Welcome

I believe churches and exhibitions have a lot in common.

At their heart they both exist for the same reason: bringing people together.

Neither is really about a building, a stand, a product or even an event. It's about people. It's about creating a place where conversations happen, ideas are shared, friendships are formed and communities are strengthened.

CRE feels like more than just an exhibition to me and the Quartz team.

Throughout the year, thousands of people serve churches, ministries and Christian organisations tirelessly in all sorts of different ways. Often behind the scenes, facing similar challenges and asking similar questions.

CRE provides the perfect opportunity to step outside the day-to-day and come together as a wider community. And perhaps that's more important today than it's ever been.

Wherever you look there seems to be uncertainty. Economic pressures, conflict, division, rapid change and a growing sense that people are becoming more disconnected from one another. It would be easy to focus on what separates us.

Tony Crinion, Managing Director,
Quartz Business Media

But gatherings like CRE remind us of something different. They remind us that we're stronger when we're together than when we're apart.

They remind us that encouragement matters. That sharing ideas matters. That supporting one another matters.

Most importantly, they remind us that none of us are doing this alone.

For the Quartz team, that's the real value of CRE. Yes, people will discover new products, services and ideas. New partnerships will be formed and new opportunities will emerge. But the lasting value comes from bringing a community together, renewing relationships and reminding people that they are part of something bigger than themselves.

Churches do that every week in communities across the country. CRE hopes to do it by bringing the wider Christian community together under one roof.

And if there's one thing I've learned from both churches and exhibitions: good things happen when people come together.

Welcome to CRE. We're delighted you're here.

CRE Cares: Making a Difference Together

At CRE, we believe that the Church is at its strongest when faith is put into action. That's why supporting charitable causes remains an important part of the exhibition.

Every ticket purchased for CRE 2026 helps support a range of organisations that are making a tangible difference in the lives of individuals, families and communities across Surrey and beyond.

Ticket proceeds are being split between:

Epsom & Ewell Foodbank

Epsom & Ewell Foodbank provides emergency food parcels and support to people experiencing financial difficulties while helping them access further advice and assistance.

Just Finance Foundation

Just Finance Foundation works with churches and communities across the UK to equip people with the knowledge, skills and confidence to manage money well.

Glass Door

Glass Door is one of London's leading homelessness charities. Through emergency shelters, accommodation programmes and support services, the charity helps individuals rebuild their lives with dignity and hope.

Princess Alice Hospice

Princess Alice Hospice provides compassionate hospice and palliative care for people living with life-limiting illnesses across Surrey, south-west London and Middlesex.

Support Walton & Hersham Foodbank at CRE

CRE 2026 is proud to be partnering with Walton & Hersham Foodbank, part of Walton Charity and the Trussell community, to support local people facing financial hardship.

When visiting CRE, **we invite you to bring a donation of food or toiletries**. Every item donated will help provide practical support to local individuals and families who are struggling to afford the basics.

Please bring your donations with you and look out for the foodbank collection point when you arrive.

Thank You
The generosity of the CRE community has always been one of its greatest strengths, and we thank you for helping us make a positive impact beyond the exhibition halls.

14:30 – 15:30	Mission where you are: Reaching rural and local communities today Across the UK, churches are navigating changing communities, limited resources, and new opportunities for mission. Yet some of the most encouraging stories of growth, innovation, and community engagement are emerging from rural and smaller settings. Join Rural Missions and a host of practitioners from across the country as we explore what mission looks like in villages, market towns, and in local neighbourhoods today. Through practical examples, discussion, and audience interaction, we will consider how churches can build meaningful connections, serve their communities, and help people discover and follow Jesus. Speakers: Bob Goody, CEO, Rural Missions Mike Frith, Founding Director, OSCAR

This practical session explores how to create a sound, video and lighting infrastructure that is adaptable, usable and creative, whilst positioning your church for future growth. Speakers: Dan Bowater hosted by MTS Live Dave Reason, Managing Director, MTS Live

11:30 - 12:00	Collaborative design: creating a church centre that truly serves your vision A successful church building project starts long before the first brick is laid. This practical and inspiring session will explore how collaborative design can help you create a church centre that reflects your mission, supports your ministry, and meets the needs of both your congregation and the wider community. • How to develop a clear and compelling brief for your new church centre • Practical ways to consult effectively and ensure every voice is heard • How to translate ministry priorities and church needs into successful design outcomes • Strategies for engaging the wider community, partners, and stakeholders • How to plan, phase, and deliver your project within realistic funding and budget constraints Speaker: Mark Newall, Director, BCHNarchitects
12:00 - 13:00	Networking break
13:00 - 14:00	Resourcing mission in our neighbourhoods: sharing faith across cultures and communities Britain's communities are increasingly diverse, creating both opportunities and challenges for churches seeking to share the love of Christ. From rural villages welcoming new populations to towns and cities shaped by multiple cultures, mission today requires both confidence and understanding. Hosted by Rural Missions and OSCAR, this interactive session brings together mission leaders and organisations working across a variety of contexts. Through presentations, panel discussion, and audience questions, we will explore practical ways churches can engage with people from different backgrounds, build meaningful relationships, and share the gospel in relevant and accessible ways. Drawing on experiences from rural, urban, and multicultural settings, this session will equip churches to think creatively about mission in their own neighbourhoods and discover resources, partnerships, and approaches that can help them reach those around them with the good news of Jesus. Speakers: Bob Goody, CEO, Rural Missions Becky May, Children, Youth and Families Mission Lead, Rural Missions Mike Frith, Founding Director, OSCAR

CRE Workshops

These CRE workshops are free to attend and seats allocated on a first-come first-served basis. All workshops take place in the Premier Suite, located on the 1st floor.

