Lumis Essentials

Welcome to Lumis Essentials, the market leading Learning Management System for the Health and Social Care sector.

The Lumis Essentials Learning Management System has been designed with the learner in mind, every feature and element has been developed to further improve your learning experience.

The design and presentation of Lumis Essentials provides an appealing, streamlined look and feel and the interactivity of the Learning Management System ensures your organisation will benefit from an improvement in engagement and productivity.

Lumis Essentials has been developed to support your organisation to increase and maintain compliance, manage your Learning and Development journey and simplify your administration, with rapid load times and minimal clicks to access the areas of the Learning Management System you need the most.

Features

► Compliance and Performance

The My Team area of the Learning Management System can provide your organisation with everything you need to manage your teams with easy access to key features, all in one place.

With the clean-cut look and feel, you'll be able to track your whole teams' overall compliance, as well as easily identify which individuals within your team are compliant with their learning or which ones need some improvement.

The easy to use RAG System, allows for easy compliance tracking and the drill-down capability lets you know which Topic and Components need to be completed.

► User Interface and User Experience

The User Interface and streamlined design of Lumis Essentials makes the interactivity and usability of the Learning Management System appealing to your learners, leading to an increase in engagement and productivity.

With the super-fast load times and key features accessible in a few clicks, Lumis Essentials will enhance the User Experience and empower your learners to reach their full potential, everyday!

► Support

At My Learning Cloud, we're firm believers of providing you with everything you need to make your Learning and Development a success. Our Lumis Essentials Learning Management System has a number of features to support your learner.

With built in User Guides and Tours, your learners will have access to detailed support material to assist them navigating their new Learning Management System.

Our in-built Ticketing System allows your learners to raise any queries in the platform to your nominated administrator or our support desk.

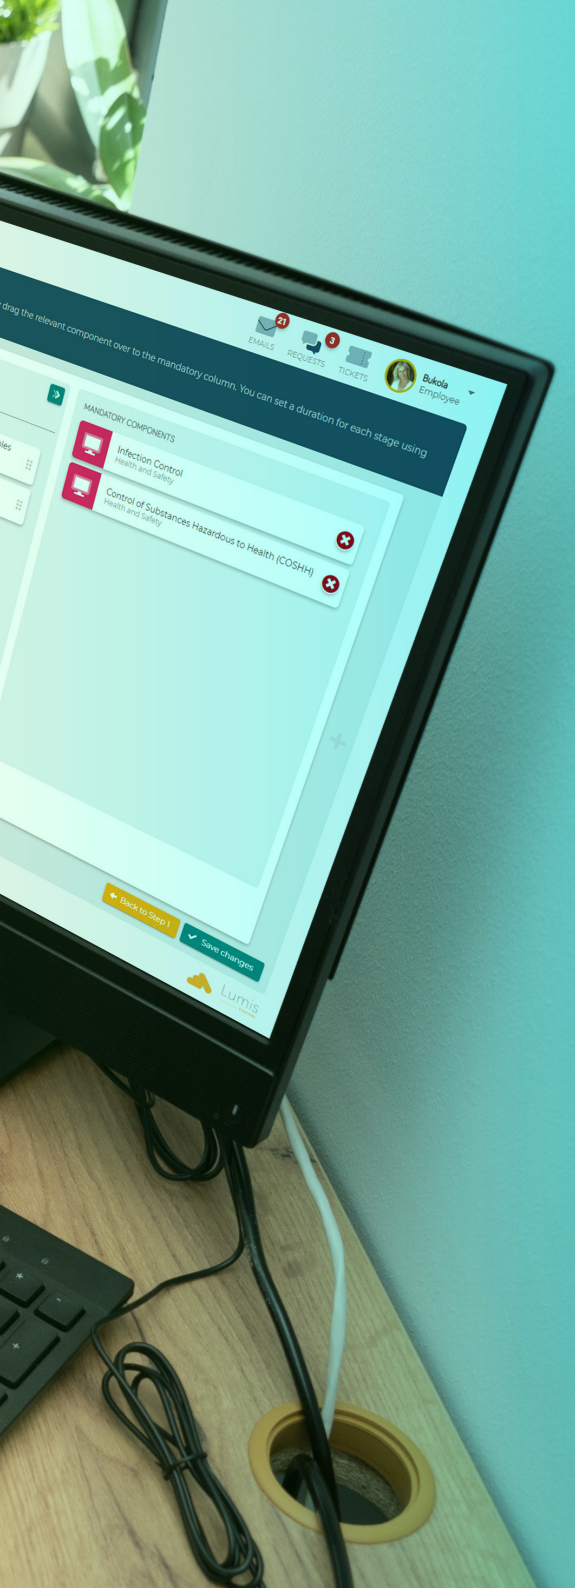

► 100+ CPD Accredited Courses

As standard across all our Learning Management Systems, including Lumis Essentials, you'll receive and have access to over 100+ CPD accredited online e-Learning courses.

