22nd February 2022 - FOR IMMEDIATE RELEASE

Neuro Convention - 6th & 7th July, NEC, Birmingham

WEBSITE URL: <https://hubs.la/Q014gNKg0>

OPENING TIMES: Day 1 - 9:30–16:30 / Day 2 – 9:30-16:00

HALL: 19

Neuro Convention returns to the NEC, Birmingham July 6th & 7th

Improving patient outcomes in neuro rehabilitation. The event will showcase the latest technology and innovations in the neurological sector with the goal of improving patient outcomes. The show focuses on four key areas of neurology: rehabilitation, mental health, diagnostics, and brain stimulation.

Explore the exhibition and meet with world leading technology, equipment and software manufacturers. Exhibitors will be running live demonstrations showcasing innovative products in the dedicated live demo area, providing the perfect opportunity for you and your team to trial emerging equipment and technology that can positively impact your service delivery.

A CPD accredited seminar programme will run alongside the exhibition, hosting some of Europe's brightest minds in the fields of neurology and neuroscience. This year, the introduction of a keynote theatre will take centre stage alongside our other theatres dedicated to Rehabilitation and Diagnostics, and Brain, Spine and Mental Health. Following the success of the 2021 event, Neuro Convention will be once again sharing the same floorplan with Naidex to highlight the importance of independent living and improved mobility.

As part of the programme, the University of Plymouth will be once again hosting their neurological rehabilitation workshops in their dedicated theatre throughout the event. University of Plymouth are known worldwide for their work, and much of their research influences neurologists across the UK in physiotherapy and rehabilitation. Their workshops were the busiest theatre in 2021, so this one is not to be missed!