Freedom and Healing from Porn Addiction and Adultery with Mike Genung

Wed 14th Oct - 11:00am-12:00

Surveys show that upwards of 70% of Christian men and one third of Christian women are viewing pornography, putting marriages and families at risk.

The numbers of youth viewing pornography are staggering, with many kids getting their first exposure to porn at the age of 8. Tragically, many churches avoid these issues, which plays a significant role in keeping those who are hurting in shame and loneliness.

In this workshop, Mike Genung, founder of Blazing Grace, will share the story of his struggles with porn and sex addiction and how God set him free. The aim of the workshop is to equip church leaders with the resources for those wanting help – Mike will provide effective answers for recovery, discuss approaching our youth, and offer Blazing Grace's resources to those who want to make a difference

Overcoming the leadership challenges of burnout, bust-ups, and the battles within with Matt and Amy Summerfield

Wed 14th Oct - 12:30-13:30

Leadership is both a joy and a privilege, yet it also carries a weighty responsibility, often bringing us into seasons that are challenging and hard to navigate. In this session, we will explore practical and prayerful responses to three of the most common leadership storms: burnout, bust-ups, and the battles within.

Addiction, Recovery and the Church: How Can We Help? with Nigel Skelsey

Wed 14th Oct - 14:40-15:25

Addiction and compulsive behaviours affect people in every church and every community, yet many churches feel unsure about how best to respond.

This practical and encouraging workshop will introduce **The Recovery Course** – a free, Christian 12-step-based course designed to help churches support people struggling with all kinds of addiction and compulsive behaviours.

We'll explore what recovery looks like, how churches can create a safe and welcoming environment for those seeking help, and how The Recovery Course can be used within your church. You'll discover how the course works, who it is for, and the practical steps involved in running it.

You'll also hear **first-hand how The Recovery Course works from people who have run the course and from those who have attended the course and experienced freedom from addiction**. Their stories will give you an insight into the impact the course can have and what participants can expect when they take part.

Whether your church is already supporting people affected by addiction or you're wondering where to begin, this workshop will provide practical guidance, encouragement and resources, **all entirely free of charge**, to help your church become a place where people can find hope, healing and lasting freedom.

W: http://www.anthonysmith.co.uk

Profile: We have been designing and installing tailored lighting systems for Churches for more than 40 years. Potential projects start with a simple conversation,

often many of these projects can take several years to come to fruition, it is not unusual for us to have an initial discussion with potential clients and then not hear anything for a couple of years. At an initial 'no cost' and 'no obligation' visit, we would be happy to have an initial discussion about the requirements whilst doing an appraisal of the current wiring and lighting systems, we would then respond with a written precis of discussions and findings whilst setting out a small number of options for possible solutions. Each option would outline benefits, potential downsides together with a realistic cost for their implementation. Having completed many installations over a long period of time, we are very happy to introduce potential new clients to our previous clients so they can visit completed projects and ask any questions directly about our involvement and services, before, during and after the works were completed.

Our register is accredited by the Professional Standards Authority (PSA) under its Accredited Registers programme. The programme was set up to provide public assurance for health and care occupations that are not yet subject to statutory regulation, for example, counselling and psychotherapy. Accreditation with the PSA means that we have met the Authority's standards, and we celebrate the recognition that brings to our organisation and our members. ACC is an ecumenical organisation; our members are from various Christian denominations and traditions, united by the same faith, professions and callings. We are honoured to be an established professional voice that promotes the therapeutic importance of considering a person's spirituality and religious faith as being intrinsic to their psychological wellbeing, and a person's psychological wellbeing being similarly intrinsic to the health of their spiritual and religious life.

We invite people to discover the Bible's message for themselves, even if they've never thought the Bible was for them. We want them to read it, be excited by it and find their lives changed by it. E: thallonakers@gmail.com

W: https://christiansovercoming.com

Profile: An editorial published in the Guardian Newspaper in 2017 states, Religions are at their most powerful when they are not something people are conscious of believing, but just apparent facts that they assume everyone knows. That states exactly the problem which renders the Church ineffective in our culture today. Secularism's basic beliefs are assumed to be true in almost every part of our society and protected by massive investment and in some cases by the law of the land. As a Religious Education Teacher I contended for Secularism and Secular Humanism to be taught as a religion detailing and critiquing its beliefs, practises, morality and impact on society. Many secularists

opposed this motion understanding the truth of the editorial published by the Guardian newspaper.

Has the Church been exiled in Britain today? Come and be informed.

Princes Risborough

E: hazelwilliams@mail.com
W: <https://www.hazelwilliams.net/>
Profile: Hazel uses a flat-bed laser to etch and cut her designs into paper, acrylic and wood. These designs are applied to a wide range of products from hanging and freestanding decorations, framed pieces and greetings cards to commercial branding. Having had a passion for creativity since school, Hazel's interest in paper and lettering were increased during her time as a missionary in Hong Kong after university. It was there that she was drawn to the precision and delicacy of traditional paper cutting and this led to many creative projects in her spare time whilst working full-time in London. In 2011 Hazel attended a summer school with a laser-cutting artist in Edinburgh. This proved to be a 'light bulb moment' as it drew together many different elements she enjoyed, from sketching to designing at a computer, and she fell in love with the intricacy that can be produced.

Our solutions are ideal for churches, historic buildings, and large spaces with high ceilings, where traditional heating systems can be inefficient and costly. Infrared heating is particularly effective in buildings with intermittent occupancy, delivering warmth precisely where it is needed without wasting energy heating unused areas. Heating can be zoned to occupied areas, such as pews and seating sections, providing targeted warmth and greater control over energy use. By focusing heat only where it is required, our infrared systems can improve energy efficiency, reduce running costs, and support organisations seeking practical, sustainable heating solutions.
