WHO WE ARE

You are invited to discover a panoramic view of our evolution. Throughout this document, you will find a summary of our history, the principles that guide us and the vision that drives us into the future.

About Us

Fonmar is a world leader in the manufacture of equipment for the vulcanization of rubber conveyor belts and tires, as well as machinery and tools for splicing PVC/PU belts and all types of belts.

With a consolidated track record in the sector, we stand out for our technological innovation, quality of service and a firm commitment to our customers worldwide.

**Our brand.
Our essence.**

We remain at the forefront of the sector with the most advanced technology and processes.

Experience speaks for itself

Fonmar is synonymous with quality, technology and commitment to the customer.

We evolve to offer solutions that make a difference in the market. Trust us to take your goals to the next level.

Purpose

To continue providing solutions to the new challenges posed by both our customers and the different markets in which they operate, thus ensuring continuous growth and the relentless effort to develop our products.

Mission

To reach the full satisfaction of our customers by providing them with our technology and know-how, making every effort to achieve products with high quality standards that meet and even exceed customer expectations.

Values

Professionalism: We act responsibly and rigorously in each project, ensuring efficient and precise solutions.

Quality: We guarantee excellence in each of our products, complying with the highest standards.

Commitment: We involve ourselves to the maximum with each customer, guaranteeing optimal results and long-lasting relationships.

Passion: We are motivated by the desire to exceed expectations with every solution we offer.

Integrity: We operate with transparency, ethics and respect, building trust with our customers and partners.

Sustainability: We work with a responsible approach, minimizing environmental impact and promoting energy efficiency.

Our History

More than 50 years
providing solutions to
the market

We have constantly evolved to become a benchmark in the manufacture of vulcanization machinery. Over the years, we have invested in technology, development and human talent to offer high quality solutions.

Fonmar was founded in 1975 with the aim of manufacturing tire repair machinery using a system that was revolutionary in its day: vulcanization.

In 1980, we began the development of vulcanizing press prototypes for rubber conveyor belts in response to the new requirements of our customers in the tire repair and rubber-related sectors.

Years later, in 1983, there were new companies specializing in the vulcanization of rubber conveyor belts, which urged us to

Since 1975 we have listened to our customers in order to always offer the best solution.

1975

Development of the first prototypes of vulcanization presses for rubber conveyor belts.

1983

Silver medal for innovation at the "Salon international de Genève" and the start of international expansion.

1990

We develop the first specialised models for joining both flat and toothed transmission belts.

Foundation of the Fonmar brand, focused on the manufacture of machinery for tire repair using the vulcanization method.

1980

Expansion of the range of machinery to cover tires of any size and development of machines for PVC and PU belts.

1985

develop new types of machines for splicing PVC and PU belts.

It was in the mid-90s when we began to develop machinery specialized in joining both flat and toothed transmission belts.

From the year 2000 onwards, the worldwide expansion of our products was completed, being present in all 5 continents as a touchstone in both conveyor belt presses and tire repair machinery.

Today, we continue to grow with a vision oriented towards the future, committed to innovation, automation and sustainability.

We obtain ISO9001:2015- quality certification, thus ensuring quality standards, and we continue with global international expansion, establishing a presence on all five continents.

2006

We implement remote process control by means of smartphone connection and added new functionalities.

2019

We continue to develop new products and incorporate advanced technologies and innovative materials

2000

We manufacture the longest PVC conveyor belt press at the time, measuring over 6 metres in length.

2015

We open the current facilities with more than 10,000m² equipped with the most innovative technology for the manufacture and testing of our products.

2025

Quality Policy

Quality first

FONMAR GROUP, S.L. is a company dedicated to the manufacture of vulcanization presses for PVC & rubber belts and tires, as well as their distribution, technical assistance and after-sales service.

Fonmar has defined a quality policy, with the full satisfaction of our customers as the basic objective, as the only way to ensure the profitability and continuity of our company. To this end, we plan its quality objectives, which are periodically reviewed and evaluated by our Quality Committee.

Ensuring quality is the responsibility of the management and affects all levels and all members of Fonmar. This Quality Policy is communicated and understood within the organization and may be consulted by any interested external agent. It is also reviewed for its continuous adaptation to the Quality Management System.

We plan our quality objectives to always exceed market standards.

- ✔ **Compliance with international standards:** Our products comply with the most demanding international standards of quality and industrial safety.

- ✔ **Continuous improvement:** We are committed to innovation and the optimization of our processes to guarantee increasingly efficient and sustainable solutions.

- ✔ **Customer satisfaction:** We work closely with our customers to understand their needs and offer personalized solutions that exceed their expectations.

- ✔ **Training and growth:** We promote the constant training of our team to maintain a high technical and professional level.

- ✔ **Sustainable development:** We design eco-efficient products, minimizing environmental impact and optimizing resources.

