

Global Sourcing Specialists

**YOUR STRATEGIC PARTNER**

**Delivering Quality Worldwide**

# YOUR STRATEGIC PARTNER

ATG are a global sourcing specialist that partner and work with manufacturers of commodities in China, India and South East Asia. We supply a range of components, assemblies and sub-assemblies to OEMs in a variety of industries including agricultural, transportation, crushing & screening, construction, waste recycling and material processing.

With headquarters in Nottingham in the UK and with global offices in Bangalore, India; Zibo, China; Boston, USA (Sales & Technical) and Ballyclare, Northern Ireland; Toronto, Canada (Sales); we give our customers the complete project solution by becoming their strategic partners.

## Finance Your Project

We offer a variety of financial packages to suit your specific requirements that not only aid cash flow but also help with other areas such as tooling charges and haulage. In addition, there's a baffling array of taxes and duties that can be attracted by products sourced from overseas, so we guarantee that these are incorporated into your order.

The finance that we offer is competitive, flexible and has been designed to be of real benefit to our customers. We also fix currency, labour and material of product rates to mitigate any risk and to protect against any fluctuations on international markets.

## Complete Supply Chain Management

As supply chain management experts, we give our customers sustainable business benefits over their competitors.

These competitive advantages include:

- Reduced onsite inventory
- Crucial personnel freed-up
- Improved cash flow
- 'Just-in-time' deliveries

We guarantee intellectual property protection because ATG is also incorporated in Asia. In addition, all of our customers have legal protection to give them complete peace of mind on all orders placed.

# Leave it to THE Global Sourcing Experts, leave it to ATG!

# THE BENEFITS OF WORKING WITH ATG

There are many benefits of working with ATG. Not only do we support you along every step of your project, but you can also rest assured that your parts will be completed to the right quality at the right price and delivered to the right place at the right time. ATG will give your business the competitive edge.

# FULLY QUALIFIED PARTS

Our technical team in the UK has been working with our international engineering teams for many years to create working practices and procedures that have been specifically designed to ensure our rigorous quality standards are always met. Not only do we carry out factory audits to assess the viability of a potential supplier we will also evaluate existing manufacturing processes for any production process. This includes castings capability, proficiency to produce high quality fabrications and the machine shop suitability for precision components.

Once a part has gone into production, we carry out all the requisite inspections using an array of test equipment and techniques to continually check quality. This may involve CMM, ultrasound, manual measurement, chemical analysis, metallurgical testing and any other method designed to conform adherence to the technical specification.

## How does ATG Qualify Parts?

- Highly knowledgeable team of engineers on the ground
- Proven reporting methodology
- Expertise in qualifying high tolerance parts
- Local knowledge and understanding of cultural nuances
- Experienced in working internationally
- Guaranteed IP Protection
- ISO 9001:2015 accreditation
- Members of the Construction Equipment Association
- Wide and varied choice of manufacturing partners
- Implementation of detailed quality assurance plans
- Regular audits and inspections at partner facilities
- Continuous Improvement to ensure consistent quality

# CASTINGS & FORGINGS

ATG supplies engineering castings and forgings to OEMs around the world including those working in the the mining, quarrying, crushing & screening, construction and material processing industries.

Produced in a variety of materials for multiple applications the type of castings we source include:

- Finished machined castings ranging from 10 kilograms to 10 tonnes
- Cast manganese and high chrome wear parts
- Ground engaging components
- Structural castings

Whether you're looking for a reliable source of existing components and assemblies or you require new ones to be developed, our technical teams will more than meet your requirements. Our engineers across the globe oversee all production ensuring we build in durability and longevity at every stage of the manufacturing process to ensure outstanding quality.

The parts ATG supply include:

- General Castings
- Crusher Castings
- Wear Plates
- Ground Engaging Wearparts
- Shafts
- Pipeline Fittings
- Structural Members
- Wear Liners
- Anchor Bolts
- Grizzly Bars & Screens
- Crusher Housings
- Shredder Teeth
- Investment Castings
- Pump Castings
- Agricultural Forgings
- Shell Mould Castings

# FABRICATIONS

ATG supplies fabrications to manufacturers of machines in the construction, mining, material processing and agricultural industries in a variety of materials including BS EN 10025 grade structural steels and BS EN 10088 stainless steel that are all available with EN 10204 3.1, 3.2 or DNV/Lloyds certification.

