ABOUT TRACKIT247

We provide innovative, real time, affordable GPS asset tracking to monitor vehicles, assets and staff. Our solutions are built for commercial organisations and leisure applications, as well as custom-made solutions.

MOBILE TRACKING

Have full functionality of your control panel from any internet enabled device via a browser, or download our iOS / Android app - so you can access your important information anywhere.

FLEXIBLE PAYMENTS

We give you flexible buying options with low monthly payments, or alternatively no upfront costs with higher monthly payments over an agreed length of time.

TRACK EUROPE WIDE

Our units work across most European countries without any extra charges. Need to track in countries outside of Europe? Please contact us to enquire.

INNOVATIVE CONTROL

Our innovative web-based control panels have been designed to easily, effectively and efficiently manage assets, vehicles, employees, equipment, and all tracking devices from one simple web-based dashboard

MAKING IT SIMPLE

Our nationwide network of installation engineers can arrange a suitable time to install your tracking devices, and we provide training on how to best use your tracking dashboard.

ADVANCED FEATURES

REAL-TIME TRACKING

Knowing where your assets are in real-time time is no longer a problem. On the asset dashboard, you're able to see where your vehicles or other assets are anywhere, any time.

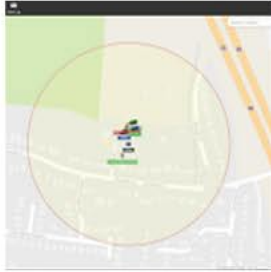

JOURNEY HISTORY

View a detailed breakdown of tracking history from the past 12 months, including asset location, date, time, speed, distance, and battery level information.

GEO FENCE ZONES

Our control panel allows quick & easy setup of unlimited circular/polygon geo-fenced zones, which can alert you if any tracker leaves or enters the zone.

ROUTING TRACKERS

Create the quickest route between two trackers, or from a tracker to any postcode. Directions will then be shown on the map screen, via Google maps.

LIVE TRAFFIC

View live, accurate traffic information on all major roads via Google maps.

Green - Clear Traffic
Yellow - Slow Traffic
Red - Heavy Traffic

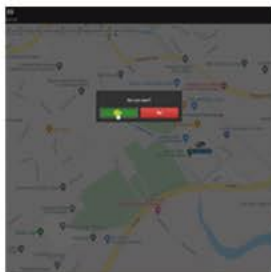

DMC (Device Management Console)

View a detailed run down of all trackers in an easy-to-view list format, displaying status, battery level and speed as well as the last date and time recorded.

MOTION ALERTS

Arm your vehicle and be alerted of any movement. Some assets can be towed or loaded onto another vehicle by thieves, so make sure you don't miss a beat!

LIVE STREAM COMPATIBLE

View a live stream of your Trackit247 dash cam straight from the platform. Dash cams from other brands are also available, but cannot be integrated into our platform.

LIVE VIEW DASH CAMERAS

Pair up your tracker with a Live Viewing Dash Camera & have Trackit247 retrieve footage for you remotely

EC26 LIVE 4G DASH CAMERA

The EC26 Live 4G Dashcam is a 2 channel 1080p dash camera with a front and internal viewing camera. It's ideal for any car, van or HGV and you can choose from a 128gb or 256gb SD card. It also comes with a multi network sim card used to stream the footage through our Asset or Fleet platform.

EC25 LIVE 4G DASH CAMERA

The Trackit247 EC25 Dash Camera is a high performance front and internal dashcam; offering a wide 130° field of vision, internal night vision & Live View compatibility, with Live GPS included!

3 & 4 CHANNELS AVAILABLE

Rear Number Plate Camera 1080P/720P

Standard 1080p/720p Rear Camera

The internal cameras are OPTIONAL, they can be turned off or adjusted to turn away.

We also provide a fleet or leaflet tracking control panel with a range of tracking devices available to meet all of your personal or business requirements.
