technical support whenever you need it.