Depending upon your specific requirements and application our factories utilise a number of processes including MIG, TIG and laser welding.

All components are chemically, mechanically and dimensionally qualified by our own team prior to dispatch. Our fabrications range in size from a few grams up to several tonnes. ATG deliver to anywhere in the world taking care of all logistics and shipping to slot into our customers' production schedules.

Whatever your needs, ATG has the capacity and flexibility to fulfil any order regardless of its size or complexity.

The parts ATG supply include:

- Construction Fabrications
- Agriculture Fabrications
- Hoppers / Feeders
- Chassis
- Structural Frames
- Screening Decks
- Support Structures
- Guarding Rails
- Marine Fabrications
- Pipe Units
- Manifolds
- Hydraulic Tanks

# PRECISION COMPONENTS

ATG supplies precision machined components to OEMs in a variety of materials including steel, stainless steel, aluminium, brass, alloys and plastics.

These parts include gears and sprockets, plated pins and bosses, forged shafts and bearing housings for the agricultural, mining, construction, crushing & screening and material processing industries. Our factories only use the latest CNC technology providing multi axis CNC turning and milling capability up to several metres in length.

Whether our customers are looking for a bespoke item or a large volume of identical parts ATG will work with their production teams to feed into their manufacturing timetable. This service can be tailored to meet changing schedules, multiple delivery dates and batch orders. Whatever size, complexity or volume of precision machined component you require leave it to ATG to deliver quality time after time.

Our customers truly benefit from the competitive edge that can be achieved by sourcing their parts and components offshore whilst maintaining a high level of quality.

The parts ATG supply include:

- Forged Shafts
- Plated Pins and Bosses
- Bearing Housings
- Hydraulic Pistons
- Nozzle Fittings
- Mounting Brackets
- Rotors & Couplings
- Gears and Sprockets
- Seals & Spacers
- Bosses, Bushes & Hubs

# COMPOSITES & PLASTICS

ATG supplies composite & plastic components for numerous applications for machinery manufactured by original equipment manufacturers.

Our facilities utilise a variety of production processes including extrusion and injection blow moulding, vacuum forming and rotational moulding. All factories are audited to meet our stringent quality requirements by our global engineering teams.

ATG employs a proven methodology that not only ensures operational efficiencies but also enables us to adhere strictly to schedules. This approach is underpinned by our comprehensive understanding of local customs and values, as well as our adept handling of time zones and language barriers.

By leveraging our in-depth knowledge of the regions in which we operate, we can navigate potential challenges seamlessly, thereby minimising disruptions and optimising project timelines. Furthermore, our on-site team of experienced production managers plays a pivotal role in overseeing operations and promptly addressing any issues that may arise.

The parts ATG supply include:

- High-density polyethylene (HDPE)
- UHMWPE Components
- Polyurethane Components
- Plastic
- Nylon
- Rubber

# AGRICULTURAL

## MACHINERY COMPONENTS

ATG supplies an extensive range of agricultural machinery components that combine advanced wear-resistance with exceptional quality and performance for long life in the most robust of working environments.

These components are supplied for a wide variety of agricultural machinery including cultivators, ploughs, seed drills, flail mowers, harvesters, balers and vegetable washers.

Our international engineering teams work closely with our factories implementing ISO processes to ensure all parts meet the required quality standards. We also continually audit our manufacturing facilities to guarantee that the high standards that are essential to our operation are always maintained.

This involves our native speaking quality control teams rigorously checking every aspect of our production processes to ensure that all components are continually validated, audited and approved throughout their manufacturing cycle.

The parts ATG supply include:

- Ground Engaging Wear Parts
- Machined Components
- Assemblies
- Machined Castings
- Machined Forgings
- Fabrications
- Plastic Components
- Guards

# TRANSPORTATION

## MACHINERY COMPONENTS

ATG supplies a variety of components to the marine, haulage and rail industries to a wide range of transport manufacturers.

We work with our factories wherever they are in the world to ensure robust manufacturing procedures are in place to guarantee the ongoing quality of all of the parts, components and assemblies that ATG supplies.

At ATG, we place a high priority on quality assurance, and as such, all of our production facilities undergo rigorous and ongoing quality auditing. Our commitment to quality extends throughout the manufacturing process, where every part is meticulously tested to meet stringent standards.

