INSURANCE SOLUTIONS

Fleet Insurance

HGV & Haulage

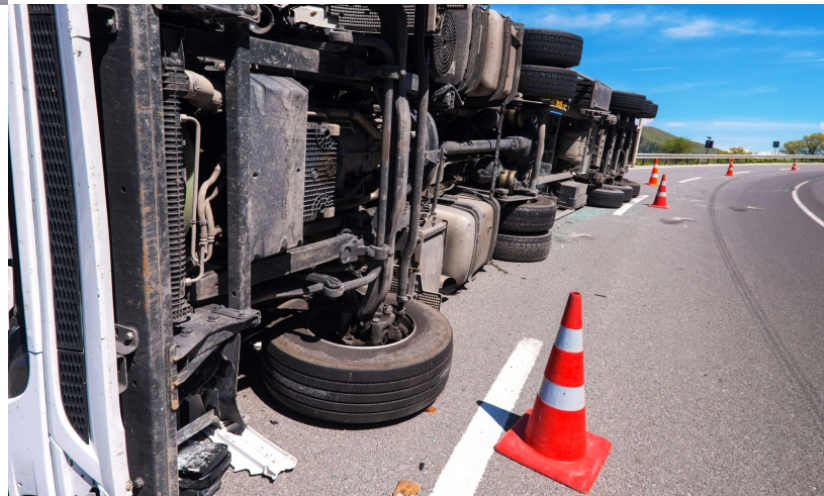

If you run a fleet of HGV's then you know all about the challenges of managing and controlling claims and premiums. You need an insurance broker that you can rely on 100% and that's where our unique approach can help.

Claims

We believe that by investing in a truly high end claims service which investigates every single aspect of the claim, and looks at every detail, we can drastically improve on the performance of the insurer's own claims department.

Our Claims team take nothing at face value and will argue each point to ensure you get the correct outcome, not simply the most expedient one. You will be amazed at the difference.

Risk Management

It is not simply about reducing the impact of incidents after they happen. We will also work with you to address the underlying issues which create these claims, reducing vehicle down time, lowering your administration costs as well as cutting claims and premium costs year on year.