Our courses are written for the Health and Social Care sector by our qualified and experience Subject Matter Experts.

We ensure that our e-Learning content is motivating, engaging and supportive for your learners, their manager and your organisation to deliver successful outcomes.

Journeys and Branches

We understand that all Learning Journeys are personal and constantly evolve, this is why the Journeys feature will support your organisation to manage what you consider as Mandatory Training for your learners.

With this feature, your organisation can fully configure your Learning Journey's and make them as simple or as complex as you like. With easy-to-use drag and drop functions, and the capability to structure your Learning Journeys, your organisation is able to set pathways based on location and/or role profile or even key individuals.

The addition of Branches also allows your organisation to tailor a Learning Journey based on individual learning needs. These Journeys can be set to either repeat or as a once off, depending on the requirements.

Admin Centre

The Admin Centre has always been an integral feature of our Learning Management System, so we have ensured that every single element is fit for purpose and it delivers what you want, in the most effective and streamlined way.

The Lumis Essentials Admin Centre is truly intuitive, with its multi-level functionality that enables you to fully customise the Learning Management System, so it reflects your organisation.

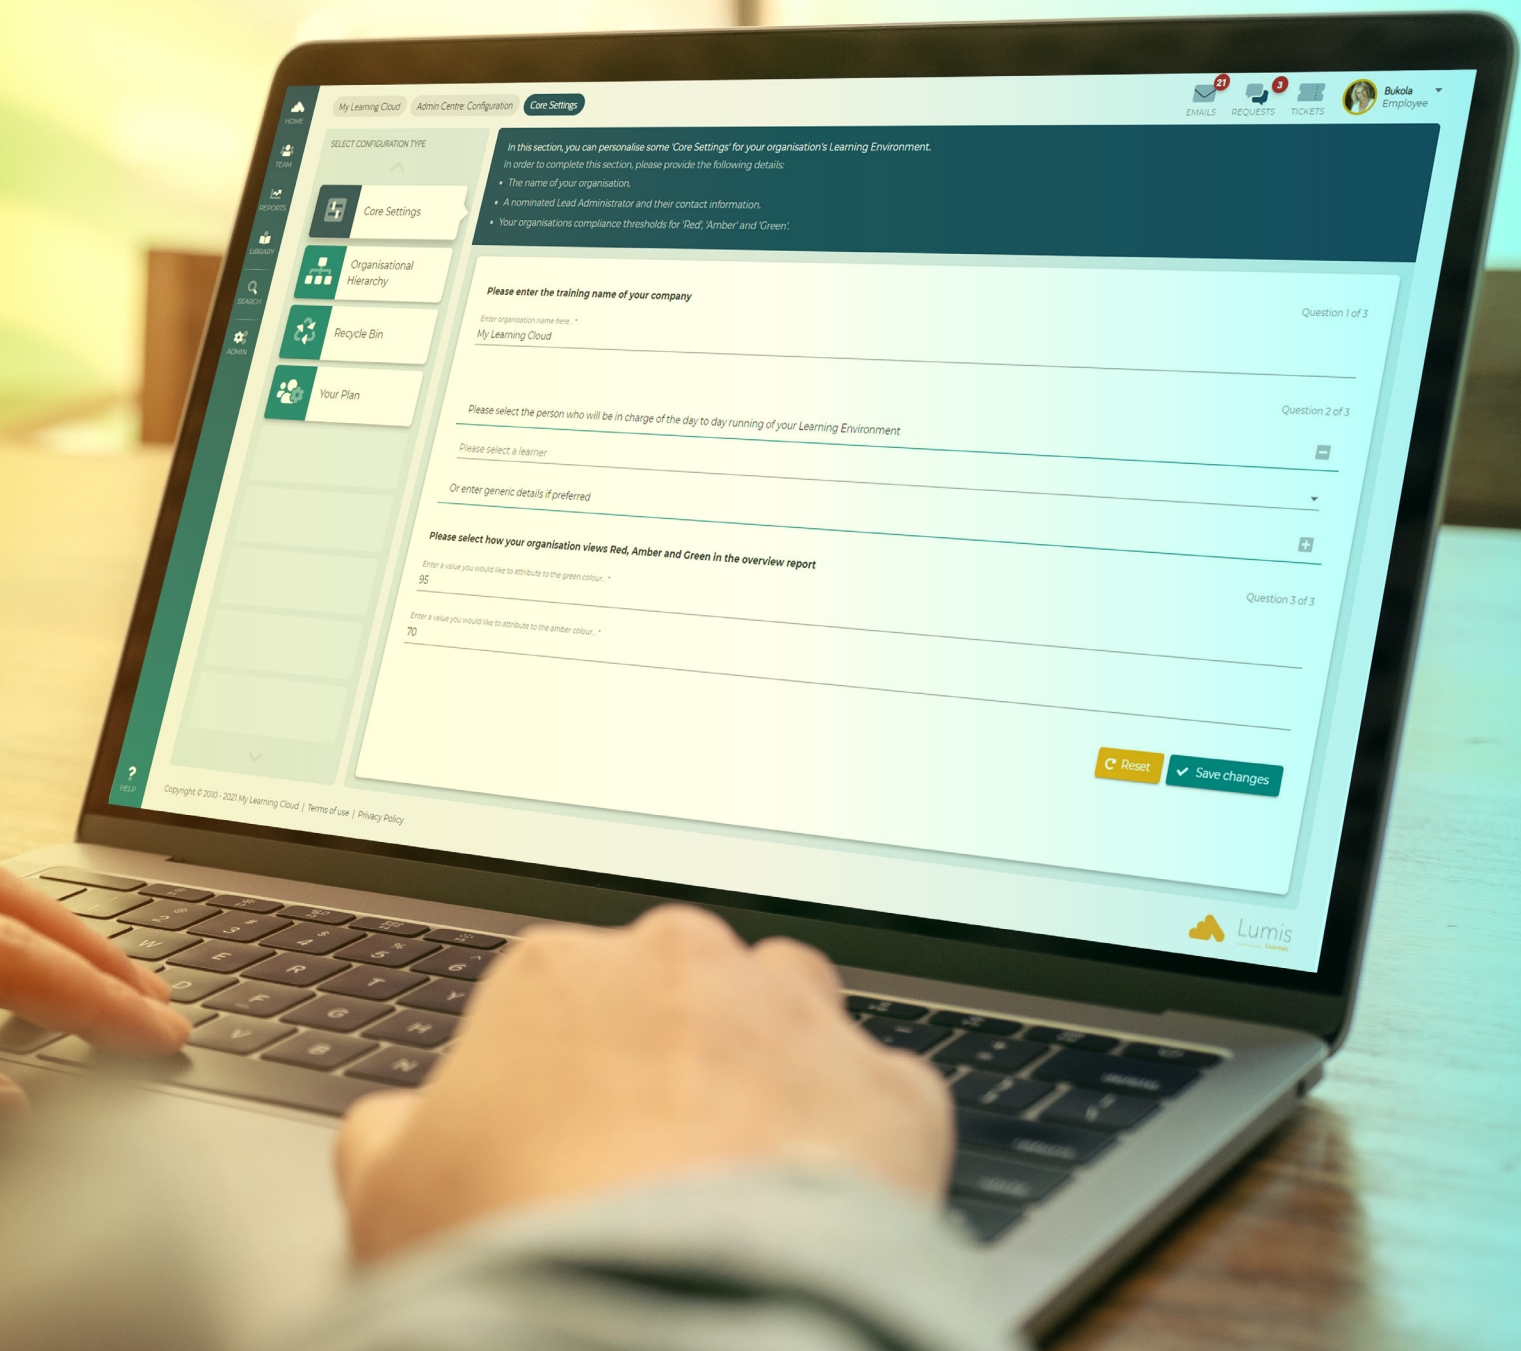

This powerful feature allows your organisation to manage and configure Topics and Components, within your Core Settings, your Organisational Hierarchy, as well as manage Certificates, Permissions, Roles and User Statuses.

These are just a few of the key features within our Admin Centre, but trust us, there is much, much more!