Additionally, we provide the appropriate validation certification for each component to verify its quality and compliance with specifications. Before proceeding with full production, we prioritise customer satisfaction by offering prototypes for their approval.

The parts ATG supply include:

- Machined Castings
- Machined Components
- Lashing Components
- Assemblies
- Fabrications
- Finished Plated Components
- Composite & Plastic Components
- Structural Fabrications

# CONSTRUCTION

## MACHINERY COMPONENTS

ATG works with many original equipment manufacturers in the construction, crushing & screening, earth moving equipment, quarrying and mining industries.

We supply many different components and parts including wear plates, ground engaging wear parts, mounting components, shredder teeth and general construction equipment castings.

Our customers experience substantial advantages by opting for offshore sourcing of their parts, components, and sub-assemblies through ATG. Not only do they benefit from competitive solutions, but they also enjoy a consistently high level of quality assurance.

Our commitment to excellence extends beyond borders, ensuring that regardless of geographical sourcing, our clients receive products meeting stringent quality standards. ATG's operational prowess enables us to accommodate orders of varying sizes and complexities, guaranteeing unmatched flexibility and capacity to meet diverse customer needs.

The parts ATG supply include:

- Machined Castings
- Machined Components
- Lashing Components
- Castings
- Assemblies
- Fabrications
- Forgings

# WASTE RECYCLING

## MACHINERY COMPONENTS

ATG supplies components and assemblies to original equipment manufacturers in the waste recycling industry. The types of machinery that we source parts for includes conveyors, shredders, compactors, shear bailers, sorters and metal sorters.

Whether you are looking for a complete undercarriage for your moving machinery or a set of new drums for your conveyor system ATG can source qualified parts that will meet your specifications.

We are able to manufacture extremely complicated components and assemblies utilising our state of the art equipment and facilities. All parts are continually monitored and inspected through the manufacturing process to ensure they meet our customers' exacting quality requirements and can then be shipped anywhere in the world.

The parts ATG supply include:

- Castings
- Machined Components
- Conveyor Products
- Blades
- Screens
- Rollers
- Liners & Teeth
- Shafts & Chutes
- Guards & Rails
- Belting
- Casings & Covers

# MATERIAL PROCESSING

## MACHINERY COMPONENTS

ATG supplies a range of parts and components for a variety of applications in the material processing industry. This includes machinery such as apron and belt feeders, belt conveyors and handling systems.

Whether you're looking for a reliable source of existing components and assemblies or you require new products to be developed, our technical teams will more than meet your requirements. Our engineers across the globe oversee all production ensuring we build in durability and longevity at every stage of the manufacturing process to ensure outstanding quality.

As supply chain experts ATG works with our customers to slot into their production schedules by delivering just-in-time deliveries reducing onsite inventory. With many years' experience of manufacturing in international territories we take all the risk out of sourcing parts globally freeing up key personal and improving cashflow.

The parts ATG supply include:

- Machined Castings
- Fabrications
- Shafts
- Machined Components
- Pulleys
- Wear-resistant Liners
- Paddles & Impellers
- Screens
- Cylinders
- Frames & Guards
- Wear Parts

# CRUSHING & SCREENING

## MACHINERY COMPONENTS

ATG supplies a variety of parts and assemblies to original equipment manufacturers in the crushing and screening industry. The type of machinery that we source parts for includes jaw & impact crushers, stacking conveyors and trommel screeners.

Whether you're looking for a bespoke item or a large volume of identical parts ATG will work with your production teams to feed into your manufacturing timetable. This service can be tailored to meet changing schedules, multiple delivery dates and batch orders.

The type of machinery that we source parts for includes jaw, cone & impact crushers, stacking conveyors and trommel screeners.

Whether your project is large or small, straightforward or intricate, our dedicated team is equipped to deliver solutions tailored to your specific needs. With a comprehensive range of resources and capabilities at our disposal, we excel in handling diverse orders with efficiency and precision. Our commitment to excellence ensures that every aspect of your order, from inception to delivery, is managed with the utmost attention to detail. You can trust ATG to provide innovative and reliable solutions that exceed your expectations.

The parts ATG supply include:

- Jaw, Cone and Impactor Castings
- Machined Components
- Fabrications
- Shafts
- Wear Parts
- Drums & Rollers
- Crawler Undercarriage
- Sub Assemblies