CERTIFICATES

AENOR CERTIFICATE

The Aenor certificate for the Quality Management System accredits at a national level that we comply with the standard:

- ISO 9001:2015

IQNET CERTIFICATE

The IQNet certificate provides international accreditation that we comply with the following standard:

- ISO 9001:2015

CE MARKING

The CE marking determines minimum levels of safety, functionality, energy saving and environmental protection common in Europe.

Our commitment, your guarantee.

Our commitment to quality has allowed us to consolidate our position as a trusted supplier in the global market, guaranteeing products and services that meet the highest industry standards.

How We Work

We have modern facilities covering more than 10,000m² and equipped with the most advanced technology for the manufacture and testing of our products. Our production plant is designed to optimize and guarantee the quality of each of our products. In addition, we have testing laboratories and specialized areas for research and development, thus ensuring that our solutions meet the highest industry standards.

WE PUT OUR HEART INTO IT

Each project is a challenge that we face with commitment, creativity and the utmost attention to every detail.

OUR TECHNOLOGY

We use advanced technology to offer efficient and reliable vulcanization presses. Our equipment is precision-designed to guarantee optimal performance in each application.

ACTIVE LISTENING

Thanks to our philosophy of active listening, we work hand in hand with our clients to develop teams that optimize their production processes.

AFTER-SALES SERVICE

We have a solid after-sales service, which includes technical advice, maintenance and spare parts to guarantee the maximum performance of our products.

THE TEAM

Made up of highly qualified and committed professionals. We have engineers, technicians and specialists from all sectors who work together to design, manufacture and provide support for each of our products. We foster a collaborative work environment, where innovation and professional development are fundamental pillars.

Always by your side to help you move forward.

Our commitment does not end with the sale of our products.

It is a priority for us to offer the necessary support to guarantee the maximum life of our products, thus increasing their usefulness over time.

SUCCESS STORIES

The satisfaction of our customers is our best letter of introduction. Over the years, we have collaborated with leading companies in different sectors, providing them with innovative solutions that have improved their operational efficiency and production quality.

Our Stuff

We develop equipment that guarantees strong and durable splices in the most demanding conditions for rubber and PVC/PU belts, as well as for transmission belts. With process control systems integrated or in external units, equipped with the latest innovations for monitoring and data storage. We offer solutions for the preparation and repair of belts.

Our tire repair machinery covers the vast majority of sizes and types, and can repair in any area (sidewall, shoulder or tread).

DESIGN AND INNOVATION

We focus our efforts on innovating in every product we develop.

CONSTANT R + D + I

We are continuously researching the incorporation of new technologies into our products.

LATEST TECHNOLOGY

We work with the latest technologies in order to offer products of the highest quality

INTELLIGENT SOLUTIONS

Each of our products is the perfect combination of advanced technology, precision and efficiency.

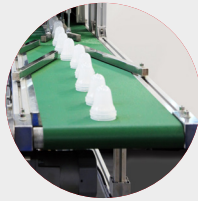

- ✓ Design and construction that provide a long service life in the harshest conditions.
- ✓ Top quality materials and components to offer the best guarantee.
- ✓ All the safety measures applied minimize any risk to the operator in each job.

MACHINERY FOR

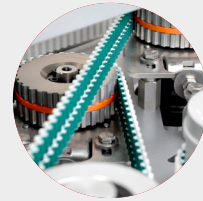

HEAVYWEIGHT SPLICING

Different options for every need. 2-piece or beam presses, with different pressure and cooling systems, portable or workshop, for splicing or repair.

LIGHTWEIGHT SPLICING

Perfect fusion in any type of belt. Portable or workshop presses, built-in or external controllers, different cooling systems.

TRANSMISSION BELTS SPLICING

Even the smallest jobs require maximum precision. Presses for flat or toothed belts, with or without reinforcement, joints in the workshop or on site.

TIRE REPAIR

With pneumatic or hydraulic pressure systems, our vulcanizers are capable of offering the best results on any type of tire.

TAILOR-MADE PROJECTS

Tell us about your project and we will put all our experience at your disposal. Presses for the manufacture and treatment of rubber parts or special applications.

Advanced solutions for a world in motion.

The strength of a system depends on its most fragile component. Make your connections or repairs strong with Fonmar.

Global Market

Fonmar has a vision of continuous growth and global expansion. With a presence in multiple international markets and more than 100 countries, we continue to strengthen our distribution network and strategic alliances to take our tire repair and belt splicing solutions to more sectors around the world. We are committed to internationalization as a key pillar of our development, adapting to the needs of each market and ensuring the quality and excellence that characterize us.

Connecting industries
and driving progress to
grow with you.

- Recycling and waste management
- Steel and metallurgy
- Energy and thermal power plants
- Pharmaceuticals and cosmetics

Your strategic partner anywhere in the world.

With the focus on innovation and sustainability, we continue to expand into new markets and countries, consolidating our position as a global benchmark in any sector that uses conveyor belts.

- Mining
- Cement and construction
- Agriculture and food
- Manufacturing and automotive
- Logistics and distribution
