TWO WAY RADIOS

We provide Motorola radios for robust and reliable communications even in the most challenging environments. Radios are available in Analogue or Digital covering a wide range of frequencies. Repeaters and talk through base stations can ensure long range reliable communications across difficult and challenging terrains.

BODY CAMERAS

Our range of body cameras ensure secure data transfer, employee safety increased transparency between workers and the general public and can help to identify training needs as well as provide video and voice evidence if this is required.

LONE WORKER AND MAN DOWN SOLUTIONS

Improve health and safety for your lone workers with one of our integrated lone worker or man down features. Additionally, add extra resilience with an additional auto dialler installation to call key contacts in case of no worker response.

OFCOM MANAGEMENT

We can manage your Ofcom licencing to ensure you are up to date and legally compliant at all times. Ofcom is a legal requirement for all Private Business Radios and secures your communications from interference.

Not sure what you need?

WAVE PTX

Subscription based group communications which can connect your team members across different devices, networks and locations. Instant Push-to-talk communications over internet protocol with easy management and improved visibility.

ATEX RADIOS

Our intrinsically safe Motorola ATEX radios are certified to be used safely in hazardous environments as well as containing all of the features you would expect from a professional radio system.

SATELLITE PHONES

In difficult and remote environments, satellite phones can offer critical communication lines with workers where other devices cannot.

ACCESSORIES

We provide a range of accessories to ensure the best experience when using our communications solutions. From headsets and earpieces to bluetooth mics and speakers.

Our business is built on quality, developing long term relationships and delivering an excellent quality of service for our customers.
