

MOGENSEN

Company Profile

Mogensen is a division of Grantham Engineering Ltd. and specialises in vibratory plant equipment for raw and bulk materials handling. With over 50 years experience the Company has become renowned for its quality, reliability, diverse product mix and outstanding customer service.

Mogensen has equipment installations Worldwide in markets as varied from mineral processing to recycling to animal feed production. Many machines have been working continuously for more than 25 years without problems and the name of Mogensen is a recognized industry leader. We supply many of the World's leading Companies that have come to depend on our engineered solutions.

It all starts with our experienced Application Engineers who work with and understand specific customer needs, gathering technical data via site visits and in-house testing and material analysis, an engineered solution can be presented to you, the customer. Specialised vibratory design engineers will then 3D model the equipment and ensure all loads, stresses and throughputs are accounted for, creating a unique set of drawings for review.

The bespoke drawings are sent to the customer for approval and to ensure we have fully understood all requirements. Any changes can be made if required before the manufacturing process begins.

A Division of Grantham Engineering (Established 1946) Mogensen Harlaxton Road, Grantham, Lincolnshire, England NG31 7SF

Mogensen is a leading U.K. manufacturer of materials handling and vibratory process equipment. With over 50 years experience the company has become renowned for its quality, reliability and after-sales service.

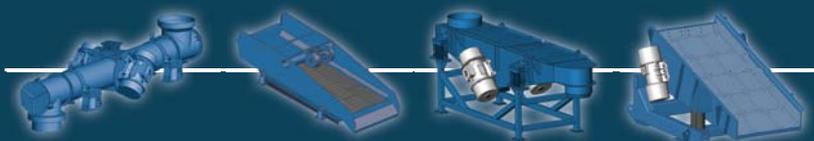

A bespoke design for each customer specific project once approved, is fully manufactured in our modern 27,500 m³ facility thereby ensuring control of lead times and quality procedures. An effective spares division to ensure equipment life cycle support and unit traceability records means we can always have answers on equipment, vibrators, meshes etc. originally fitted and supplied.

All supplied Mogensen equipment has Invicta vibrators fitted as standard and dynamic testing is undertaken to ensure the machine leaves our facility in perfect operating condition. Deliveries Worldwide, commissioning services along with training and experienced advice give us the edge in offering a complete package from start to finish.

Mogensen is proud to be ISO 9001 registered.

MOGENSEN

Mogensen equipment is used World-wide, processing an extensive range of materials including but not limited to the following:

Primary Mineral Processing

- > Ores (Iron, Copper, Zinc ,etc)
- > Aggregates (Sand, Gravel)
- > Crushed Stone (Limestone, Dolomite, Granite, Gypsum, etc)
- > Salts
- > Coal

Secondary Mineral Processing

- > Cement (Powder, Clinker, Limestone, Burnt Lime)
- > Iron & Steel (Iron Ore, Pellets, Powders, Coke, Sinter, Slag)
- > Ceramic (Clay, Grog, Bauxite, Magnesite, Quartzite)
- > Foundries & Smelters

Chemical Industry

- > Fertiliser
- > Detergents
- > Plastics

Food Industry

- > Animal Feed (Rolls, Pellets, Crumb, Biscuits)
- > Vegetables
- > Beans & Seeds (Cocoa, Coffee, Nuts, Grains)
- > Oils (Mineral, Vegetable, Nut)
- > Powders (Cocoa, Coffee, Tea, Spices, Milk Powder, Salt, Sugar)

Recycling / Waste Management

- > Rubber Crumb (Tyres, Underlay)
- > Shredded Plastic (Bottles, Packaging, Laminates)
- > Glass (Plate and Bottle)
- > Mixed Commercial / Domestic Waste
- > Bio Fuels (MBM, Wood-waste, Biomass)
- > Waste Water Treatment Solids
- > Building Waste (Plasterboard, Aggregates, Soils)
- > Metals

Mogensen Products

- > **Mogensen Sizers**
(Open or Enclosed / Multi-deck)
- > **Mogensen Vibratory Screens**
(Open or Enclosed / Single or Multi-deck)
- > **Vibratory Feeders**
(Open or Enclosed liner options)
- > **Mogensen Vibratory Separators**
(Divergators; Grizzly Feeders; Tine-decks & Bar-decks)
- > **Mogensen Spreader Feeders**
(Central or Transverse / Single or Twin Outlet)
- > **Mogensen Vibratory Conveyors**
(Open or Enclosed / Tubular or Square Section)
- > **Mogensen Vibratory Tables**
(Flat or Grid top / Fixed or Pneumatically Raised)
- > **Mogensen Mesh Cleaning**
(Pneumatically Released or Electrically Heated)
- > **Mogensen Vibratory Starters**
(Fixed or Variable Speed / Single or Multi-vibrator)
